Suite 410, 900 Howe Street
Vancouver, BC
V6Z 2N3

Dear Registrar:

Re: FortisBC Inc. (FBC)

Complaint Regarding FBC Public Safety Power Shutoff (PSPS) Policy - British Columbia Utilities Commission (BCUC) Order G-154-25 and Decision (Decision)
FBC PSPS Policy Compliance Report

On May 7, 2025, the Town of Princeton concurrently filed a complaint with the BCUC and a letter to FBC regarding FBC's announcement that it would introduce a PSPS policy (Complaint).¹ On May 14, 20, and 22, 2025, additional complaints about FBC's PSPS policy were filed with the BCUC by the Lower Similkameen Indian Band (LSIB), the Regional District of Okanagan-Similkameen (RDOS), and the Upper Similkameen Indian Band (USIB).²

On June 23, 2025, the BCUC issued Order G-154-25 and Decision (Decision), in which the Panel closed the Complaint and determined that FBC's PSPS policy is consistent with the Terms and Conditions of FBC's Electric Tariff. The Panel directed FBC, among other things, to file a report with the BCUC by November 14, 2025, containing the information set out in Appendix A to the Decision (Report), and to concurrently provide a copy of the Report to the Town of Princeton, the Lower Similkameen Indian Band, the Regional District of Okanagan-Similkameen, and the Upper Similkameen Indian Band.³

FBC respectfully submits the attached Report pursuant to Directive 6 of Order G-154-25.

¹ Exhibits B1-1 and B1-2, respectively.

² Exhibits B2-1, B2-2, B3-1, B4-1 and B4-2.

³ Directive 6.

If further information is required, please contact the undersigned.

Sincerely,

FORTISBC INC.

- Appendix D** Engagement Summary Report

1 **1. INTRODUCTION**

2 On June 23, 2025, the British Columbia Utilities Commission (BCUC) issued its Decision and
3 Order G-154-25 regarding a complaint filed with respect to FortisBC Inc.'s (FBC) Public Safety
4 Power Shutoff Policy (PSPS) (PSPS Decision). Among other things, the PSPS Decision directed
5 FBC to file a report with the BCUC by November 14, 2025, containing the information set out in
6 Appendix A to the PSPS Decision (Report) and to concurrently provide a copy of the Report to
7 the Town of Princeton, the Lower Similkameen Indian Band (LSIB), the Regional District of
8 Okanagan-Similkameen (RDOS), and the Upper Similkameen Indian Band (USIB).¹

9 Appendix A to the PSPS Decision sets out the information which the Report is to contain.

10 In compliance with Directive 6 of Order G-154-25, the Report is organized as follows:

- 11 • **Section 2** provides a summary of the engagement activities. This includes engagement
12 undertaken with impacted parties up to the date of filing the Report, debriefing after the
13 2025 Wildfire Season, an overview of feedback received, any lessons learned from the
14 engagement process, and planned future customer engagement activities;
- 15 • **Section 3** provides a summary of all PSPS events that occurred during the 2025 Wildfire
16 Season;
- 17 • **Section 4** includes an assessment of the efficacy of the PSPS policy and a discussion of
18 any changes expected to the policy for the 2026 Wildfire Season and expansion of its use;
- 19 • **Section 5** provides a discussion on the indices used to trigger the initiation of the PSPS
20 process, an assessment as to whether these indices continue to be appropriate or whether
21 FBC considers changes are necessary, and an assessment of weather events that did not
22 trigger but were close to triggering the PSPS initiation steps; and
- 23 • **Section 6** discusses lessons learned from the 2025 Wildfire Season.

24 **2. SUMMARY OF ENGAGEMENT**

25 In Appendix A to the PSPS Decision, the BCUC directed that FBC provide a summary of the
26 engagement undertaken with impacted parties regarding the PSPS policy up to the filing of the
27 Report, including the engagement completed in the Fall of 2025 after the peak of the 2025 wildfire
28 season. The summary should include an overview of the feedback received and any key lessons
29 learned from the engagement processes. In addition, the BCUC directed FBC to provide a
30 summary of planned future customer engagement.

¹ Directive 6.

1 **2.1 ENGAGEMENT UNDERTAKEN TO DATE**

2 In March 2025, FBC initiated a phased engagement plan on its PSPS policy, starting with initial
3 engagement with local governments, First Nations, and provincial officials. FBC followed this
4 initial engagement with an awareness and education campaign focused on customers and the
5 general public in areas identified as being at the greatest risk for a PSPS event. Awareness and
6 education activities continued through October 2025. The detailed engagement log is provided in
7 Appendix A which identifies engagement activities with First Nations (Appendix A-1) and all other
8 stakeholders (Appendix A-2). FBC provides the following discussion of the various stages of
9 stakeholder engagement and the outreach activities undertaken.

10 During March and April 2025, FBC met with the Upper and Lower Similkameen Indian Bands,
11 local governments in Princeton, Keremeos, Midway, Greenwood, Regional Districts of Okanagan-
12 Similkameen (RDOS) and Kootenay Boundary (RDKB), Interior Health, MLAs, provincial
13 ministries, and other key stakeholders such as the BC Cattlemen's Association. Multiple in-person
14 and virtual meetings were held to provide information, gather feedback, and identify critical
15 infrastructure. FBC also provided information packages prior to and after the meetings.

16 From April to October 2025, FBC continued its engagement activities, including holding meetings
17 and open house events, sharing information on its website, conducting public outreach through
18 paid media (digital, print, and radio), communicating through direct customer emails and social
19 media, and outreach to news media. Open houses were promoted using the same channels
20 (excluding radio).

21 FBC held three in-person open houses in June 2025, located in Greenwood, Keremeos and
22 Princeton, with over 177 attendees. Comment forms were available at each of the open houses
23 and an online form to submit questions was made available on the FBC website. In general, the
24 feedback received included concerns over the length of a potential power outage and criteria for
25 when a PSPS event would be initiated. Many of the attendees were in favour of wildfire prevention
26 measures.

27 In June 2025, FBC commissioned a third-party survey, conducted by Leger, of residents in the
28 Kootenays and Okanagan-Similkameen and found that while 78 percent agree it is important to
29 be prepared for prolonged outages, only 29 percent felt prepared. The survey also found that 88
30 percent believed it is important for utilities to take steps to prevent their infrastructure from
31 becoming a potential ignition source for wildfires, and 60 percent were willing to accept temporary
32 power outages during extreme wildfire threats. FBC provides the detailed survey results in
33 Appendix B.

34 FBC held additional meetings with First Nations, municipalities, Interior Health, Emergency
35 Management Branch, MLAs, and other stakeholders. The Minister of Emergency Management
36 and Climate Readiness (EMCR) was engaged to advocate for recognizing proactive power
37 shutoffs as emergencies under provincial legislation. FBC provides a copy of a letter sent by FBC
38 to Minister Greene in this regard in Appendix C.

1 FBC continued to provide education to its customers and the public on the PSPS policy and its
2 overall wildfire safety practices through ongoing digital paid media. FBC is sending direct mail to
3 all potentially affected customers to help increase awareness of what to expect if initiation of a
4 PSPS event is being considered in their area and to encourage vulnerable customers to register
5 with FBC so the Company can take additional steps to notify them.

