Attention: Ms. Marija Tresoglavic, Acting Commission Secretary

Dear Ms. Tresoglavic:

Re: FortisBC Energy Inc. (FEI) Fort Nelson Service Area (FEFN)

Application for Deferral Account Treatment for 2021 and Changes to the Revenue Stabilization Adjustment Mechanism (RSAM) Rider for the Fort Nelson Service Area (Application)

**Evidentiary Update** 

On November 6, 2020, FEI filed the above noted Application. In accordance with the British Columbia Utilities Commission (BCUC) Order G-316-20, FEI filed supplementary information on December 9, 2020 and its responses to BCUC Information Request (IR) No. 1 on January 14, 2021. As discussed in FEI's responses to BCUC IR No. 1, FEI is filing this Evidentiary Update for two items that result in amendments to the approvals sought in the Application:

- 1. As this proceeding has extended into 2021, FEI has updated its revenue forecast using 2020 preliminary actual¹ customer count and use rate data, which is now available. FEI is seeking approval to record the resulting revised forecast 2021 revenue surplus of \$132 thousand in the FEI Fort Nelson Revenue Surplus deferral account
- Using the 2020 preliminary actual data up to year-end, FEI has updated the Revenue Stabilization Adjustment Mechanism (RSAM) 2020 ending balance and rate rider amount for 2021 for FEFN. FEI is seeking approval of the updated RSAM rider, which is a refund of \$0.333/GJ.

An amended draft order reflecting the above items is provided in Appendix A. Revised 2020 and 2021 financial schedules are provided in Appendices B and C, respectively.

<sup>&</sup>lt;sup>1</sup> This data is preliminary in nature as it is subject to validation as FEI prepares its 2020 Annual Report for FEFN.

The updated forecast and RSAM rate rider are discussed in more detail below.

## **Forecast Update**

In the forecast provided in the Supplemental Information filed on December 9, 2020, FEI updated 2020 with actual data through October 2020. However, because FEI's demand forecast methods rely on complete years of actual data, the 2021 forecast continued to be based on actual data through the end of 2019. In addition, in the Supplemental Information, FEI updated the customer use rate and demand forecast for 2021 to account for the migration of the last RS 25 customer to RS 3.

As discussed in BCUC IR1 2.2, FEI now has 2020 preliminary actual customer count and use rate data and FEI has used this preliminary actual data to prepare a new customer, use rate and demand forecast for 2021<sup>2</sup>, following the methods outlined in Appendix A of the Supplemental Information.

FEI has included revised 2020 and 2021 financial schedules reflecting the updated forecast in Appendices B and C of this Evidentiary Update, respectively.

The following is a summary of the changes in the demand forecast in the Evidentiary Update compared to the forecast in the Supplemental Information filing:

- 2021 RS 1 UPC forecast is 3.3 GJs (2.6%) higher at 125.7 GJs per year;
- 2021 RS 1 demand forecast is 6.3 TJs (2.7%) higher at 235.3 TJs;
- 2021 RS 2 UPC forecast is 4.9 GJs (1.3%) lower at 370.3 GJs per year;
- 2021 RS 2 demand forecast is 8.2 TJs (4.9%) lower at 166.8 TJs;
- 2021 RS 3 UPC forecast is 1.15 TJs (22%) lower at 5.3 TJ per year; and
- 2021 RS 3 demand forecast is 6.7 TJs (7.4%) lower at 90.2 TJs.

Overall, the change in the 2021 demand forecast results in a decrease in the delivery revenue at existing rates when compared to the Supplemental Information filing. The revenue surplus decreased by \$33 thousand from the \$165 thousand shown on Schedule 1, Line 25 of Appendix D of the Supplemental Information to \$132 thousand as shown on Schedule 1 Line 25 of Appendix C of this Evidentiary Update.

FEI is seeking approval to record the revised forecast 2021 revenue surplus of \$132 thousand in the FEI Fort Nelson Revenue Surplus deferral account.

<sup>&</sup>lt;sup>2</sup> The demand forecast by rate schedule can be found in Appendix C, Schedule 13.

#### **RSAM Rate Rider**

In Section 4 of the Application, FEI included a calculation for Fort Nelson's 2021 RSAM rate rider. The rider was calculated based on a projection of the 2020 ending RSAM balance, using 2020 projected use rates and a forecast of demand in 2021. The 2020 use rates were a mix of actual and projected. The 2021 demand for each rate schedule is used as the denominator when calculating the rate rider.

As discussed in response to BCUC IR1 4.1, FEI has updated the 2021 demand using 2020 preliminary actual data, which results in an amended 2020 ending RSAM balance and an updated 2021 demand.

FEI provides an updated Table 5, 2021 RSAM Rider, below. FEI is seeking approval of the updated RSAM rider, which is a refund of \$0.333/GJ.
