Attention: Leigha Worth, Executive Director

Dear Leigha Worth:

Re: FortisBC Energy Inc. (FEI)

**Application for Acceptance of Demand Side Management (DSM) Expenditures
Plan for the Period Covering 2024 to 2027 (Application)**

**Response to the British Columbia Public Interest Advocacy Centre
representing the British Columbia Old Age Pensioners' Organization, Disability
Alliance BC, Active Support Against Poverty, Council of Senior Citizens'
Organizations of BC, Together Against Poverty Society, and the Tenant
Resource and Advisory Centre *et al.* (BCOAPO) Information Request (IR) No. 1**

On July 12, 2023, FEI filed the Application referenced above. In accordance with the regulatory timetable established in British Columbia Utilities Commission Order G-178-23A for the review of the Application, FEI respectfully submits the attached response to BCOAPO IR No. 1.

For convenience and efficiency, if FEI has provided an internet address for referenced reports instead of attaching the documents to its IR responses. FEI intends for the referenced documents to form part of its IR responses and the evidentiary record in this proceeding.

If further information is required, please contact Sarah Commander, Regulatory Projects Manager, at (250) 469-6081.

Sincerely,

FORTISBC ENERGY INC.

Original signed:

Sarah Walsh

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 1

1 **A. INTRODUCTION AND PROGRAM CHANGES**

2 **1.0 Reference: Exhibit B-2, Application, List of Appendices, page ii**

3 **Topic: DSM Changes Compared to Actual**

4 1.1 Please file a copy of the FEI 2022 Annual DSM Report for the purposes of this
5 proceeding. If not available, please explain why.

6

7 **Response:**

8 Please refer to Attachment 1.1 for a copy of FEI's 2022 Annual DSM Report.

9

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 2

1 **2.0 Reference: Exhibit B-2, Application, Section 1.1, page 1, Section 6.1, page 33**

2 **Topic: Factors Driving FEI's 2024-2027 DSM Plan**

3 Preamble: FEI states:

4 “Government focus on reducing greenhouse gas (GHG) emissions is an important
5 factor driving FEI's DSM Plan.” **(Application, page 1)**

6 “FEI's proposed DSM portfolio for 2024-2027 is cost effective, with a portfolio UCT
7 cost-effectiveness result of 2.1 based on the methodology set out in section 4 of
8 the DSM Regulation. A score of 2.1 passes the threshold of 1.0 at the portfolio
9 level, meaning the benefits from DSM to the avoided acquisition of renewable and
10 low-carbon gases exceed the Utility's incentive and administration cost for the
11 proposed DSM portfolio of programs.” **(Section 6.1, page 33)**

12 2.1 Please explain how the overall cost of the DSM resources factored into the
13 development of FEI's 2024-2027 DSM Plan. If overall cost was not factored into
14 the development of FEI's DSM Plan, please explain why.

15
16 **Response:**

17 FEI interprets the reference to “overall cost of the DSM resources” in the question to refer to the
18 total cost of DSM expenditures.

19 The total cost of DSM expenditures was not a primary factor in developing the DSM Plan.
20 Consistent with past DSM plans, FEI continues to pursue achievable DSM that is cost-effective
21 at a portfolio level. Total cost is an outcome of a bottom-up approach to forecast participation and
22 program expenditures based on program development and stakeholder engagement activities.

23
24

25
26 2.2 Please explain whether FEI views its overall 2024-2027 DSM Plan as ambitious,
27 moderate, neutral or conservative compared to its past plans as well as its 2022
28 LTGRP.

29
30 **Response:**

31 FEI views its 2024-2027 DSM Plan expenditures to be moderate in comparison to past DSM
32 Plans, with an approximately 10 percent increase in the Plan's average annual expenditures
33 compared to the 2023 DSM Plan.

34 The DSM Plan incorporates an accelerated transition of advanced DSM measures including
35 changes to program incentives and investment in innovative technology pilot projects compared

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 3

1 to what was considered in the 2022 LTGRP DSM analysis. The remaining programs reflect a
2 similar level of achievement as past DSM Plans, targeting a high adoption of DSM.

3 It is more challenging to qualitatively compare the 2024-2027 DSM Plan to the 2022 LTGRP.
4 However, the Plan achieves similar savings as the Medium DSM Setting. Please also refer to
5 Section 5.3 of the Application which explains the differences between the 2024-2027 DSM Plan
6 and 2022 LTGRP.

7
8

9
10 2.3 Please explain which individual changes to FEI's 2024-2027 DSM Plan relative to
11 the 2023 DSM Plan FEI views as being more ambitious, more moderate, more
12 conservative and which changes are relatively neutral.

13
14

Response:

15 Please refer to the response to BCOAPO IR1 2.2.

16
17

18
19 2.4 Considering the overall cost effectiveness result of 2.1 of FEI's 2024-2027 DSM
20 Plan, please identify and explain whether there are additional opportunities to
21 increase the savings in each of the years of the Plan. As part of the response,
22 please explain why FEI elected not to pursue additional opportunities.

23
24

Response:

25 The DSM Plan proposes a significant shift away from conventional gas DSM to advanced DSM,
26 and FEI believes it properly balances cost-effectiveness, achievability, and savings.

27 Please refer to the response to BCOAPO IR1 6.2 which explains that there will be very limited
28 opportunities to introduce new measures not already under consideration in the DSM Plan. Thus,
29 the main mechanism to increase savings would be by increasing participation for
30 programs/measures already included in the DSM Plan by providing higher incentives or additional
31 supports. FEI's incentive levels were developed based on stakeholder feedback, historical
32 program trends, and screened for cost-effectiveness. FEI expects that significant increases in
33 incentive levels would see diminishing returns for participation rates and associated savings,
34 increasing the free-ridership of programs. FEI does not view that trade-off as being in the best
35 interest of customers.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 4

1 Through consultation with stakeholders, FEI identified additional opportunities for increasing
2 savings and incorporated those opportunities into the DSM Plan. Please refer to Table 4-1 of the
3 Application which summarizes the key feedback FEI received regarding drafts of the 2024-2027
4 DSM Plan and how FEI incorporated the feedback into the final DSM Plan submitted for
5 acceptance by the BCUC. Changes that resulted in increased savings are as follows:

- 6 • Added additional supports for pipe and tank insulation retrofits and steam trap audit and
7 maintenance in the Industrial Program Area.
- 8 • Added new Indigenous Strategic Energy Management program.
- 9 • Added new hydronic hybrid support in the Commercial Program Area.
- 10 • Further increased incentives for building envelope retrofits in the Residential and
11 Commercial program areas.

12 Should FEI identify additional opportunities during the DSM Plan period that cannot be
13 incorporated into existing program offerings, FEI will consider submitting a supplemental
14 application to the BCUC to support those opportunities.

15
16

17
18 2.5 Please describe the methodology FEI employed in assessing the reasonability of
19 cost allocation between Program Areas as part of its 2024-2027 DSM Plan.

20
21 **Response:**

22 The total expenditures for the 2024-2027 DSM Plan were developed from a bottom-up forecast
23 of the DSM programs, which were then incorporated into the applicable program areas. In
24 preparing the DSM Plan, FEI considered the balance of expenditures by customer segment from
25 a universal access guiding principle; however, this did not guide the allocation and forecasting of
26 expenditures. The expenditures, savings, and cost-effectiveness forecast for the DSM Plan are a
27 direct outcome of the sum of individual program development and stakeholder engagement
28 activities.