6 FBC hosted an interactive session with the communities to which FBC's PSPS policy applies
7 during the Union of British Columbia Municipalities in Victoria in September to review the PSPS
8 policy, engagement efforts to date, and share important lessons learned which are discussed in
9 Section 2.2 below. In advance of the session, FBC shared an Engagement Summary Report with
10 key stakeholders (a copy of which is provided in Appendix D). FBC gathered feedback from the
11 local and provincial government officials at the session and has taken that information into
12 consideration for its ongoing wildfire mitigation practices including its PSPS policy. Much of the
13 feedback was similar to that received earlier in the year and mentioned above.

14 FBC hosted two additional open houses in October in Midway and Hedley to further engage
15 potentially impacted communities and address concerns. The open houses were promoted
16 through paid media (digital and print) as well as on social media, the FortisBC website, community
17 posters, customer direct emails and outreach to news media and community leaders. A total of
18 39 people attended. Comments were consistent with earlier feedback.

19 **2.2 FEEDBACK AND LESSONS LEARNED**

20 Feedback came through many channels – in-person sessions, comment cards, emails, webform
21 completions, phone calls, letters, social media, and the BCUC complaint review process. The
22 input from all sources helped inform FBC's understanding of the concerns and what matters most
23 to communities and customers.

24 The top themes identified were wildfire risk and prevention, how the PSPS policy is implemented,
25 and safety concerns during outages. People wanted clarity on criteria, fairness, and how risks like
26 fire hazards and crime would be managed. Other concerns included food spoilage, support for
27 vulnerable populations, reliable notification systems, and funding for wildfire prevention.
28 Customers were concerned about the ability to prepare for and manage through a prolonged
29 outage.

30 FBC also heard about communication challenges, backup power needs, infrastructure
31 improvements, and impacts to water pumping infrastructure. Residents suggested better
32 notification about inclusion in the PSPS policy, specifically more notice and using multiple
33 channels. There were several suggestions regarding more investment in the electricity system to
34 allow for more targeted shutoffs and quicker restoration of power, especially in remote
35 communities. Respondents also highlighted the need for maintenance, such as clearing
36 vegetation from rights-of-way and replacing aging pole structures.

37 Local governments within the communities where FBC's PSPS policy applies expressed concern
38 about the lack of initial clarity on the locations, thresholds, frequency and length of potential PSPS

1 events, the level of consultation and engagement prior to implementing the policy, the impact on
2 the communities to fight wildfires with no electricity, and the inability to receive provincial
3 emergency funding to support communities during PSPS events. A key lesson learned for FBC's
4 future engagement activities is to ensure community officials are informed of key details of the
5 PSPS policy, including triggers of a PSPS event and affected locations, and have the opportunity
6 to consider potential PSPS events in their own emergency planning processes, prior to FBC
7 conducting more general public outreach.

8 The feedback highlights the need to encourage community emergency officials to include
9 planning for power outages as an identified risk in their emergency management plans. Power
10 outages can happen for a variety of reasons, including severe weather, motor vehicle accidents,
11 trees falling on power lines, or necessary maintenance. Therefore, it is important for communities
12 to be prepared for power outages, regardless of the cause, to support community resilience. FBC
13 recognizes the need for open two-way communications with community partners where FBC
14 shares information about its PSPS policy and receives information from the community about its
15 critical infrastructure needs.

16 FBC provides a summary of key themes in the Engagement Summary Report in Appendix D.

17 **2.2.1 Future Customer Engagement**

18 FBC will continue to monitor and assess its wildfire safety practices and risk areas and will evolve
19 its engagement activities and operational practices based on feedback and lessons learned from
20 previous seasons.

21 FBC is committed to ongoing engagement with customers, Indigenous communities, and
22 stakeholders as it continues to refine and evolve its PSPS policy and wildfire safety practices.

23 **2.3 STRATEGIC GOALS FOR 2026 ENGAGEMENT**

24 In 2026, FBC's goal is to continue to engage with communities that could be affected by PSPS
25 events to strengthen awareness and preparedness. The engagement activities planned for 2026
26 will include continuing to share information with communities and reviewing the notification
27 process and materials for possible changes. A key focus will be on educating customers about
28 the potential for PSPS events and encouraging them to prepare for potential power outages,
29 regardless of the cause.

30 FBC's engagement activities are focused on:

- 31 • Building trust and resilience in communities where the PSPS policy applies and may be
32 directly affected by PSPS events;
- 33 • Ensuring clear, inclusive, and proactive communication;
- 34 • Strengthening awareness and preparedness;
- 35 • Close collaboration with local governments, First Nations and emergency officials;

1 • Reinforcing messaging for communities where the PSPS policy applies; and
2 • Helping to improve notification processes, including for vulnerable and hard-to-reach
3 customers.

4 **3. PSPS EVENTS DURING THE 2025 WILDFIRE SEASON**

5 In Appendix A of the PSPS Decision, the BCUC directed FBC to provide a summary of all PSPS
6 events that occurred during the 2025 Wildfire Season, if any, including:

7 a. The number of times each PSPS stage was initiated including an overview of the weather
8 conditions in each case.
9 b. A description of alternative measures considered in each case, with rationale as to why
10 they were not viable.
11 c. The total number of customers impacted.
12 d. A description of areas impacted.
13 e. The average outage duration (hours).
14 f. The average outage restoration time (hours) and a discussion on the re-energization
15 process.
16 g. A description of communication with key, local stakeholders.
17 h. A description of when impacted parties were notified in accordance with the policy,
18 including a description of the process by which vulnerable customers were notified

19 **3.1 SUMMARY OF PSPS EVENTS**

20 During the 2025 Wildfire Season, the threshold weather conditions (Indices) that would trigger
21 initiation of a PSPS event (1. Sustained wind speeds in excess of 75 km/hour; and 2. A Fire
22 Weather Index (FWI) of greater than 47) did not occur, thus FBC did not initiate a PSPS event.

23 FBC has developed an event log, a sample of which is provided below in Table 1. This sample
24 event log shows the details that would be captured should a PSPS event be initiated.

25 **Table 1: Sample Event Log**

Event #	Date	Circuit	Notification			Conditions		No. Customers	Duration
			72 Hour	48 Hour	24 Hour	Imminent	Wind Speed		

1 **4. ASSESSMENT OF THE EFFICACY OF THE PSPS POLICY**

2 The BCUC directed FBC to provide an assessment as to the efficacy of the PSPS policy and a
3 discussion of any changes expected to the policy for the 2026 Wildfire Season and/or expansion
4 of its use.²

5 **4.1 ASSESSMENT OF THE PSPS POLICY**

6 While it was not necessary to initiate a PSPS event in 2025, FBC conducted an emergency
7 exercise to test the elements of the PSPS policy. The results of the emergency exercise did not
8 identify any conditions that necessitated modifications to the PSPS policy. FBC will continue to
9 hold emergency exercises which include PSPS events to ensure efficacy.

10 **4.2 CHANGES TO THE PSPS POLICY FOR THE 2026 WILDFIRE SEASON**

11 At this time, FBC has not proposed any changes to its PSPS policy and is not proposing to expand
12 the areas to which the PSPS policy applies. However, FBC is in the early stages of investigating
13 the addition of three distribution feeders, which could impact the areas to which the PSPS policy
14 applies. Consistent with Order G-154-25, FBC will conduct engagement with impacted parties
15 prior to expanding the area to which the PSPS policy applies. Further, in accordance with Order
16 G-154-25, FBC will file the revised version of the PSPS policy with the BCUC within 30 days.

