

2019 sustainability performance summary

Supporting our customers section¹

Indicator	2017	2018	2019
Operational safety and system reliability	1	1	1
Number of incidents with significant safety, environment or service disruption consequences (gas) ²	0	0	0
Number of confirmed BC Mandatory Reliability Standards violations with penalty (electricity) ³	0	0	0
Gas line damage incidents by all parties working around the FortisBC gas system (total number) ⁴	1,247	1,202	1,069
Energy use			
Amount of energy delivered, gas and electricity ⁵	64,700 GWh or 233 PJ	62,100 GWh or 224 PJ	66,800 GWh or 238 PJ ⁶
Customers			
Number of customers, gas	1,008,000	1,029,500	1,040,000
Number of customers, electricity	172,000	175,900	179,000
Customer satisfaction index - gas ⁷	8.4	8.7	8.7
Customer satisfaction index - electricity ⁸	8.2	8.3	8.5
Number of cybersecurity incidents ⁹	0	0	0
Economic, customer service			
FortisBC investment in conservation and energy management programs	\$41.3 million	\$42.8 million	\$74.6 million
Emergency calls responded to within one hour – gas	97.8%	97.8%	97.9%
Emergency calls responded to within two hours - electricity	93%	94%	92%
System average interruption duration index (SAIDI) ¹⁰	4.05	3.15	2.42
System average interruption frequency index (SAIFI) ¹¹	1.78	1.73	1.20
Customers who achieve resolution in one contact with	80%	82%	81%

Indicator	2017	2018	2019
Economic			
Community events participated in ¹³	505	429	332
Communities that received investment	85	75	76

Indicator	2017	2018	2019	
Number of Indigenous communities that received training from the First Nations Emergency Services Society	126	120	70	
Economic value generated ¹⁴ (in millions of dollars)	\$1,580	\$1,578	\$1,734	
Economic value distributed				
Operating costs (in millions of dollars)	\$177	\$187	\$200	
Employee wages and benefits (in millions of dollars)	\$265	\$287	\$299	
Payments to providers of capital ¹⁵ (in millions of dollars)	\$471	\$498	\$454	
Payment to government ¹⁶ (in millions of dollars)	\$410	\$417	\$401	
Community investment ¹⁷ (in millions of dollars)	\$2.1	\$1.8	\$2.5	
Indigenous				
Indigenous rights incidents ¹⁸	0	0	0	
Taxes paid when on reserve land (gas and electricity) ¹⁹ (in millions of dollars)	\$2.1	\$2.2	\$2.3	
Safety				
Number of emergency exercises ²⁰	18	22	20	
Protecting the environment section ²¹				
Protecting the environment section ²¹ Indicator	2017	2018	2019	
	2017	2018	2019	
Indicator	2017 153,000	130,000	2019 158,000	
Indicator Emissions Direct greenhouse gas (GHG) emissions (scope 1) ²²				
Indicator Emissions Direct greenhouse gas (GHG) emissions (scope 1) ²² (figures in tCO ₂ e) Indirect GHG emissions (scope 2) ²³	153,000 5,300	130,000	158,000	
Indicator Emissions Direct greenhouse gas (GHG) emissions (scope 1) ²² (figures in tCO ₂ e) Indirect GHG emissions (scope 2) ²³ (figures in tCO ₂ e)	153,000 5,300	130,000	158,000	
Indicator Emissions Direct greenhouse gas (GHG) emissions (scope 1) ²² (figures in tCO ₂ e) Indirect GHG emissions (scope 2) ²³ (figures in tCO ₂ e) Environmental benefits from FortisBC energy solution GHG emissions saved from natural gas used for transportation ²⁴	153,000 5,300 ns	130,000 7,200	158,000 7,000	
Indicator Emissions Direct greenhouse gas (GHG) emissions (scope 1) ²² (figures in tCO ₂ e) Indirect GHG emissions (scope 2) ²³ (figures in tCO ₂ e) Environmental benefits from FortisBC energy solution GHG emissions saved from natural gas used for transportation ²⁴ (figures in tCO ₂ e) GHG emissions saved from liquefied natural gas (LNG) used for marine bunkering	153,000 5,300 ns 48,000	130,000 7,200 45,000	158,000 7,000 37,100	

Indicator	2017	2018	2019
Reduction in criteria air contaminants (CAC) released to the environment through the use of LNG and compressed natural gas (CNG) by customers ²⁶ (figures in tonnes CAC)	249	269	294
Lifetime energy saved from conservation and energy management programs ²⁷ (figures in tCO ₂ e)	292,000	334,000	483,000
Class 3 spills ²⁸			
Number of spills by FortisBC	0	0	0
Number of spills by contractors	3	0	0
Waste			
Amount of hazardous waste disposed of in accordance with regulatory requirements ²⁹ (figures in tonnes)	170	270	217
Penalties			
Number of environmental fines and penalties	0	0	0

Note: FortisBC is focused on efforts to increase awareness and understanding on the value of inclusion and diversity in the workplace. Diversity performance indicators are under review.

^{&#}x27;This summary table reports on sustainability data for FortisBC Energy Inc. and FortisBC Inc. as of December 31, 2019.

²Number of incidents with significant safety, environment or service disruption consequences in accordance with the FortisBC Energy Inc. Integrity Management Policy.

³Number of confirmed BC Mandatory Reliability Standards violations with penalty in accordance with the British Columbia Utilities Commission (BCUC) Rules of Procedure.