29 The portfolio Utility Cost Test (UCT) of 2.1 supports the DSM Plan's compliance with the amended
30 DSM Regulation's cost-effectiveness requirements and is, therefore, reasonable and appropriate.
31 Notwithstanding the removal of conventional measures and the proposed acceleration of
32 advanced DSM measures, the DSM Plan continues to meet and align with the 2022 LTGRP
33 Medium DSM setting for savings (discussed further in the response to RCIA IR1 15.2), supporting
34 FEI's view that the Plan continues to incentivize activities to achieve long-term gas savings, while
35 fostering market adoption of advanced DSM measures.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 5

1 There is no quantitative metric available to determine whether a DSM Plan is optimal, whether in
2 isolation or in the context of the 2022 LTGRP. FEI considers that a cost-effective portfolio of
3 measures, based on stakeholder feedback, with offers available to all customer segments,
4 represents a DSM Plan that is in the best interest of FEI's customers.

5
6

7

8 2.6 Does FEI's 2024-2027 DSM Plan result from a bottom-up or a top-down
9 forecast/approach of specific DSM programs?

10

11 **Response:**

12 Please refer to the response to BCOAPO IR1 2.5.

13

14

15

16 2.7 Please explain how FEI assessed the overall reasonability of its proposed 2024-
17 2027 DSM Plan from a top-down perspective. As part of the response, please
18 explain how FEI assessed that the suite of DSM offerings and overall expenditures
19 resulting in a cost effectiveness of 2.1 is optimal and appropriate i) in isolation; and
20 ii) in the context of FEI's overall 2022 LTGRP.

21

22 **Response:**

23 Please refer to the response to BCOAPO IR1 2.5.

24

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 6

1 **3.0 Reference: Exhibit B-2, Application, page 1**

2 **Topic: Significant DSM Transition – Risks & Mitigation**

3 Preamble: FEI states:

4 “The DSM Plan continues many of the cost-effective programs previously accepted
5 in FEI’s 2023 DSM Plan but makes a significant transition away from conventional
6 high-efficiency gas space and water heating equipment, such as furnaces and
7 boilers, to advanced DSM programming, such as gas heat pumps, dual fuel hybrid
8 heating systems and deeper retrofits. The changes to FEI’s DSM Plan reflect
9 provincial government policy direction in the 2021 CleanBC Roadmap to 2030
10 (Roadmap) and the recent amendments to the Demand-Side Measures
11 Regulation (DSM Regulation), which became effective June 30, 2023.”
12 **(Application, page 1)**

13 3.1 Please provide FEI’s views on whether it is concerned about its ability to i) spend
14 the applied-for levels of DSM spending and ii) achieve the associated energy
15 savings given the “significant transition away from conventional high-efficiency gas
16 space and water heating equipment to advanced DSM programming” in a rapidly
17 evolving marketplace. As part of the response, please identify the material risks
18 in meeting the DSM spending and energy savings. Also, please provide a detailed
19 accounting of FEI’s mitigation plan(s) to address these risks.

20
21 **Response:**

22 While there are always some inherent risks in a market-dependent DSM expenditure plan with
23 some factors beyond FEI’s control, as discussed in the response to BCOAPO IR1 2.5, FEI’s
24 approach to develop the 2024-2027 DSM Plan resulted in realistic expenditures based on
25 program development and stakeholder feedback to achieve long-term gas savings. FEI believes
26 it has adequately estimated the time required to develop advanced DSM programming and that
27 timing is reflected in the gradually increasing adoption of newer measures.

28 Please refer to the response to BCUC IR1 2.2 for the material risks FEI has identified in meeting
29 the DSM spending and energy savings, along with FEI’s mitigation plans to address these risks.

30
31

32
33 3.2 In scenarios where participation and achieved savings are lagging behind FEI’s
34 expectations, please explain how quickly FEI expects it can adapt its existing
35 programs or design and implement new programs to get back on track to meet the
36 savings targets. As part of this answer, please also describe the process FEI
37 proposes to follow should this occur during the term of this DSM Plan.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 7

Response:

FEI carefully monitors forecast and achieved savings on a monthly basis and, based on these results, examines programs that perform below expectations and takes steps to adjust the program where needed. FEI considers a number of factors in assessing a given program, including stakeholder feedback, inflation (which could impact installed measure costs), market barriers, program requirements and processes, external market factors that impact participation rates, and measures included in the programs. Based on this assessment, FEI makes program adjustments as appropriate to course correct. Adjustment may include actions such as bolstered marketing, increased outreach, incentive adjustments or simplifying the customer journey. For example, if the Home Renovation Program is lagging in savings, FEI could consider including additional measures or increasing the rebate amount in the point-of-sale rebate offers to increase participation and achieved savings.

FEI does not expect that it will need to design new programs as a response to a program performing below expectations. The speed at which FEI can implement mitigation plans to help a program meet its savings targets will vary depending on the complexity of the program, the length of the engagement period in the participant's journey in the program, whether or not the mitigating action has impacts or involves program partners, and other customer considerations (e.g., planning cycles, etc.). Mitigating actions can take anywhere from 2-6 months to implement.

3.3 Please provide a table that includes the following: i) a list of the types of critical service providers and delivery partners that FEI will rely upon in its DSM programming; ii) identify whether these providers and partners are new or existing relationships; and iii) provide a timeframe for onboarding new partners to the program.

Response:

FEI interprets the reference to "critical service providers and delivery partners" in the question to mean organizations that hold significant responsibility for driving the results of any single program.

FEI provides the requested information in the table below.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 8

1

Table 1: Critical Service Providers / Partners

Types of Critical Service Providers/Partners	New or Existing Relationships	Timeframe for Onboarding New Partners
Funding Partners	Existing	3-6+ months to determine if alternative funding partners were available, assess the program offering for feasibility, determine program changes and reinstate or end the program.
Program Delivery Partners/Implementation Contractors	Existing	3-6+ months to identify new program delivery partners/contractors or expand the role of other existing partners/contractors.
Association Partners	Existing	Partnerships with associations such as BC Non-Profit Housing Association, Aboriginal Housing Management Association (AHMA) and BC First Nations Energy and Mining Council are very unique and are considered irreplaceable.
Technical Consultants	Existing	3-6+ months to replace technical consultants that are imbedded into specific program operations.
Utility Partners	Existing	3-6+ months to assess the program offering for feasibility, determine program changes and reinstate or end the program.

2

3 Where several service providers support a single program, FEI does not consider any single
 4 provider to be critical because other existing service providers are likely able to provide additional
 5 capacity if one provider is lost, with minimal impacts to programming.

6 The time required to switch from one service provider or delivery partner to another varies widely
 7 depending on the complexity of program operations, prior experience with similar program
 8 delivery, size and structure of the organization, and other factors. With respect to identifying
 9 whether they are new or existing relationships, most types of service providers and delivery
 10 partners are existing; however, new partnerships will likely be established throughout the DSM
 11 Plan period through the regular cycle of procurement contracts and for other opportunities as they
 12 may arise.

13

14

15

16 3.4 Please provide a Total DSM Expenditures line graph for the years 2019-2027 that
 17 includes the following: i) 2019-2023 total DSM expenditures forecast, by year, as
 18 approved; ii) 2019-2023 actual total DSM expenditures by year. As part of this,
 19 please provide 2023 on an outlook basis, if possible and if not possible, please
 20 explain why as well as when a 2023 outlook could be available; iii) forecast 2023-

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 9

1 2027 total expenditures by year as reflected in the 2022 LTGRP; and iv) forecast
2 2024-2027 total expenditures by year as forecasted in this Application. Please
3 also detail in your response all assumptions.
4

5 **Response:**

6 Please find the requested figure below. FEI constructed the planned expenditures (blue line) using
7 the accepted 2019-2022 and 2023 DSM Plan expenditures and the proposed 2024-2027 DSM
8 Plan expenditures. The 2023 value in the orange "Actual" line includes the actual DSM
9 expenditures as of July 31, 2023, plus a forecast for the remainder of 2023. Please note that FEI's
10 forecast expenditures for 2023 can be considered conservative based on actuals to-date and FEI
11 continues to target the approved 2023 DSM Plan expenditures.