17 **5. INDICES USED TO TRIGGER THE INITIATION OF THE PSPS
18 PROCESS**

19 In the PSPS Decision, Appendix A, the BCUC also directed FBC to provide a discussion on the
20 indices used to trigger the initiation of the PSPS process (i.e., the specific sustained wind speeds
21 and fire weather index) and an assessment as to whether these Indices continue to be appropriate
22 or whether FBC considers changes are necessary. The discussion should include an assessment
23 of weather events that did not trigger but were close to triggering the PSPS initiation steps.

24 **5.1 DISCUSSION OF INDICES**

25 The PSPS policy in place for the 2025 Wildfire Season was based on the following Indices which,
26 if met, would trigger the initiation of a PSPS event:

27 1. Sustained wind speeds in excess of 75 km/hour; and
28 2. A Fire Weather Index (FWI) of greater than 47.

29 The Indices were derived from a 10-year history of weather events in the FBC electric service
30 area. The sustained wind speed of 75 km/h is at the 95th percentile of sustained winds in the 10-

² PSPS Decision, Appendix A, item 4.

1 year period. The fire weather index of 47 is at the 95th percentile of fire weather index present at
2 fire starts in the service area over the same 10-year period. FBC will continue to evaluate industry
3 practices and its own experience after each wildfire season to determine whether the continuation
4 or modification of the Indices is appropriate. Pursuant to Order G-154-25, should any changes to
5 the Indices in the PSPS policy be necessary, FBC will file the revised PSPS policy with the BCUC
6 within 30 days of any amendments being made.

7 During the 2025 Wildfire Season there was one wind warning weather event which occurred in
8 the South Okanagan on July 14, 2025. During this weather event, three of the feeders covered
9 under the PSPS policy experienced an FWI approaching the PSPS policy threshold; however,
10 the sustained wind speeds were not near the threshold to initiate a PSPS event. Although a PSPS
11 event was not initiated, there were electric service outages recorded on these feeders as a result
12 of this weather event. The following table provides the details of the weather event on those three
13 feeders for information purposes.

14 **Table 2: 2025 Weather Events Approaching Indices for a PSPS Event to be Initiated**

Event Details	Feeder	FWI	Wind Speed	Outage Time/Duration	PSPS Activated	LAT	LONG	Outage Case
Strong winds that may cause damage are expected or occurring. Strong winds are expected. Where: South Okanagan - including Penticton and Osoyoos. When: This afternoon. Remarks: Strong northerly winds of 70 gusting to 90 km/h are expected to develop this afternoon. These strong winds will gradually ease later in the day.	PRI2	27-37	11-12	11:47 - 6 hours	No	49.54946	-120.76	28678
	PRI4	29-36	14-15	11:38 - 5.8 hours	No	49.61977	-120.362	28680
	KET1	42-49	10-15	13:34 - 8.5 hours	No	49.17216	-118.977	28686

15

16 **6. LESSONS LEARNED FROM THE 2025 WILDFIRE SEASON**

17 Finally, in the PSPS Decision, Appendix A, the BCUC directed FBC to provide a discussion of the
18 lessons learned from the 2025 Wildfire Season, irrespective of initiation of a PSPS protocol or
19 event.

20 **6.1 LESSONS LEARNED**

21 In addition to the engagement lessons learned as discussed in Section 2.2 above, FBC identified
22 that improvements to its 24-hour weather monitoring systems to validate localized weather
23 forecasts would be beneficial. Therefore, FBC is evaluating and considering systems and process
24 improvements in order to better manage, evaluate, and support operational awareness and
25 validate the weather forecasts from Natural Resources Canada. Further, FBC plans to install
26 additional weather stations at various locations in its service area to ensure accuracy of weather

1 information when considering whether the conditions and Indices are met to determine if a PSPS
2 event should be initiated.

3 **7. CONCLUSION**

4 From FBC's perspective, the 2025 Wildfire Season was mild and it was not necessary to initiate
5 a PSPS event. FBC will continue to monitor and evaluate its wildfire safety practices and policies
6 and will consider evolving industry practices and its own experience after each wildfire season to
7 determine whether changes to its PSPS policy or an expansion to the applicable PSPS policy
8 area are required.

9

Appendix A-1
INDIGENOUS ENGAGEMENT LOG

Indigenous Engagement Log					
Date	Consultation Type	First Nations Community	External Representatives	FBC Representatives	Summary
25-Mar-25	Virtual Meeting	Upper Similkameen Indian Band	Family Support Coordinator and Emergency Management Coordinator	Community & Indigenous Relations Manager, Manager, Community & Indigenous Relations, Senior Project Manager	Meeting to discuss the PSPS project. Discussed potential issues, how we can assist, notifications.
26-Mar-25	E-Mail	Upper Similkameen Indian Band	Family Support Coordinator and Emergency Management Coordinator	Community & Indigenous Relations Manager	Followed up with the coordinators - sent a link to the FortisBC Emergency Response Plan and followed up on the Emergency Preparedness week BBQ they are hosting
3-Apr-25	E-Mail	Upper Similkameen Indian Band	Family Support Coordinator and Emergency Management Coordinator	Community & Indigenous Relations Manager	Sent a copy of website link to USIB now that the website is live.
14-Apr-25	In-Person Meeting	Lower Similkameen Indian Band	Chief, Band Manager and Communications & Emergency Program Coordinator	Community & Indigenous Relations Manager, Manager, Community & Indigenous Relations, Senior Project Manager	Meeting to discuss the PSPS project. Discussed potential issues, how we can assist, notifications. Invite to the open houses, as well as identifying critical infrastructure in their community.
15-Apr-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Community & Indigenous Relations Manager	Followed up with coordinator and sent him a link to the FortisBC Emergency Response Plan and the PSPS website
2-May-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Community & Indigenous Relations Manager	Sent a copy of our open house information to share with the staff and their community.
2-May-25	E-Mail	Upper Similkameen Indian Band	Family Support Coordinator and Emergency Management Coordinator	Community & Indigenous Relations Manager	Sent a copy of our open house information to share with the staff and their community.
2-May-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Community & Indigenous Relations Manager	Shared the virtual open house link with him for his community members who are not able to attend in person on May 15 in Keremeos.
2-May-25	Phone Call	Upper Similkameen Indian Band	Emergency Management Coordinator	Community & Indigenous Relations Manager	Received a phone call and email from the coordinator inviting FortisBC to their Emergency Preparedness BBQ on May 9. FEI sent multiple donation items to the USIB for the BBQ.
5-May-25	E-Mail	First Nations Health Authority	Executive Director Public Health Response	Community & Indigenous Relations Manager	Received an email from the executive director about the First Nations engagement prior to the launch of the project. We responded that we have engaged with the nations impacted by the project and extended an invite to meet with the Interior chapter of the FNHA.
7-May-25	E-Mail	Lower Similkameen Indian Band	Chief	Manager, Community & Indigenous Relations	Received an email from Chief about a follow up meeting with the community on June 5. Replied with an alternative date.
13-May-25	E-Mail	Upper Similkameen Indian Band	Family Support Coordinator	Community & Indigenous Relations Manager	Sent email regarding the BCUC direction and the postponement of the open houses to early June.
13-May-25	E-Mail	Upper Similkameen Indian Band	Chief	Manager, Community & Indigenous Relations	PSPS update email
13-May-25	E-Mail	Lower Similkameen Indian Band	Chief	Manager, Community & Indigenous Relations	PSPS update email
13-May-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Community & Indigenous Relations Manager	Sent email regarding the BCUC direction and the postponement of the open houses to early June. Received an email back from the coordinator and he will be forwarding on the information with Chief and Council.
14-May-25	Letter	Lower Similkameen Indian Band	Chief	Community & Indigenous Relations Manager, Manager, Community & Indigenous Relations, Senior Project Manager	Received a letter of concern from LSIB, outlining to stop implementation of PSPS and to continue with Indigenous engagement.
15-May-25	E-Mail	Upper Similkameen Indian Band	Director of Operations	Manager, Community & Indigenous Relations and Community & Indigenous Relations Manager	Received a response to our email.
20-May-25	E-Mail	Lower Similkameen Indian Band	Chief and Communications & Emergency Program Coordinator	Manager, Community & Indigenous Relations	Sent out an PSPS policy update letter along with notification of the BCUC filing. Also asked for a follow up meeting and more information around their critical assets.
20-May-25	E-Mail	Upper Similkameen Indian Band	Director of Operations, Family Support Coordinator and Emergency Management Coordinator	Manager, Community & Indigenous Relations	Sent out an PSPS policy update letter along with notification of the BCUC filing. Also asked for a follow up meeting and more information around their critical assets.
22-May-25	E-Mail	Lower Similkameen Indian Band	Chief and Communications & Emergency Program Coordinator	Manager, Community & Indigenous Relations	Sent out a PSPS policy notification on the BCUC Order
22-May-25	E-Mail	Upper Similkameen Indian Band	Director of Operations, Family Support Coordinator and Emergency Management Coordinator	Manager, Community & Indigenous Relations	Sent out a PSPS policy notification on the BCUC Order
28-May-25	E-Mail	First Nations Health Authority	Executive Director Public Health Response	Community & Indigenous Relations Manager	Sent a follow up email to the email on May 5, regarding a meeting to discuss PSPS further.
6-Jun-25	E-Mail	Upper Similkameen Indian Band	Director of Operations, Family Support Coordinator and Emergency Management Coordinator	Manager, Community & Indigenous Relations	Sent out a follow up email and requested a meeting to discuss the PSPS project updates.

