Attention: Mr. Patrick Wruck, Commission Secretary and Manager, Regulatory Support

Dear Mr. Wruck:

Re: FortisBC Energy Inc. (FEI or the Company)
2018 Biomethane Variance Account (BVA) Status Report

The attached materials provide the FEI 2018 BVA Status Report (2018 Status Report). The 2018 Status Report includes explanations of major variances from forecast for gas costs incurred and gas costs recovered.

The 2018 pre-tax result of the BVA activities amounted to a variance of \$1,629,000, after adjustment for unsold biomethane (Tab 1, Page 1, Column 4, Line 15). The net of tax account balance at December 31, 2018, after adjustment for unsold biomethane but before any transfer to the BVA Rate Rider Account, was \$2,702,300 deficit (Tab 1, Page 1, Column 2, Line 25); after transfer of the BVA net of tax deficit amount of \$2,702,300 (Tab 1, Page 1, Column 2, Line 27) to the BVA Rate Rider Account, the year end BVA balance was zero (Tab 1, Page 1, Column 2, Line 29).

In 2018 the RNG program experienced growth in sales over and above available biomethane supply. As a result, at the end of 2018 the BVA biomethane inventory was negative. FEI purchase carbon offsets, along with a matching quantity of conventional natural gas to balance the ending inventory balance to zero. FEI will continue to monitor the biomethane inventory and, if required, purchase carbon offsets along with conventional natural gas to avoid supply shortfalls.

FEI requests the information contained within Pages 3 and 3.1 to be treated as CONFIDENTIAL.

CONFIDENTIALITY

FEI is requesting that this information be filed on a confidential basis pursuant to section 18 of the Commission's Rules of Practice and Procedure regarding confidential documents, established by Order G-1-16, and Section 71(5) of the *Utilities Commission Act* and requests that the Commission exercise its discretion under Section 6.0 of the Rules for Natural Gas Energy Supply Contracts and allow these documents to remain confidential. FEI believes this will ensure that market sensitive information is protected, and FEI's ability to obtain favourable commercial terms for future gas contracting is not impaired.

In this regard, FEI further believes that the Core Market could be disadvantaged and may well shoulder incremental costs if utility gas supply procurement strategies as well as contracts are treated in a different manner than those of other gas purchasers, and believes that since it continues to operate within a competitive environment, there is no necessity for public disclosure and risk prejudice or influence in the negotiations or renegotiation of subsequent contracts.

All of which is respectfully submitted. If you have any questions related to the attached report, please contact Scott Gramm at 604-576-7242

Sincerely,

FORTISBC ENERGY INC.

FOR THE YEAR ENDED DECEMBER 31, 2018

Notes:

- (a) The annual forecast amounts referenced in the report are defined as the aggregate of the forecasts used in the BVA reports listed below.
 January-May 2018 forecasts from the 2017 BVA Annual Report.
 June-December 2018 forecasts from the Annual Review for 2019 Rates.

- (b) Recorded opening balance reconciles to the December 31, 2017 balance in the FortisBC Energy Inc. 2017 BVA Status Report filed on April 30, 2018.
 Forecast opening balance as per the 2017 BVA Annual Report.

Variance Explanations:

(A) FortisBC Energy Inc. BERC rates in effect during 2018, and during adjacent periods, were as follows:

January 1, 2017	\$ 10.540 /GJ
January 1, 2018	\$ 10.039 /GJ
January 1, 2019	\$ 10.287 /GJ

Warmer than normal weather in November and December reduced demand for all the customer classes for those months. On/Off Systems & Other forecast included a new customer and the agreement was not approved until early 2019,

(B) Decrease in quantity due to lower than expected purchases and sales.

Notes:

(a) The change in the quantity of unsold biomethane (purchases less sales during the year), valued at the effective BERC rate. The BVA balance needs to be adjusted to reflect the value of the unsold biomethane in order to determine the BVA surplus/deficit related to the over/under recovery of costs at the current BERC rate.