12 **Figure 1: Total Portfolio DSM Expenditures Comparison**

19

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 11

1 **4.0 Reference: Exhibit B-2, Application, pages 1, 2, 3; Appendix A, page 12**

2 **Topic: 2024-2027 DSM Plan Transition**

3 Preamble: FEI states:

4 “The DSM Plan continues many of the cost-effective programs previously accepted
5 in FEI’s 2023 DSM Plan but makes a significant transition away from conventional
6 high-efficiency gas space and water heating equipment, such as furnaces and
7 boilers, to advanced DSM programming, such as gas heat pumps, dual fuel hybrid
8 heating systems and deeper retrofits.” **(Application, page 1)**

9 “Further, the Roadmap contemplates that all new space and water heating
10 equipment sold and installed in British Columbia will be at least 100% efficient after
11 2030.” **(Application, page 2)**

12 “Consistent with the Roadmap, the amended DSM Regulation phases out support
13 for conventional gas space and water heating equipment with efficiency less than
14 100 percent.” **(Application, page 2)**

15 “Legacy Expenditures enable the fulfilment of committed incentives under a prior
16 DSM Plan for conventional high-efficiency gas space and water heating
17 equipment, which would otherwise no longer be eligible for incentives outside of
18 section 5 of the amended DSM Regulation” **(Application, page 3)**

19 “FEI collaborates with FBC, BC Hydro, retailers, and distributors to offer point-of-
20 sale incentives on several low-cost and easy to install measures such as washers,
21 dryers, draft proofing, waters savers and connected thermostats.” **(Appendix A,
22 FEI 2024-2027 DSM Plan, page 12)**

23
24 4.1 Please provide a table that compares the current upfront cost to a residential
25 customer to install (i) a conventional high efficiency furnace (ii) a gas heat pump
26 and (iii) a dual fuel hybrid heating system.

27
28 **Response:**

29 The following tables compare both current upfront costs and annual GHG emissions factors of a
30 high efficiency furnace, gas heat pump and dual fuel hybrid heating system.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 12

1

Table 1: Comparison of Upfront Heating Costs

Residential System Type	Average Upfront Capital Costs	Annual GHG Emissions Natural Gas (tCO _{2e} /yr)	Annual GHG Emissions Renewable Natural Gas (tCO _{2e} /yr)
High Efficiency Gas Furnace ¹	\$5,000 - \$7,000	4.49	0.024
Dual Fuel Hybrid Heating ²	\$23,000 - \$25,000	1.70	0.066
Gas Heat Pump ³	No available market pricing. Market ready costs projecting to be available in Q4 2023 - Q1 2024	3.11	0.017

2

3

Table 2: Comparison of Annual GHG Emissions Factors

Fuel	Factor	Source
Natural Gas	49.87 kgCO _{2e} /GJ (or g CO _{2e} /MJ)	https://www2.gov.bc.ca/assets/gov/environment/climate-change/cng/methodology/2020-pso-methodology.pdf
Electricity	11.5 tCO _{2e} /GWh (or gCO _{2e} /kWh)	https://www2.gov.bc.ca/gov/content/environment/climate-change/industry/reporting/quantify/electricity
RNG	0.2665 kgCO _{2e} /GJ (or g CO _{2e} /MJ)	https://www2.gov.bc.ca/assets/gov/environment/climate-change/cng/guidance-documents/emission_factors_catalogue.xlsx

4

5

6

7

8

9

10

4.2 Please provide a table that compares the annual GHG emissions associated with a residential (i) conventional high efficiency furnace (ii) gas heat pump and (iii) a dual fuel hybrid heating system.

¹ Assumes the customer baseline is a mid-efficiency furnace (0.78 AFUE) to a high-efficiency furnace (0.95-98 AFUE) for a single family home approx. 2400 sq ft in climate zone 4. Emissions calculation assumes 90 GJ/year.

² Assumes average upfront cost to enable the installation of a 3-ton capacity heat pump, high-efficiency furnace for a single-family home in British Columbia. Average cost derived from Hybrid Heating Early Adopter Offer pilot data that is underway and due to be finalized in 2024. Emissions calculation assumes furnace 0.95 AFUE and electric heat pump SCOP of 3.0.

³ Assumes residential gas absorption heat pump SCOP of 1.37 based on preliminary lab testing results for climate zone 4.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 13

1 **Response:**

2 Please refer to the response to BCOAPO IR1 4.1.

3
4

5
6 4.3 Please clarify what residential-related water heating equipment is included in FEI's
7 2024-2027 DSM Plan (other than water heating equipment included as part of
8 Legacy Expenditures).

9
10 **Response:**

11 Besides the Legacy Expenditures Program Area, the 2024-2027 DSM Plan only includes
12 residential water heating measures in the Low Income and Indigenous program areas, as allowed
13 under the amended DSM Regulation. The included measures are:

- 14
- Residential Condensing Tankless Water Heater
 - Residential Condensing Storage Tank Water Heater
- 15

16
17

18
19 4.3.1 Please clarify and explain the rationale for the continued support for
20 washers and water savers given that FEI appears to be ceasing support
21 for water heating equipment in 2024 (other than for Legacy
22 Expenditures).

23
24 **Response:**

25 FEI proposes to continue incentives and support for washers and water savers because these
26 measures are cost-effective, accessible, and easy to implement. Energy savings are achieved
27 from reducing the consumption of domestic hot water and persist regardless of the efficiency of
28 the underlying water heating equipment. These measures are not class B measures (i.e., water
29 heating equipment) under the amended DSM Regulation and are not impacted by the
30 amendments to the DSM Regulation. As per the 2022 FEI Residential End Use Survey, and the
31 2019 FEI Commercial End Use Survey, 76.3 percent of residential homes and 90 percent of multi-
32 unit residential buildings have domestic hot water heated by natural gas. Thus, there is
33 considerable opportunity to achieve energy savings.

34
35

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 14

1
2 4.4 Please explain whether it is FEI's interpretation of the DSM Regulation stating that
3 support for conventional gas space and water heating equipment is mandated to
4 cease by December 31, 2023.

5
6 **Response:**

7 Subject to the exceptions noted below, FEI interprets the amendments to the DSM Regulation as
8 effectively mandating an end to support for conventional gas space and water heating by
9 December 31, 2023. As detailed in the Application, with some exceptions, measures that
10 encourage the acquisition or installation of conventional gas space and water heating equipment
11 or "class B demand-side measures" must have a UCT of 50 or greater to be cost effective after
12 December 31, 2023. FEI is unaware of conventional gas space and water heating equipment
13 measures that can achieve a UCT of 50 or greater, meaning that support for this equipment has
14 effectively ceased. The exceptions are for the measures excluded from the definition of class B
15 demand-side measures in section 1.1(2) and legacy expenditures in section 5 of the amended
16 DSM Regulation.

17
18
19
20 4.5 Please explain FEI's rationale for ceasing support for conventional gas space and
21 water heating equipment in 2024 despite the Roadmap contemplating the phasing
22 out of support by 2030.