Indigenous Engagement Log					
Date	Consultation Type	First Nations Community	External Representatives	FBC Representatives	Summary
7-Jun-25	Virtual Meeting	Lower Similkameen Indian Band	Chief	Community & Indigenous Relations Manager, Manager, Community & Indigenous Relations, Senior Project Manager, Manager, Emergency Mgmt	Meeting with the Chief and Council to update on the PSPS policy
9-Jun-25	E-Mail	Upper Similkameen Indian Band	Director of Operations, Family Support Coordinator and Emergency Management Coordinator	Manager, Community & Indigenous Relations	Received an email from USIB about their opposition to the PSPS policy and asking for generators for each of their community members.
17-Jun-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Manager, Community & Indigenous Relations and Community & Indigenous Relations Manager	Received an email from the coordinator about the letter to the Minister and asking for a copy to share with Chief and Council.
3-Jul-25	E-Mail	Upper Similkameen Indian Band	Director of Operations	Manager, Community & Indigenous Relations and Community & Indigenous Relations Manager	Received an email to meet on July 29 and present to Chief and Council. FBC accepted the invitation and also sent back information about the PSPS policy via the information sheet.
3-Jul-25	E-Mail	Lower Similkameen Indian Band	Communications & Emergency Program Coordinator	Manager, Community & Indigenous Relations and Community & Indigenous Relations Manager	Responded to the coordinators email about the letter to the Minister regarding emergency funding for local government and First Nations, in the event of a PSPS activation
29-Jul-25	Virtual Meeting	Upper Similkameen Indian Band	Director of Operations, Family Support Coordinator and Emergency Management Coordinator	Community & Indigenous Relations Manager, Manager, Community & Indigenous Relations, Senior Project Manager, Manager, Emergency Mgmt	Presentation to Chief and Council on the PSPS policy. Follow up to send a copy of the letter from Minister to USIB Chief.
31-Jul-25	E-Mail	Upper Similkameen Indian Band	Director of Operations	Manager, Community & Indigenous Relations and Community & Indigenous Relations Manager	Sent a follow up email to the director which included a copy of the letter FBC sent to Minister. USIB will be sending a letter of support to the Minister. CIR to follow up with coordinator regarding open house in Hedley in mid October.

PSPS SURVEY RESULTS

Public Safety Power Shutoff Survey

Date: June 26, 2025

Content

1	Methodology	3
4	Key Findings	5
3	Detailed Results	7
4	Respondent Profile	18

Methodology

Methodology

Online survey of n=400 BC Southern Interior residents (consisting of the Okanagan-Similkameen and Kootenay regions), aged 18 years or older, using Leger's LEO panel. Quotas were in place to ensure a demographically representative sample that aligns with Statistics Canada census proportions.

When

Data collection occurred from June 16–22, 2025.

Margin of Error

Since data collection was conducted with non-probability sampling, a margin of error is not reported. For comparison purposes, a probability sample of n=400 yields a margin of error no greater than $\pm 4.9\%$ (19 times out of 20) for the total BC Southern Interior sample.

Weighting

Results were weighted by **age, gender, and region** according to 2021 Canada Census proportions in order to ensure a representative sample of the population of the BC Southern Interior area.

Methodology

Significant Differences

Data in **green** / **red** indicate a significantly **higher** / **lower** proportion than that among the rest of the respondent group.

Rounded Data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

Key Findings

Key Findings

Residents of the Okanagan-Similkameen and Kootenay regions are concerned about the threat of wildfires and feel related power safety measures are important. Many support proactive actions by utilities, such as power shutoffs during high wildfire risk periods and taking steps to prevent infrastructure from becoming an ignition source. However, preparedness levels for power outages are mixed, especially among specific demographic groups, highlighting an opportunity for targeted engagement and education.

High Concern About Wildfire Risk: More than half of residents are concerned about wildfire danger in their area, especially women and older individuals.

Conditional Support for Power Shutoffs: Most residents support preventative power shutoffs during wildfire threats, especially those who feel prepared.

Strong Value on Community Preparedness: Nearly eight in ten residents see community readiness for long power outages as important, with little disagreement across demographics.

Expectation for Utility-Led Fire Prevention: A large majority want utility companies to help prevent wildfires through infrastructure safety efforts, particularly emphasized by women.

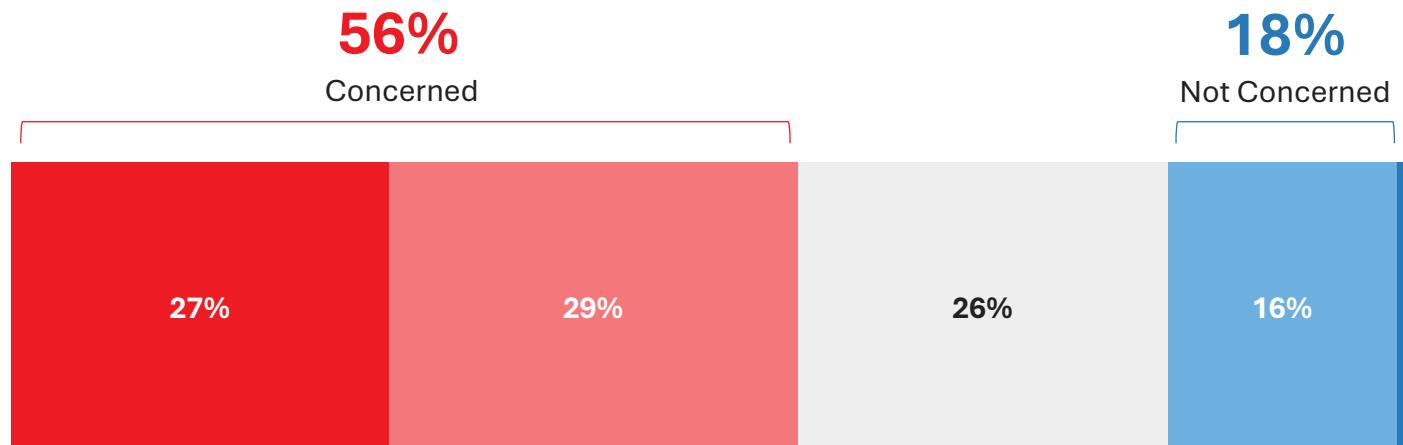

Split in Emergency Preparedness: Residents are split on how prepared they feel for extended outages or emergencies, with women and those in the Okanagan-Similkameen region feeling less equipped.