- ⁴The gas line damage performance indicator is modified and the performance is re-stated for 2017, 2018 and 2019 as the total number of gas line damage incidents by all parties.
- ⁵Total amount of natural gas and electricity delivered to FortisBC customers, excluding energy exports and upstream usage, amounts to 51 per cent of energy provided by public utilities.
- 6Amount of energy delivered, electricity 3,326 GWh. Amount of energy delivered, gas 227 PJ.
- ⁷As reported to the BCUC.
- ⁸As reported to the BCUC.
- 9A cybersecurity incident is defined as an incident where digital systems are compromised materially, or data is lost or stolen and that is reportable to the BCUC.
- ¹⁰SAIDI depicts the average outage duration for each customer served, indicated in hours per customer.
- "SAIFI depicts the average number of interruptions that a customer would experience, indicated in units of interruptions per customer.
- ¹²This summary table reports on sustainability data for FortisBC Energy Inc. and FortisBC Inc. as of December 31, 2019.
- 13A FortisBC event or activity open to members of the public (inclusive of virtual activities) where a FortisBC employee is present to answer questions and share information about the company.
- ¹⁴Revenues as reported per external financial statements for FortisBC Energy Inc. and FortisBC Inc.
- 15Calculation method in 2019 changed to interest paid on a cash basis, rather than the amount expensed throughout the year. Please note 2018 value has been restated.
- ¹⁶Calculation method in 2019 changed to actual amount of cash taxes paid rather than the tax expense. Please note 2018 value has been re-stated.
- ¹⁷Includes investments into the communities including donations, in-kind contributions and sponsorships.
- ¹⁸Defined as incidents that have been substantiated by a court of law.
- 19For taxes paid on FortisBC land, infrastructure and other taxable real property situated on reserve or treaty lands of any First Nation that has opted to exercise optional legislative powers to implement a property taxation system.
- ²⁰FortisBC defines an emergency exercise as a simulated emergency in which participants carry out roles, actions, functions and responsibilities that would be expected of them in a real emergency. The number of emergency exercises is driven by several factors such as due diligence, business need, regulatory, community request, etc. Annually, more or fewer exercises are not indicative of performance.
- ²¹This summary table reports on sustainability data for FortisBC Energy Inc. (FEI) and FortisBC Inc. (FBC) as of December 31, 2019.
- ²²Scope 1 emissions, as defined under the Greenhouse Gas Protocol, are direct emissions from owned or controlled sources. For 2019, this includes externally verified scope 1 GHG emissions as reported to the BC Ministry of Environment of 138,000 tCO2e and 7,500 tCO2e for FortisBC Energy Inc. and LNG operations, respectively.
- ²³Scope 2 emissions, as defined under the Greenhouse Gas Protocol, are indirect emissions from the generation of purchased electricity for own use. Not included is externally verified scope 3 GHG emissions for FBC as reported to the BC Ministry of Environment in 2019 of approximately 56,000 tCO2e.
- ²⁴Value differs from the compliance credits as determined by the Renewable and Low Carbon Fuel Requirements Regulation due to designated allowable limits as determined by the BC Government for the purposes of reporting under that regulation.
- ²⁵Renewable Natural Gas is produced in a different manner than conventional natural gas. It is derived from biogas, which is produced from decomposing organic waste from landfills, agricultural waste and wastewater from treatment facilities. The biogas is captured and cleaned to create carbon neutral Renewable Natural Gas (also called biomethane).
- ²⁶The CAC value includes nitrogen oxides (NOx) and sulphur oxides (SOx) but excludes particulate matter. The formation of particulate matter is related to the concentration of NOx and SOx in the exhaust. Given the decrease in NOx and SOx emissions for the use of natural gas versus diesel, a decrease in particulate matter is expected.
- ²⁷The lifetime energy saved is based on the net present value (NPV) estimates on energy savings from gas and electric programs that commenced in the reporting year as published in FortisBC's conservation and energy management filings to the British Columbia Utilities Commission (BCUC) as well as lifecycle GHG emission factor for gas using models adopted by the BC Government.
- ²⁸A Class 3 spill is defined as an event that results in significant damage that includes large spills in waterways, spills that significantly exceed externally reportable thresholds, a regulatory non-compliance investigation by regulator and/or a fire that may cause damage more than \$100,000.
- ²⁹Hazardous waste as reported on the movement document/manifest form that is required for the movement of all hazardous waste by the BC Ministry of Environment Hazardous Waste Regulation.
- 30 This summary table reports on sustainability data for FortisBC Energy Inc. and FortisBC Inc. as of December 31, 2019.
- ³¹AIFR per 100 workers is for a combined gas and electricity result (annual).
- ³²Depicts the number of lost work days experienced per 100 workers.
- 33 Excludes retirements. The voluntary turnover rate includes high turnover departments such as customer service, not present in other industry comparators. Values are aligned with industry comparators. The data includes regulated and non-regulated companies as well as temporary employees. Employees on long-term disability are
- ³⁴Includes members from the International Brotherhood of Electrical Workers (IBEW) and MoveUp.
- ³⁵Incidents include both discrimination and harassment complaints resulting in policy breaches. Policy includes compliance with all applicable legislation.
- ³⁶Incidents include substantiated respect in the workplace complaints. Policy includes compliance with all applicable legislation.