23
24 **Response:**

25 For clarity, the CleanBC Roadmap proposed two related policies concerning space and hot water
26 heating equipment as follows:

- 27 • Phasing out of utility gas equipment incentives on conventional gas space and water
28 heating equipment in the near term (i.e., by 2024); and
- 29 • A requirement that all new space and water heating equipment sold and installed in BC
30 must be at least 100 percent efficient after 2030.

31 Consistent with the CleanBC Roadmap's policy commitment to phase out gas utility incentives on
32 conventional equipment, the DSM Regulation has been amended and FEI has ceased support
33 for most conventional high-efficiency gas space and water heating equipment in 2024 in alignment
34 with these amendments.

35
36

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 15

1
2 4.6 Please clarify whether it is FEI's position that dual fuel hybrid heating systems
3 effectively shift part of FEI's gas load to electricity. As part of the response, please
4 provide and explain load factors differences: i) FEI's system average; ii) FEI's
5 current DSM portfolio; iii) the system load factor forecast as part of the 2024-2027
6 DSM Plan; iv) FEI's overall Residential load factor; v) FEI's current Residential
7 DSM load factor; and vi) the Residential load factor forecast as part of the 2024-
8 2027 DSM Plan.

9
10 **Response:**

11 FEI confirms that dual fuel hybrid heating systems in this context will shift part of FEI's annual gas
12 load to electricity while permitting the gas system to serve peak demand needs, thereby avoiding
13 the need for implementing new electric system capacity resources to serve winter peak demand
14 that would otherwise be necessary through full electrification of building energy systems
15 throughout BC.

16 With respect to BCOAPO's request for load factor differences, in this context, DSM and FEI's
17 DSM portfolio is comprised of a set of programs and incentives that are designed to encourage
18 customers to undertake measures that reduce energy use and/or improve energy efficiency. As
19 such, these programs and incentives do not themselves have a load factor.

20 While FEI could typically provide a comparison of FEI's current overall system-wide load factor
21 and system-wide residential load factor with these same load factors as a result of implementing
22 the 2024-2027 DSM Plan, as dual fuel heating system implementation is still in early stages of
23 development, FEI does not have sufficient information about all the considerations that can
24 influence FEI's load factor to prepare such a forecast. Therefore, FEI cannot provide a forecast
25 of future system average or system-wide residential load factor resulting from the DSM Plan.

26 These considerations include:

- 27 • The extent to which dual fuel systems, as well as other DSM programs, proliferate
28 throughout FEI's service territory and within the various regions of FEI's service territory
29 during the program period; and
- 30 • The weather profile and degree to which peak demand coincides across the various
31 regions within FEI's service territory.

32 Based on the information available, FEI provides the following:

- 33 i) FEI's system average load factor for 2022 is 0.32.⁴

⁴ The weighted average of the regional load factors as calculated for the table in the response to BCUC IR2 121.2 in the FEI 2022 Long-Term Gas Resource Plan (LTGRP).

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 16

1 ii) Not available – please see the above discussion.

2 iii) Not available – please see the above discussion.

3 iv) FEI's overall residential load factor for 2022 is 0.25.⁵

4 v) Not available – please see the above discussion.

5 vi) Not available – please see the above discussion.

6 As explained in the response to BCUC IR2 82.2 in the FEI 2022 LTGRP, FEI does not expect that
7 a dual fuel hybrid heating system would increase peak gas demand beyond the growth anticipated
8 by FEI in the 2022 LTGRP as it continues to operate similarly to a gas-only system on a peak
9 winter day. However, a dual fuel hybrid heating system would reduce gas use during warmer
10 weather, which, if all else is equal, would lower the gas load factor. FEI will continue to examine
11 the impact of dual fuel hybrid heating systems on seasonal and peak demand as part of the next
12 LTGRP.

13

⁵ This value is an estimate based on normalized annual and peak hourly demand data for the residential class contained in recent filings such as the LTGRP, and therefore the source of demand data differs from what was calculated using the hydraulic model for the FEI system-wide load factor.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 17

1 **5.0 Reference: Exhibit B-2, Application, Section 1.2, Tables 1-1, 1-2, page 5**

2 **Topic: Total Actual & Forecast DSM Expenditures and Savings**

3 5.1 Please provide an expanded Table 1-1 that includes the following: i) adds columns
4 for each year 2019 – 2023 reflecting approved expenditures; ii) adds columns to
5 provide the difference (\$ and %) between 2023 approved and 2024 proposed by
6 Program Area; and iii) adds a row to provide the total year over year percentage
7 change. Please explain material changes, provide assumptions and caveats as
8 necessary.

9
10 **Response:**

11 The requested expanded Table 1-1 is provided below. Please note the following:

- 12 • The Indigenous and Legacy program areas are new beginning in 2024.
- 13 • The Innovative Technologies, Enabling, and Portfolio program areas do not include
14 planned energy savings.
- 15 • 2024 marks a decline in expenditures where conventional gas equipment (outside of the
16 Legacy Program Area) is removed from programs. As forecast adoption of advanced DSM
17 increases through the DSM Plan period, total expenditures begin to increase as well. This
18 trend is explained further in Section 4.2 of the Application.
- 19 • Starting in 2024, evaluation expenditures are consolidated in the Portfolio Program Area
20 whereas previous DSM Plans allocated expenditures within each individual program. The
21 overall amount spent on evaluation does not change materially.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 19

1 5.2 Please provide a table of DSM Expenditures by Program Area that includes the
2 following: i) 2019 – 2023 on an actual basis. For the 2023 year, please provide on
3 an actual basis to June 30th (or most recent available actuals) and outlook for the
4 remaining months of 2023; ii) 2019 – 2023 forecast as approved; and iii) the
5 difference (\$ and %) between actual and approved for the 5-year total. Please
6 explain material changes, provide assumptions and caveats as necessary.

7
8 **Response:**

9 The requested table is provided below. Please note the following:

- 10 • The Indigenous and Legacy program areas are new beginning in 2024.
- 11 • The period between 2020 and 2021 saw higher actual residential expenditures as
12 compared to plan due to temporary COVID-19 related offers.
- 13 • The forecast for 2023 is conservative and is subject to change, as FEI typically
14 experiences most of the planned expenditure and savings in the last quarter of the year.

Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 28

1 **B. THE 2024-2027 DSM PLAN**

2 **6.0 Reference: Exhibit B-2, Application, Introduction, page 1; Appendix A, page 12**

3 **Topic: Proposed 2024-2027 DSM Programs**

4 Preamble: FEI states:

5 “The DSM Plan continues many of the cost-effective programs previously accepted
 6 in FEI’s 2023 DSM Plan.” **(Application, page 1)**

7 “Rebates for ENERGY STAR appliances in new homes are available for additional
 8 energy savings”. **(Appendix A, FEI 2024-2027 DSM Plan, page 12)**

9 6.1 Please provide a consolidated table that compares the following: i) a listing of the
 10 Residential program measures available as part of the 2023 DSM Plan including
 11 the ENERGY STAR appliances eligible for rebates; ii) a listing of the Residential
 12 program measures proposed for each year of the 2024 DSM Plan along with the
 13 ENERGY STAR appliances eligible for rebates; and iii) an identification the
 14 programs/measures that do not meet the UCT along with a brief rationale for
 15 inclusion in the 2024-2027 Plan.

16
 17 **Response:**

18 Please refer to the table below which provides an overview of the Residential Program Area
 19 measures available as a part of the 2023 DSM Plan and program measures proposed for the
 20 2024-2027 DSM Plan. FEI has also identified which measures have a UCT greater than 1.0. No
 21 residential program has a UCT below 1.0, as shown in Exhibit 6 of the DSM Plan (Appendix A to
 22 the Application).