Detailed Results

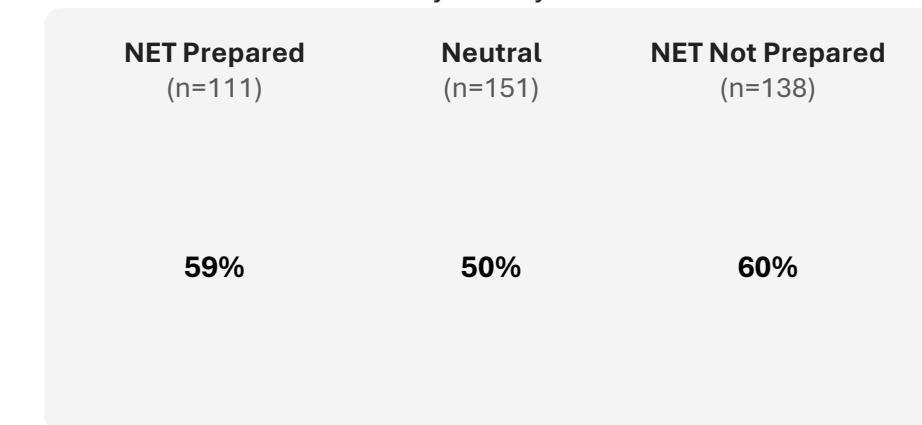

Concern About Local Wildfire Risk

Among residents living in the BC's Southern Interior, over half (56%) are extremely or very concerned about the risk of wildfires in their area; 8 in 10 (82%) are moderately to extremely concerned (ratings of 3 to 5 on a scale of 5). There is no difference in high concern about wildfire risk among those who feel prepared (59%) vs. unprepared (60%) for power outages or emergencies.

■ 5-Extremely concerned ■ 4-Very concerned ■ 3-Moderately concerned ■ 2-Slightly concerned ■ 1-Not at all concerned

Q1. How concerned are you about the risk of wildfires in your area?

Base: All respondents

Support for Power Shutoffs During Wildfire Threats

Six in ten (60%) BC Southern Interior residents support power shutoffs during extreme wildfire threats to reduce the risk of wildfires to communities. Those who feel prepared for power outages or emergencies are more likely to support power shutoffs during wildfire threats (73% vs. 44% not prepared).

FBC LETTER TO MINISTER GREENE, DATED JULY 2, 2025

Doug Slater
Vice President
Indigenous Relations and Regulatory Affairs

16705 Fraser Highway
Surrey, BC V4N 0E8
Tel: 778-578-3874
E-mail: doug.slater@fortisbc.com
www.fortisbc.com

July 2nd, 2025

Minister Kelly Greene
Ministry of Emergency Management & Climate Readiness
PO Box 9020 Stn Prov Govt
Victoria, BC
V8W 9E2

sent via email: EMCR.Minister@gov.bc.ca

Dear Minister Greene,

The safety of the public and our employees is FortisBC's number one priority, which is why we recently introduced a Public Safety Power Shutoff (PSPS) policy in recognition of the escalating effects of extreme weather within British Columbia, including within our electricity service area. The PSPS policy aims to reduce the risk of our activities or equipment igniting a wildfire, as well as the risk of wildfires impacting our infrastructure. PSPS is a new, preventative measure to help keep customers and the communities safe by proactively de-energizing certain powerlines to reduce potential ignition sources in the most extreme fire weather and wind conditions.

When there is an increased risk of wildfires in British Columbia's Southern Interior region, FortisBC always takes a number of steps to help reduce the potential risk and impact of wildfires and protect public safety. This includes year-round work maintaining our system, managing vegetation to keep trees and other vegetation from falling on or touching our power lines and other means to reduce wildfire risk. PSPS is an extension of these efforts and is meant to be a tool of last resort.

As part of our efforts to introduce the PSPS policy, FortisBC has been engaging with First Nations, local governments and communities. During that process, we heard concerns regarding the accessibility of provincial funding should a proactive power interruption become necessary. Specifically, the interruption of power on its own is not defined as an emergency under the current provincial legislation or regulation. As such, First Nations and local governments are concerned they would not be able to access provincial funding in a PSPS event.

Given the importance of this issue, I've asked my team to reach out to your staff to arrange a time to discuss in more detail.

Sincerely,

A handwritten signature in black ink that appears to read "DS".

Doug Slater
Vice President
Indigenous Relations and Regulatory Affairs

Appendix D
ENGAGEMENT SUMMARY REPORT

2025 Wildfire Safety

Local and Indigenous communities and provincial engagement

Agenda

- Overview and key takeaways
- Engagement and communications timeline
- Initial local government, First Nations and provincial engagement
- Public awareness and education
- Ongoing engagement
- Public opinion research results
- Key themes and feedback
- Next steps
- Q&A

fortisbc 3w

II ...

We're listening, and your input matters. We're introducing a Public Safety Power Shutoff (PSPS) policy to help reduce wildfire risks in extreme conditions. While PSPS events are expected to be rare and used only as a last resort, having a clear plan in place helps everyone be better prepared.

We're hosting open houses this June for residents to learn more, ask questions and share feedback – but there are many ways to get involved and stay informed.

Visit our website to learn more about all our wildfire safety practices, ask questions and stay up to date:

 Fortisbc.com

PSPS

Public Safety Power Shutoff (PSPS)

This is a new, preventative measure we're planning to introduce this wildfire season in response to the escalating effects of extreme weather, recent devastating wildfire activity and evolving industry practices.

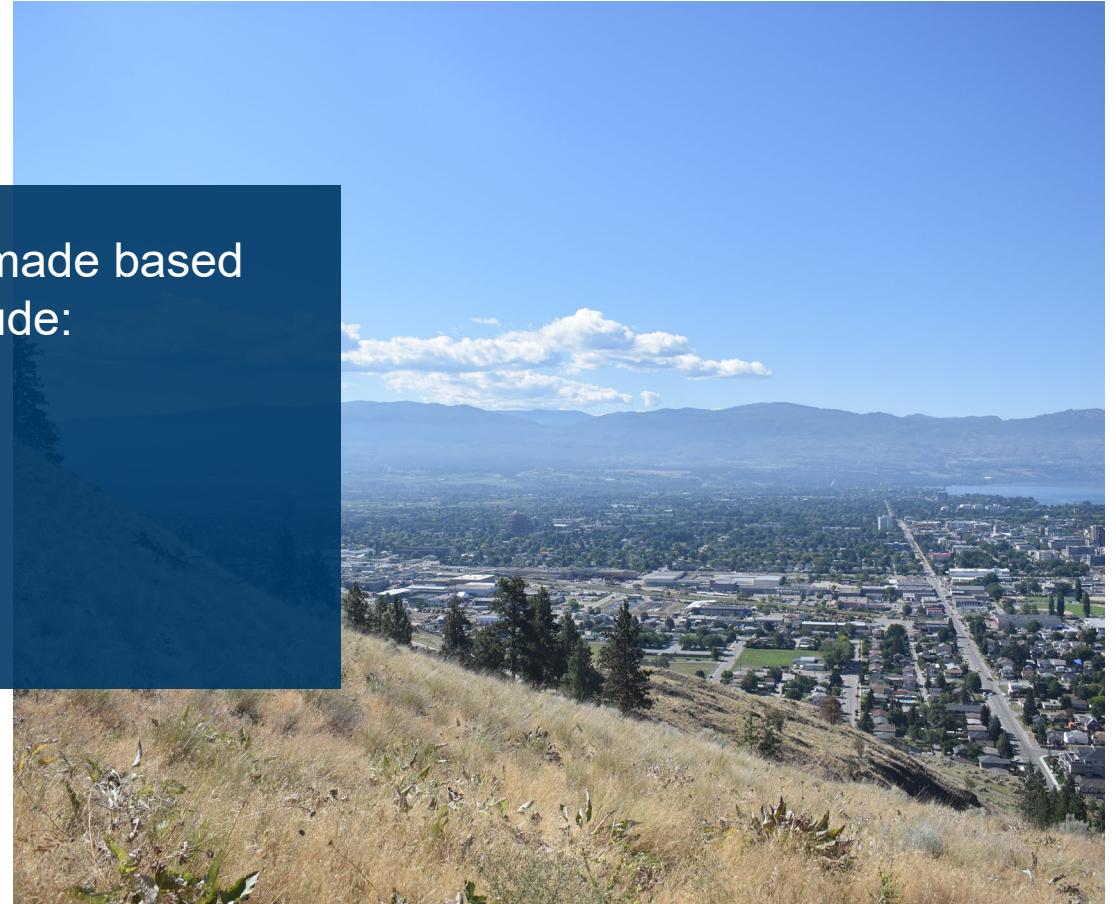

Extreme weather could result in a PSPS event

PSPS events are expected to be rare

The decision to implement a PSPS event will only be made based on a careful monitoring for fire risk conditions that include:

- a Fire Weather Index of 47 or more
- sustained wind speeds over 75 kilometres per hour

Overview and key takeaways

Since March of 2025, FortisBC engaged with local governments, First Nations, provincial officials and members of the public about its wildfire safety efforts, including the new Public Safety Power Shutoff (PSPS) policy.

Key takeaways:

- High level of concern from all engaged around general wildfire risk and general support for wildfire prevention measures
- General feeling of lack of preparedness for prolonged outages
- Concern about the rollout of the new PSPS policy, and the level of engagement on the policy itself
- Key audiences asked for additional information about the PSPS policy, including the criteria for initiating a PSPS event and potential support from the Provincial government
- Members of the public largely (60%) support preventative power shutoffs as a wildfire mitigation measure according to public opinion research conducted in these areas in June 2025

Engagement and communications timeline

Phase	March – April	May - June	July - September
Phase 1: Initial engagement Meetings with First Nations, local and provincial governments and community officials ahead of public announcement			
Phase 2: Public awareness Public awareness and education on wildfire safety and the PSPS policy			
Phase 3: PSPS activation notification Keeping people informed before, during and after a PSPS activation			

Phase 1: Initial local government, First Nations and provincial engagement

Prior to public engagement, FortisBC began reaching out to municipalities, First Nations and provincial officials to provide as much notice as possible, gather feedback and identify critical infrastructure.

From March to April, FortisBC held a total of 14 meetings and calls with:

- Princeton and Keremeos
- Upper Similkameen Indian Band
- Lower Similkameen Indian Band
- Regional District Okanagan Similkameen
- Regional District of Kootenay Boundary
- Interior Health
- MLAs and provincial ministries
- Other stakeholders

Phase 2: Public awareness and education

FortisBC undertook significant efforts to raise awareness around wildfire safety practices, the new PSPS policy and communicate opportunities to provide feedback. These efforts started in April and will continue through the end of September.

Notification methods:

- New wildfire safety web pages created and updated throughout, includes ways to sign-up for notifications and ask questions
- Digital, print and radio advertising; paid social media
- Direct mail and email to potentially impacted customers
- News release, media statements, opinion article and media interviews
- Ongoing organic social media
- Open house promotion in targeted areas

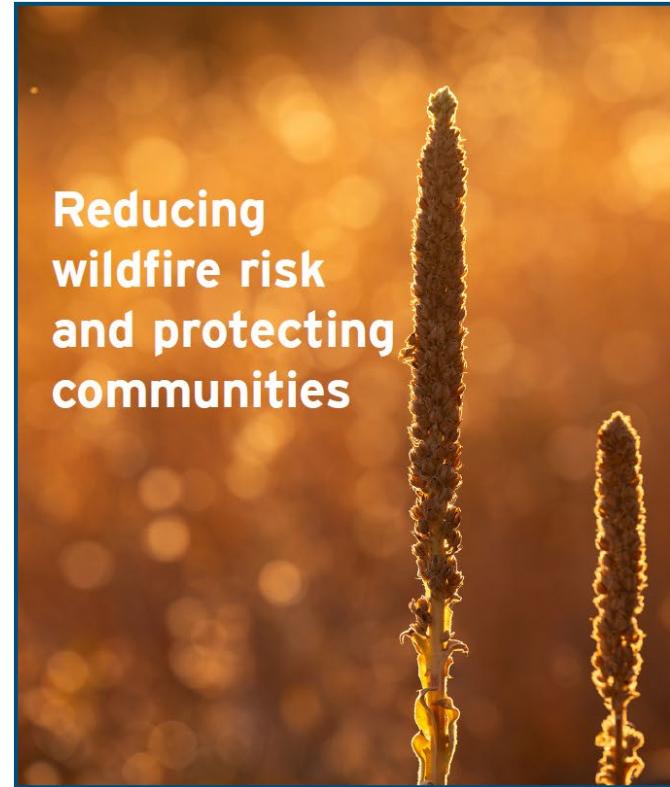

In-person open houses

FortisBC held three in-person community open houses between June 12 and June 19.

In total, there were 177+ attendees across all meetings.

- June 11 – Greenwood
 - **73 attendees**
- June 12 – Keremeos
 - **62 attendees**
- June 18 – Princeton
 - **42 attendees**

Let's talk wildfire safety and the electricity system

We're committed to keeping you informed and prepared this wildfire season. From online resources to in-person open houses, there are several ways you can learn about our wildfire safety practices, including the additional preventative measure, Public Safety Power Shutoff.

To learn more:

- Visit our website at fortisbc.com/wildfiresafety
- Submit a question to the online feedback form
- Join us in person at our upcoming open house

Date: June 11, 4 to 7 p.m.

Location: McArthur Centre, 1355 Veteran's Lane, Greenwood, B.C.

Contact us at **1-866-436-7847** to register as a vulnerable customer if you or your family depend on power for medical needs or critical infrastructure.