23 Please note that the evaluation of cost-effectiveness is conducted at the portfolio level, and not
 24 at the program or measure level.

25 **Table 1: Residential Program Area Measures Available in the 2023 Plan Period Compared to 2024-**

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 30

1 Notes to Table:

2 ¹ *Included in the 2024-2027 FEI DSM Plan under Legacy Expenditures only.*

3 ² *The cost-effectiveness of these measures is subject to the provisions of the pre-June 30, 2023 DSM*
4 *Regulation, including using the TRC and mTRC tests.*

5 ³ *Included in the 2024-2027 FEI DSM Plan under Space and Water Heating Controls.*

6 ⁴ *Measure does not claim energy savings, therefore UCT cannot be calculated.*

7

8

9

10 6.2 Please identify the programs and initiatives that FEI considered but rejected as
11 part of its 2024-2027 DSM Plan and explain why the measures were rejected.
12 Provide the initial high-level screen as well as the list of measures that received
13 scrutiny.

14

15 **Response:**

16 FEI considered the following in determining whether to include a measure in the DSM Plan: (1)
17 the measure's impact on cost effectiveness (as measured by the UCT); (2) customer demand;
18 and (3) whether the effort required to offer the measure is reasonable relative to the potential for
19 energy savings.

20 FEI considered all the measures identified in the CPR with a positive UCT for inclusion in the
21 2024-2027 DSM Plan. The only measure that was identified in the CPR as cost effective, but was
22 not included in the 2024-2027 DSM Plan, is outdoor pool covers for the residential sector. Further
23 research is needed to determine customer behaviour and demand, potential for free ridership,
24 and viability of this measure.

25

26

27

28 6.3 Of the programs that FEI is proposing to discontinue, please identify those
29 programs that are "cost-effective" and explain FEI's full rationale for their
30 discontinuance.

31

32 **Response:**

33 FEI is not proposing to discontinue any programs, but rather, it is proposing to discontinue
34 incentives for conventional high-efficiency gas space and water heating measures in its
35 programming in accordance with the amended DSM Regulation.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 31

1 **Commercial Program Area**

2 With the discontinuance of incentives for conventional high-efficiency gas space and water
3 heating measures, FEI is: (1) consolidating its programming for Part 3 new construction buildings;
4 and (2) is merging the existing Small Commercial New Construction measure into the Commercial
5 New Construction measure under the Performance – New Construction Program by removing the
6 minimum conditioned floor area requirement for Part 3 projects.

7 **Industrial Program Area**

8 While FEI proposes to continue the Industrial Strategic Energy Management (SEM) measure, it
9 is now placed under the Industrial Performance Program to create consistency between the
10 Commercial and Industrial program areas. This change further streamlines the Industrial Program
11 Area, as the SEM measure is a performance-based offer and acts as a funnel for capital projects
12 that are typically incented under the Performance Program.

13 **Low Income Program Area**

14 FEI is integrating support for new construction from the Performance Program to the Support
15 Program in the Low Income Program Area. FEI will continue to support charities and housing
16 providers pursuing high-performance new construction projects.

17
18

19

20 6.4 Please provide a table that identifies: 1) the number of FEI's current Residential
21 customers; 2) the current Residential customers participating in DSM (including
22 low-income and Indigenous); 3) the forecasted number of additional Residential
23 customers anticipated to participate in DSM (including low-income and
24 Indigenous) as part of FEI's 2024-2027 DSM Plan; and 4) the % of FEI's total
25 Residential customers partaking in DSM activities currently and by the end of the
26 2024/2027 DSM Plan. Please explain material changes, and assumptions or
27 caveats as necessary.

28

29 **Response:**

30 FEI anticipates that residential participants, including Low Income and Indigenous participants,
31 will increase between 2024-2027 compared to forecast participation for 2023. Please refer to the
32 table below which provides an overview of residential participants in FEI's DSM programs. FEI
33 notes the following considerations:

- 34 • Some programs report participation at the measure level while others, such as ECAP,
35 report participation at the individual participant level which may include various measures;

- 1 • Some individuals may participate in various programs and, as such, may be reported in
- 2 multiple areas; and
- 3 • Participation does not include certain programs such as the RAP which accounts for
- 4 participation at the building level, but includes the direct installation of in-suite measures
- 5 for rental suites in multi-unit residential buildings (MURBs).

6 **Table 1: Residential Participants in FEI DSM Programs**

Program Area	DSM Program Participation ¹					
	2023	2024	2025	2026	2027	2024-27
Residential	66,427	100,358	104,716	109,082	113,765	427,921
Low Income	17,770	19,960	20,585	21,445	22,515	84,505
Indigenous	Not Applicable ²	652	950	1,160	1,230	3,992
Total Participants	84,197	120,970	126,251	131,687	137,510	516,418
FEI Residential Customers ^{3,4}	976,170					
Total Participants as a percent of FEI Residential Customers	9%	12%	13%	13%	14%	53%

7 Notes to Table:

8 ¹ DSM program participation for 2023 is forecasted and 2024-27 is anticipated.

9 ² Reporting for 2023 follows the approved FEI 2023 DSM Expenditures Plan and does not split out Low
10 Income and Indigenous programming.

11 ³ FEI does not categorize residential customers according to factors such as income or ethnicity.

12 ⁴ Total residential customers as of the end of 2022.

13

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 33

1 **7.0 Reference: Exhibit B-2, Application, page 1; Section 4.2, page 15**

2 **Topic: Staffing Additions and Cost**

3 Preamble: FEI states:

4 “The DSM Plan....makes a significant transition away from conventional high-
5 efficiency gas space and water heating equipment, such as furnaces and boilers,
6 to advanced DSM programming, such as gas heat pumps, dual fuel hybrid heating
7 systems and deeper retrofits.” **(Application, page 1)**

8 “A key driver of the expenditure levels is the amount of support necessary to
9 accelerate the adoption of advanced DSM measures that currently have low rates
10 of market adoption.” **(Application, Section 4.2, page 15)**

11 7.1 Please quantify by year and explain what staffing additions (both in EFT's and \$),
12 if any, are required to support the acceleration of advanced DSM measures. As
13 part of the response, please also identify anticipated training requirements and
14 related costs.

15
16 **Response:**

17 FEI requires additional staffing to support:

- 18 • Early market adoption strategies for advanced DSM measures across the customer
19 segments for the entire portfolio.
- 20 • Contractor and trades education and training with installations and to develop engagement
21 strategies that facilitate a transition to gas equipment that is more than 100 percent
22 efficient.

23 These additional positions are needed and will be tasked with advancing new adoption strategies
24 and market supports for advanced DSM measures, while existing staffing resources will be tasked
25 with managing existing offers, including redevelopment where required.

26 The additional positions are expected to possess similar skillsets as existing positions; therefore,
27 no special training requirements or related costs are anticipated.