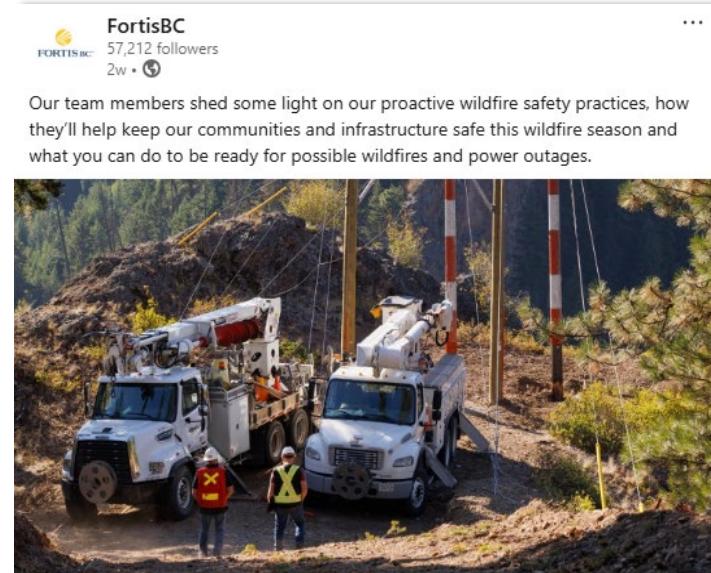

Social media posts and engagement: April 30 to July 21

Organic social posts - 28 posts

- Approximately 1,547 impressions per post and 118 engagements each
- Initial video was watched approximately 10,000 times in total across Facebook, LinkedIn, and Instagram

PSPS LinkedIn Energy exchange article:

- Nearly 9,000 article views
- Reached 3,372 LinkedIn members

Black Press Media has published a column by Michelle Carman, our vice-president of customer service and external communications, on why we're proposing a Public Safety Power Shutoff policy, a new tool in our ongoing efforts to help reduce wildfire risk and keep our customers and the communities we serve safe: https://lnkd.in/g2Qs_bp

Michelle Carman 2nd
Vice President, Customer Service and External Communications at F...

Many British Columbians have experienced the devastating impacts of wildfires. With the safety of the public and our employees as our top priority, **FortisBC** takes the risk of wildfires very seriously and works year-round to help keep our customers and the communities we serve safe.

We work hard to always to keep power flowing to our customers, but what if wildfire conditions became so extreme that temporarily shutting off power to sections of our system could help keep communities safe? In my opinion column for **Black Press Media**, I explore why we're proposing a new Public Safety Power Shutoff policy as a last resort tool to help reduce wildfire risks in extreme conditions.

COLUMN: Power policy created for wildfire season
kelownacapnews.com

Black Press op-ed repost received:

- 5,000 impressions
- 102 engagements

Online engagement

The screenshot shows the FORTIS BC website with a dark blue header. The header includes the FORTIS BC logo, navigation links for 'Electricity outages', 'Smell gas', 'Contact', and 'Search', and a main menu with 'Accounts', 'Energy services', 'Rebates & energy savings', 'Build & renovate', 'Safety' (which is underlined in yellow), 'Community', and 'Sustainability'. The main content area has a light blue background. On the left, a sidebar under the 'Safety' heading lists: 'Click or call before you dig', 'Energy safety', 'Preparing for emergencies', 'Wildfire safety practices', 'Public Safety Power Shutoffs' (which is highlighted with a yellow border), 'Top questions about our wildfire safety practices', and 'Wildfires and evacuations'. The main content title is 'Public Safety Power Shutoffs'. Below the title, a paragraph explains the purpose of a PSPS policy. A section titled 'What is a PSPS event?' contains two paragraphs: one about the preventative measure and another about it being a tool of last resort.

As of the end of August:

- Approximately 6,400 page views from 4,000 users across three pages
- High engagement – average time is seven to over nine minutes per page
- Question with most views: How far in advance of a power shut off would you notify customers?

Ongoing engagement

In response to concerns following the initial public engagement, FortisBC postponed the open houses originally set for May, and continued to engage with municipalities and First Nations to provide more information and address concerns.

From May through August, FortisBC **held 7 additional meetings with:**

- Lower Similkameen Indian Band
- Keremeos and Midway
- Interior Health
- Members of the Legislative Assembly
- Other stakeholders

The Minister of EMCR was engaged to share feedback that called for recognizing proactive power shutoffs as emergencies under provincial policy.

Ongoing direct public engagement

FortisBC continued significant efforts to engage directly with members of the community to answer questions and listen to their feedback.

Engagement methods:

- Webpage with comment form
- Three open houses; two more planned for fall
- Printed feedback forms
- Public email address
- Public opinion research
- Rock Creek Fall Fair booth

Public feedback opportunities

Members of the public provided questions and feedback to FortisBC via a number of direct methods including:

- **27** feedback forms from open houses
- **15** emails
- **29** webform completions
- **51** calls to customer service
- **21** letters
- **22** social media responses
- **Approximately 60** letters of comment as part of the BCUC process

Key themes and feedback

Feedback themes

Across all forms of feedback from stakeholder meetings, open houses and website form entries, the top 11 key themes included:

1. Wildfire risk and prevention (80 mentions)

- Concerns about the criteria for initiating PSPS events, how frequently this could occur, and whether FortisBC is prioritizing vegetation management and other fire prevention strategies.

2. Policy and implementation (78 mentions)

- Feedback on the timing, rollout, and transparency of the PSPS policy, including questions about fairness in how areas were selected.

3. Safety and crime (43 mentions)

- Concerns about increased risks during outages, including fire hazards from generators, property crime, and challenges with emergency response and evacuation.

Feedback Themes

4. Communication (27 mentions)

- Frustration over inadequate information and suggestions for improving notifications, especially in rural areas with limited connectivity.

5. Generators and backup power (26 mentions)

- Issues related to affordability, safety, and practicality of using generators, especially for low-income or elderly residents.

6. Infrastructure and maintenance (26 mentions)

- Calls for better maintenance of power lines, more switches to isolate outages, and investment in infrastructure improvements like undergrounding.

7. Water and wells (24 mentions)

- Concerns from residents who rely on electric pumps for water access, especially for livestock, fire protection and daily needs.

Feedback themes

8. Food and Refrigeration (21 mentions)

- Worries about food spoilage during outages and the financial burden of replacing lost groceries.

9. Vulnerable Populations (19 mentions)

- Concerns about the impact of outages on seniors, people with disabilities, and those dependent on medical equipment.

10. Technology and Notification Systems (19 mentions)

- Questions about how people will receive alerts and updates during outages when internet and cell service may be unavailable.

11. Wildfire Prevention Assessment (1 mention)

- Concerns about the lack of provincial funding for planned outages, forcing local governments, First Nations, and businesses to cover costs or seek provincial support.

Public support for wildfire prevention

YouTube video thumbnail showing a woman with long brown hair wearing a straw cowboy hat with a blue band. She is looking directly at the camera with a slight smile. The video is titled "Re: Angry Responses to Fortis BC's PSPS Announcement".

No description has been added to this video.

"We are sitting on a powder keg in a tinder box. It only will take one tree to fall on one power line to burn down this entire area.

And if you live out here, you know this. Okay?

So instead of being upset with Fortis because they're going to be inconveniencing you, how about look at it from the perspective of, hey, that's actually really smart."

Public opinion research

Between June 16 and 22, FortisBC commissioned third-party research to better understand the views and interests of the public on the topic of wildfire safety and FortisBC's PSPS policy.