28 Please refer to the table below for the number of positions and associated incremental annual
29 expenditures.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 34

1 **Table 1: Number of New Positions and Associated Incremental Annual Expenditures (2024-2027)**

Start Year	Number of New Positions (Full Time Employees)	Associated Incremental Annual Expenditure (Includes estimated salary, benefits, pension, insurance)
2024	1	\$150,000
2025	2	\$260,000
2026	-	-
2027	-	-

2

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 35

1 **8.0 Reference: Exhibit B-2, Application, Tables 1-1, 1-2, page 5, Appendix A, Exhibit**
 2 **3, page 10**

3 **Topic: Residential DSM Expenditures and Savings**

4 8.1 Please provide a table with the following Residential only information: i) 2019-2022
 5 actual Residential expenditures in total; ii) 2019-2022 forecast Residential
 6 expenditures in total as approved; iii) 2023 forecast as approved; iv) 2023 outlook;
 7 v) Residential expenditures forecast for 2024-2027 as part of the 2022 LTGRP; vi)
 8 Residential expenditures forecast for 2024-2027 in this Application; vii) the
 9 variance (\$ and %) between 2019-2022 actual and 2024-2027 forecast; and viii)
 10 the variance (\$ and %) between the 2024-2027 forecast in this Application
 11 compared to the 2022 LTGRP. As part of the response, please explain material
 12 factors contributing to the variances and any assumptions and caveats as
 13 necessary.

14 **Response:**

15 Please refer to the requested table below.

16 The variance between the 2022 LTGRP and the 2024-2027 DSM Plan is due to the exclusion of
 17 high-efficiency conventional gas equipment which was included in the LTGRP DSM scenarios.

18 While the 2019-2022 DSM Plan included a large proportion of incentives for conventional gas
 19 equipment, the proposed expenditures in the 2024-2027 DSM Plan exceed that plan. These
 20 increased expenditures can be attributed to supporting accelerated adoption of advanced DSM
 21 measures such as dual fuel hybrid heating systems, deeper retrofits, as well as the inclusion of
 22 measures that are newly cost-effective under the amended DSM Regulation such as Heat
 23 Recovery Ventilators.
 24

25 **Table 1: Residential Program Area Expenditure Comparison**

Metric	Value	Notes
2019 - 2022 Planned (\$000s)	134,178	
2019 - 2022 Actual (\$000s)	149,711	
2023 Planned (\$000s)	43,994	
2023 Actual + Outlook (\$000s)	40,303	
2024 - 2027 Total (LTGRP DEP High DSM) (\$000s)	475,853	
2024 - 2027 Total (Planned) (\$000s)	178,910	
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned (\$000s)	29,199	Planned 2024-2027 DSM Plan is \$29 million higher than 2019-2022 actual.
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned (%)	20%	Planned 2024-2027 DSM Plan is 20 percent higher than 2019-2022 actual.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 36

Metric	Value	Notes
Difference Between 2024 - 2027 Planned and 2022 LTGRP (DEP High DSM) (\$000s)	-296,942	Planned 2024-2027 DSM Plan is \$297 million lower than 2022 LTGRP (DEP High DSM).
Difference Between 2024 - 2027 Planned and 2022 LTGRP (DEP High DSM) (%)	-62%	Planned 2024-2027 DSM Plan is 62 percent lower than 2022 LTGRP (DEP High DSM).

8.3 Please provide a table that includes the following Residential information: i) 2019-2022 forecast savings by year and in total (as approved); ii) 2019-2022 actual savings by year and in total; iii) 2023 forecast savings; iv) 2024-2027 forecast savings by year and in total as reflected in the 2022 LTGRP; v) 2024-2027 forecast savings by year and in total as reflected in this Application; vi) the variance (in \$ and %) between the total 2024-2027 forecast in this Application compared to the 2022 LTGRP; and vii) the variance (\$ and %) between the total 2019-2022 actual and the 2024-2027 forecast in this Application. Please explain material factors contributing to the variances and any assumptions and caveats as necessary.

Response:

Please refer to the requested table below.

The proposed 2024-2027 DSM Plan has lower total energy savings when compared to the 2019-2022 DSM Plan (planned and actual energy savings) and when compared to the 2022 LTGRP. This variance is primarily due to the removal of conventional high efficiency gas equipment from the 2024-2027 DSM Plan. The 2019-2022 DSM Plan had significant increases in participation largely due to the “Bigger Rebates” offer that was implemented as a part of COVID-19 recovery efforts. In addition, variances in energy savings may be attributed to updated assumptions such as accounting for reduced energy savings due to increasing energy efficiency standards.

Table 1: Residential Program Area Energy Savings Comparison

DSM Plan Year	Value (GJ Savings)	Notes
2019 Planned	238,946	
2019 Actual	192,534	
2020 Planned	271,677	
2020 Actual	336,473	
2021 Planned	272,112	
2021 Actual	299,709	
2022 Planned	238,323	
2022 Actual	262,336	
2023 Planned	250,319	
2023 Actual + Outlook	196,292	
2024 Planned	166,655	
2025 Planned	187,759	
2026 Planned	208,552	
2027 Planned	232,596	

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 39

DSM Plan Year	Value (GJ Savings)	Notes
2024 - LTGRP - DEP High DSM	604,155	
2025 - LTGRP - DEP High DSM	443,991	
2026 - LTGRP - DEP High DSM	407,459	
2027 - LTGRP - DEP High DSM	383,208	
2019 - 2022 Total (Planned)	1,021,058	
2019 - 2022 Total (Actual)	1,091,051	
2024 - 2027 Total (Planned)	795,562	
2024 - 2027 Total (LTGRP DEP High DSM)	1,838,814	
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned	-295,489	Proposed 2024-2027 DSM Plan is 0.3 PJ lower than 2019-2022 actuals.
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned (%)	-27%	Proposed 2024-2027 DSM Plan is 27 percent lower than 2019-2022 actuals.
Difference Between 2024 - 2027 Planned and 2022 LTGRP (DEP High DSM)	-1,043,252	Proposed 2024-2027 DSM Plan is 1 PJ lower than 2022 LTGRP (DEP High DSM).
Difference Between 2024 - 2027 Planned and 2022 LTGRP (DEP High DSM) (%)	-57%	Proposed 2024-2027 DSM Plan is 57% lower than 2022 LTGRP (DEP High DSM).

8.4 Please provide a Total Expenditures Residential line graph for the years 2019-2027 that includes the following: i) 2019-2023 Residential total expenditures forecast, by year, as approved; ii) 2019-2023 actual Residential total expenditures by year. For the 2023 year, please provide on an outlook basis; iii) forecast 2023-2027 Residential total expenditures by year as reflected in the 2022 LTGRP; and iv) forecast 2024-2027 Residential total expenditures by year in this Application. Please provide all assumptions.

Response:

Please refer to the requested figure below. FEI constructed the planned expenditures (blue line) using the accepted 2019-2022 and 2023 DSM Plan expenditures and the proposed 2024-2027 DSM Plan expenditures. The 2023 value in the orange "Actual" line includes the actual expenditures as of July 31, 2023, plus the forecast for the remainder of 2023. Please note that FEI's forecast expenditures for 2023 can be considered conservative based on actuals to-date and FEI continues to target the approved 2023 DSM Plan expenditures.

YOY Change as a %		(39%)	11%	22%	24%	

5

⁷ Numbers represent accepted 2023 FEI DSM Plan and proposed 2024-27 FEI DSM Plan.

⁸ Participation and expenditures for 2023 include Indigenous programming.

⁹ Participation and expenditures for 2024-27 do not include Indigenous or legacy programming.

¹⁰ Participants may either be reported at the measure level or at the individual level (which may include a bundle of measures). Some individuals may also participate in various programs and as such may be double counted.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 44

1 **10.0 Reference: Exhibit B-2, Application, Appendix A, pages 21-22**

2 **FEI 2023 Demand Side Management Expenditures Plan, Exhibit B-1,**
3 **Appendix A, page 35**

4 **Topic: Proposed Changes to Low-Income DSM**

5 Preamble: FEI states:

6 The Prescriptive Program provides rebates, implementation support, funding for
7 energy studies, and training for non-profit housing providers. Prescriptive rebates
8 are available for residential and commercial measures such as thermostats,
9 insulation, ventilation, gas heat pumps, hybrid systems, and water heaters **(FEI**
10 **2024-2027 DSM Plan, Appendix A, pages 21-22) (Emphasis Added)**

11 “The Prescriptive Program provides rebates, implementation support, funding for
12 energy studies, and training for housing providers....Prescriptive rebates are
13 available for residential and commercial measures such as furnaces, boilers and
14 water heaters. **(FEI 2023 DSM Plan, Appendix A, page 35) (Emphasis Added)**

15 10.1 Please provide FEI’s rationale for limiting Low Income support to only non-profit
16 housing providers in its 2024-2027 DSM Plan.

17
18 **Response:**

19 FEI does not limit incentives and support only to non-profit housing providers in the Low Income
20 Program Area in the 2024-2027 DSM Plan. In accordance with the amended DSM Regulation
21 and adequacy requirements, the Low Income Program Area encompasses programming for low
22 income residential customers, charities that aid low income persons, and housing providers that
23 are:

- 24 • A local government;
- 25 • A housing society registered under the *Societies Act*, or
- 26 • A housing co-op registered under the *Cooperative Association Act*.

27 For example, a housing co-op can apply and participate in the Direct Install Program and have
28 the program delivered to multiple units in a complex. Another example is a registered charity can
29 access rebates under the Prescriptive Program and may receive a higher rebate than what is
30 available to other commercial customers.

31
32
33

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 45

1 10.2 Please confirm and explain FEI's rationale for continuing Low-Income support of
2 water heaters as part of its 2024-2027 DSM Plan but not for all residential
3 customers.

4
5 **Response:**

6 Incentives for water heaters in the 2024-2027 DSM Plan are aligned with the amended DSM
7 Regulation. As per section 1.1(2)(g) of the DSM Regulation, incentives for this measure for low
8 income and Indigenous groups are excluded from the definition of class B demand-side
9 measures.

10 Please refer to the response to BCUC IR1 9.4 for additional context about FEI's proposal to
11 continue incentives for conventional natural gas equipment for these groups.

12

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 46

1 **11.0 Reference: Exhibit B-2, Application, Tables 1-1, 1-2, page 5; Appendix A, Exhibit**
 2 **3, page 10**

3 **Topic: Proposed 2024-2027 DSM Programs – Low Income**

4 11.1 Please provide a table that includes the following low-income only information: i)
 5 2019-2022 forecast low-income expenditures in total as approved; ii) 2019-2022
 6 actual low-income expenditures in total; iii) 2023 forecast as approved; iv) Low-
 7 Income expenditures forecast for 2024-2027 as part of the 2022 LTGRP; v) Low-
 8 Income expenditures forecast for 2024-2027 in this Application; vi) the variance (\$
 9 and %) between 2019-2022 actual and 2024-2027 forecast; and vii) the variance
 10 (\$ and %) between the 2024-2027 forecast in this Application compared to the
 11 2022 LTGRP. As part of the response, please identify the material factors
 12 contributing to the variances.

13
 14 **Response:**

15 The requested information is provided in the table below.

16 Please note that FEI is not able to compare the 2022 LTGRP with the Low Income Program Area
 17 because the 2022 LTGRP includes the low income customer segment within the residential
 18 potential. In the LTGRP model, energy consumption and savings are categorized by residential,
 19 commercial, and industrial only.

20 The variances between 2019-2022 actual and 2024-2027 planned expenditures are due to
 21 several factors, including:

- 22 • Increased funding for the Self Install Program to support additional measure options for
 23 customers, as well as energy education;
- 24 • Increased funding for the Prescriptive Program to support envelope improvements and
 25 advanced DSM measures; and
- 26 • Continued funding for the Direct Install Program to address whole home retrofits, and
 27 funding for education, training, and new construction projects in the Support Program.

28 **Table 1: Comparison of Low Income Program Area Expenditures**

Metric	Value	Notes
2019 - 2022 Planned (\$000s)	36,010	
2019 - 2022 Actual (\$000s)	32,492	
2023 Planned (\$000s)	13,251	
2023 Actual + Outlook (\$000s)	10,529	The forecast for 2023 is conservative and is subject to change, as FEI typically achieves most of the planned expenditure and savings in the last quarter of the year.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 47

Metric	Value	Notes
2024 - 2027 Total (Planned) (\$000s)	44,621	
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned (\$000s)	12,129	Planned 2024-2027 DSM Plan expenditures are \$12 million higher than the 2019-2022 DSM Plan actuals.
Difference Between 2019 - 2022 Actual and 2024 - 2027 Planned (%)	37	Planned 2024-2027 DSM Plan expenditures are 37 percent higher than the 2019-2022 DSM Plan actuals.

Table 1: Low Income Program Area Expenditure Comparison

Program Area	2024-207 Total Expenditures (\$000s)					2019-2022 Total Expenditures (\$000s)		2023 Total Expenditures (\$000s)	Difference between 2019 - 2022 and 2024-2027 (\$000s)		Difference between 2019 - 2022 and 2024-2027 (%)	
	2024	2025	2026	2027	2024-27	Plan	Actuals	Plan	Plan	Actuals	Plan	Actuals
Low Income	\$8,366	\$9,753	\$11,826	\$14,676	\$44,621	\$36,010	\$32,492	\$13,251	\$8,611	\$12,129	24%	37%

2

1 11.3 Please provide a table that includes the following Low Income information: i) 2019-
 2 2022 forecast savings by year and in total; ii) 2019-2022 actual savings by year
 3 and in total; iii) 2023 forecast savings; iv) 2024-2027 forecast savings by year and
 4 in total; v) the variance (in GJ and %) between the total 2019-2022 and 2024-2027
 5 forecasts; and vi) the variance (GJ and %) between the total 2019-2022 actuals
 6 and the 2024-2027 forecast. Please provide the material factors contributing to
 7 variances and assumptions and caveats as necessary.

8
9 **Response:**

10 Please refer to the table below for the requested information.

11 The variances between 2019-2022 and 2024-2027 planned energy savings are primarily due to
 12 updated assumptions as well as program changes to align with the amended DSM Regulation.
 13 FEI has continued to refine the assumptions used for the 2019-2022 DSM Plan to account for
 14 varying factors such as diminishing energy savings due to increasing energy efficiency standards
 15 and installation rates for programs with bundled measures.

16 **Table 1: Low Income Program Area Energy Savings Comparison**

Metric	Value	Notes
2019 Planned (GJ)	76,022	
2019 Actual (GJ)	53,236	
2020 Planned (GJ)	76,590	
2020 Actual (GJ)	76,388	
2021 Planned (GJ)	57,547	
2021 Actual (GJ)	50,660	
2022 Planned (GJ)	64,128	
2022 Actual (GJ)	62,814	
2023 Planned (GJ)	77,408	
2023 Actual + Outlook (GJ)	83,262	The forecast for 2023 is conservative and is subject to change, as FEI typically experiences most of the planned expenditure and savings in the last quarter of the year.
2024 Planned (GJ)	50,684	
2025 Planned (GJ)	56,992	
2026 Planned (GJ)	64,579	
2027 Planned (GJ)	75,588

11.4 Please provide a Total Expenditures Low-Income line graph for the years 2019-2027 that includes the following: i) 2019-2022 low-income total expenditures forecast, by year, as approved; ii) 2019-2022 actual low-income total expenditures by year; and iii) forecast 2023-2027 low-income total expenditures by year. Please provide all assumptions.