The research included:

- Online survey of 400 British Columbians from the Okanagan-Similkameen and Kootenay regions
- Results were weighted by age, gender and region according to the 2021 Canada Census to ensure a representative sample

Public Safety
Power Shutoff **Survey**

Date: June 26, 2025

Feedback – public opinion research results

High concern about wildfire risk: More than half of residents are concerned about wildfire danger in their area, especially women and older individuals

Conditional support for power shutoffs: Most residents support preventative power shutoffs during wildfire threats, especially those who feel prepared.

Strong value on community preparedness: Nearly eight in ten residents see community readiness for long power outages as important, with little disagreement across demographics.

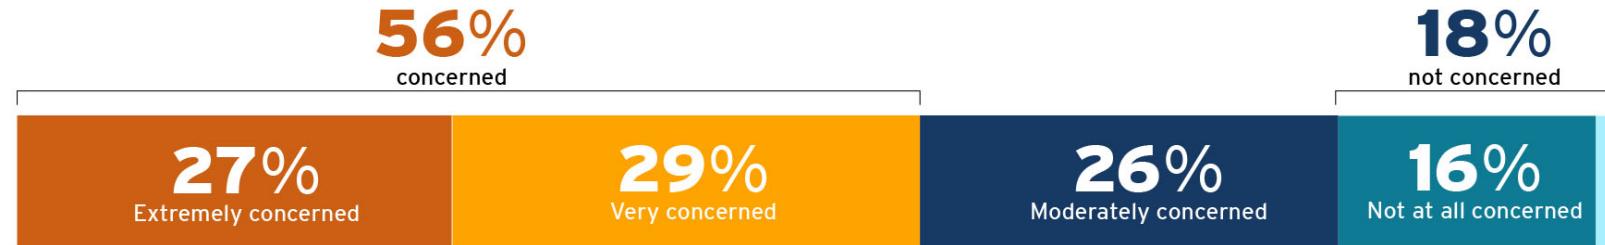

Expectation for utility-led fire prevention: A large majority want utility companies to help prevent wildfires through infrastructure safety efforts, particularly emphasized by women.

Split in emergency preparedness: Residents are split on how prepared they feel for extended outages of emergencies, with women and those in the Okanagan-Similkameen region feeling less equipped.

Feedback – Public opinion research results

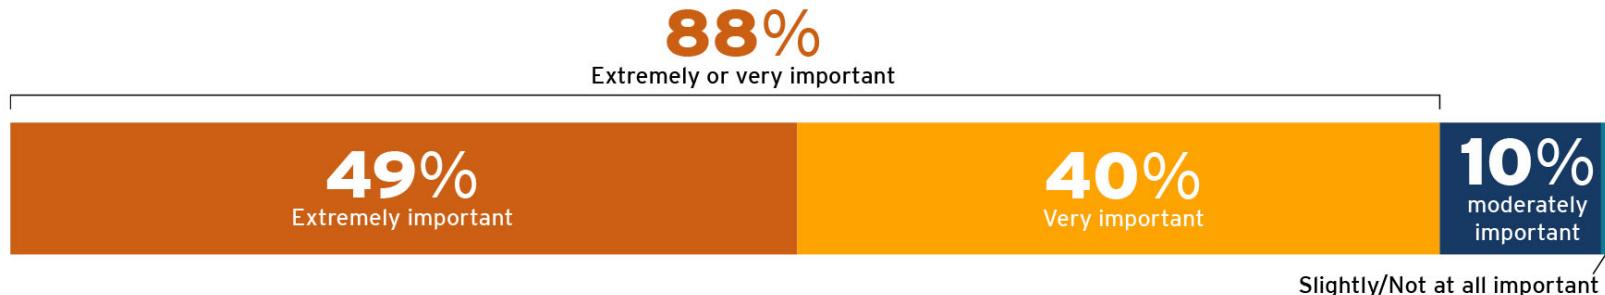

Concern about local wildfire risk

Support for PSPS as a proactive measure

Importance of utilities taking action to prevent wildfires

Next steps

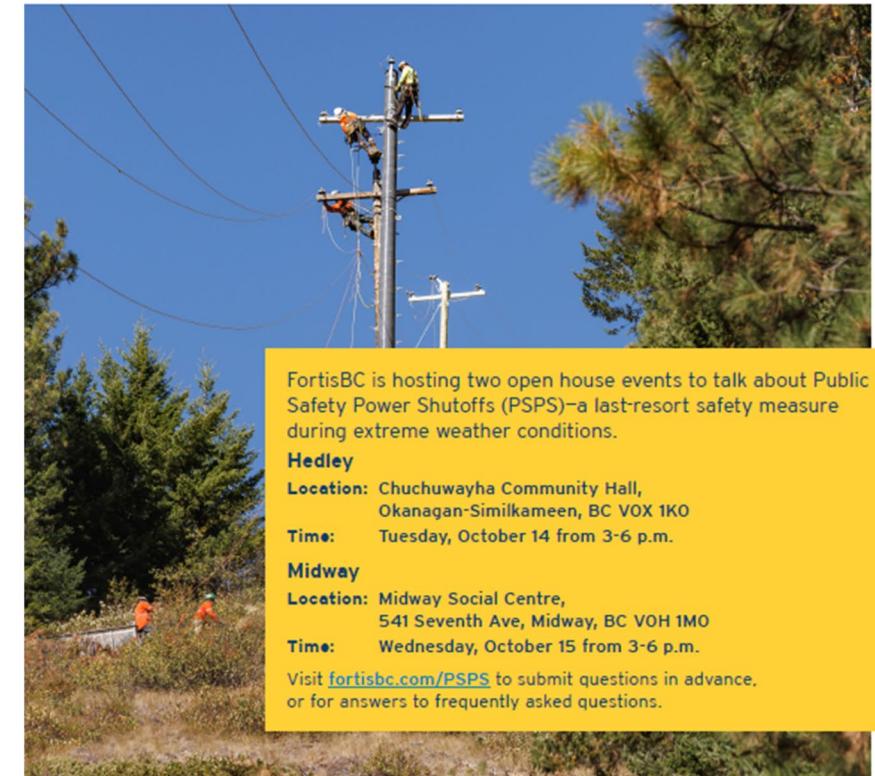

FortisBC will continue to engage with customers and members of the public to raise awareness about wildfire safety and its PSPS policy.

This includes:

- ongoing paid advertising
- direct mail to potentially affected customers
- two additional open houses are scheduled for the fall in Midway and Hedley

Want to learn how power shutoffs help protect our community from wildfires?

FortisBC is hosting two open house events to talk about Public Safety Power Shutoffs (PSPS)—a last-resort safety measure during extreme weather conditions.

Hedley

Location: Chuchuwahya Community Hall,
Okanagan-Similkameen, BC V0X 1K0
Time: Tuesday, October 14 from 3-6 p.m.

Midway

Location: Midway Social Centre,
541 Seventh Ave, Midway, BC V0H 1M0
Time: Wednesday, October 15 from 3-6 p.m.

Visit fortisbc.com/PSPS to submit questions in advance, or for answers to frequently asked questions.

Connect with us @fortisbc

Continuous wildfire mitigation

- FortisBC continues to closely monitor wildfire conditions and assess which areas are at greatest risk
- We continue to mitigate for wildfire risks year-round through a number of operational practices
- We will continue to evolve these practices to help protect your communities, applying the learnings and feedback from prior seasons

Q&A

Thank you