10 **Response:**

11 Please refer to the requested figure below. FEI constructed the planned expenditures (blue line)
12 using the accepted 2019-2022 and 2023 DSM Plan expenditures, and the proposed 2024-2027
13 DSM Plan expenditures. The orange "Actual" line includes actual expenditures for 2019 to 2022
14 and for 2023 to the end of July, plus the forecast for the remainder of 2023. Please note that FEI's
15 forecast expenditures for 2023 can be considered conservative based on actuals to-date and FEI
16 continues to target the approved 2023 DSM Plan expenditures.

16

17

18

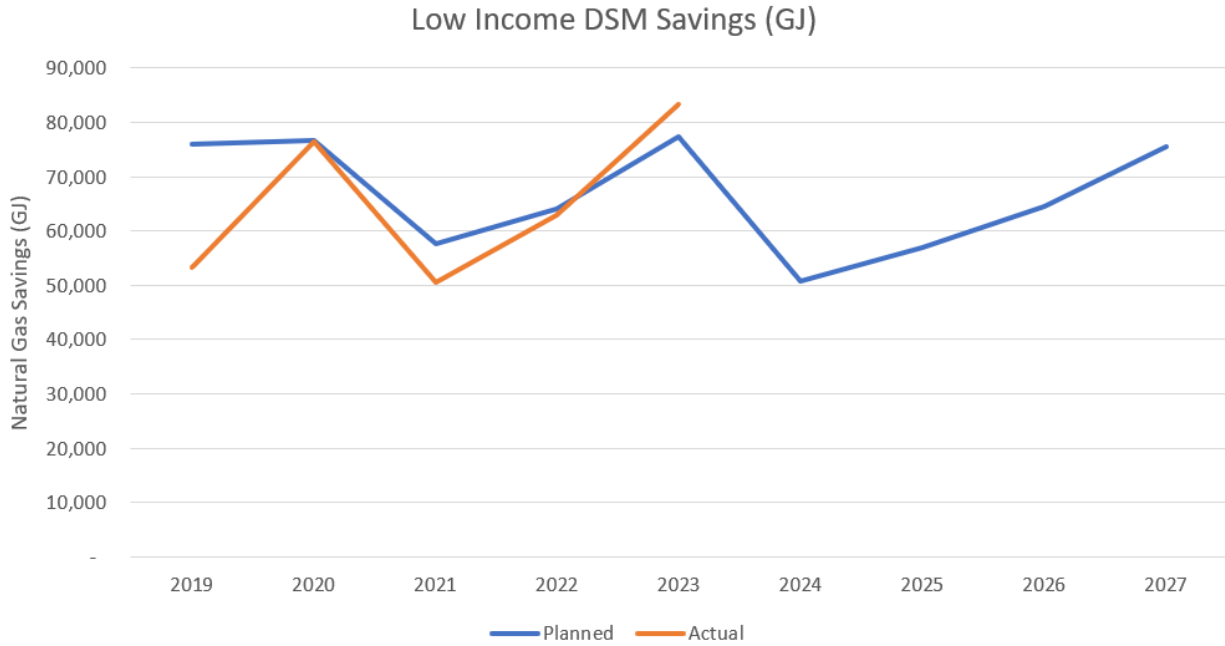

Please refer to the requested figure below. FEI constructed the planned savings (blue line) using the accepted 2019-2022 and 2023 DSM Plan savings and the proposed 2024-2027 DSM Plan savings. The orange "Actual" line includes actual savings for 2019 through 2022 and actuals for 2023 up to the end of July, plus the forecast for the remainder of 2023. Please note that FEI's forecast gas savings for 2023 can be considered conservative based on actuals to-date and FEI continues to target the approved 2023 DSM Plan gas savings.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 52

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 53

1 **C. COST EFFECTIVENESS APPROACH**

2 **12.0 Reference: Exhibit B-2, Application, Section 3, page 9 and Section 6, page 33**

3 **Topic: Cost Effectiveness Assumptions and Sensitivity**

4 Preamble: FEI states:

5 "In accordance with section 3 of the June 2023 update to the DSM Regulation, the
6 avoided cost of gas that FEI used to calculate cost-effectiveness in the DSM Plan
7 (with the exception of Legacy Expenditures) is equal to \$34.07 per GJ in the
8 2023/2024 fiscal year (and increases each year by the annual average All-items
9 Consumers Price Index for British Columbia), plus the avoided cost which is
10 calculated based on the estimated avoided cost of distribution in 2023 of \$0.59/GJ
11 (increases by 2.4 percent each year to account for estimated inflation)"
12 **(Application, page 9)**

13 "Legacy Expenditures proposed for 2024-2027 under section 5 of the DSM
14 Regulation are subject to the cost-effectiveness methodology set out in section 4
15 of the DSM Regulation effective prior to June 30, 2023. The proposed Legacy
16 Expenditures in a Program Area have a blended TRC test cost-effectiveness result
17 of 1.5." **(Application, page 33)**

18 12.1 Please provide the ZEEA value in \$/MWh used resulting in a blended TRC of 1.5
19 along with FEI's supporting rationale.
20

21 **Response:**

22 Consistent with section 5 of the amended DSM Regulation, FEI used a ZEEA value of \$106/MWh
23 (\$29.45/GJ) in the blended TRC calculation for the Legacy Program Area. FEI used this value as
24 it was the ZEEA value used in the 2023 DSM Plan Application.

25
26

27
28 12.2 Please provide a sensitivity analysis of the cost-effectiveness of the DSM Plan due
29 to changes in the cost parameters. Please provide the UCT that results from each
30 of the following scenarios: i) avoided cost of gas reduction of 10% (i.e. from
31 \$34.07/GJ to \$30.7/GJ; ii) avoided cost of gas reduction of 25%; iii) avoided cost
32 of gas increase of 10%; iv) avoided cost of gas increase of 50%; v) avoided cost
33 of distribution increase of 5%; and vi) avoided cost of distribution increase of 10%.
34 As part of the response, please discuss the factors contributing to unusual or
35 asymmetric results.
36

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 54

1 **Response:**

2 The requested information is provided in the table below.

3 **Table 1: Portfolio UCT Sensitivity Analysis**

Scenario	Portfolio UCT	Notes
Proposed DSM Plan	2.1	
Avoided cost of RNG reduction of 10% From \$34.07/GJ to \$30.66/GJ	1.9	No unusual or asymmetric results noted – All UCT scores change in proportion to the change in avoided cost of RNG.
Avoided cost of RNG reduction of 25% From \$34.07/GJ to \$25.55/GJ	1.6	
Avoided cost of RNG increase of 10% From \$34.07/GJ to \$37.48/GJ	2.3	
Avoided cost of RNG increase of 50% From \$34.07/GJ to \$51.11/GJ	3.2	
Avoided cost of distribution increase of 5% From \$0.59 to \$0.62 RNG unchanged at \$34.07/GJ	2.1	
Avoided cost of distribution increase of 10% From \$0.59 to \$0.65 RNG unchanged at \$34.07/GJ	2.1	No material changes from proposed DSM Plan UCT

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 55

1 **D. RATES & RATE IMPACTS**

2 **13.0 Reference: Exhibit B-2, Application, Section 6, page 33**

3 **Topic: Rate Impacts**

4 Preamble: FEI states:

5 "FEI's proposed DSM portfolio for 2024-2027 is cost effective, with a portfolio UCT cost-
6 effectiveness result of 2.1 based on the methodology set out in section 4 of the
7 DSM Regulation. A score of 2.1 passes the threshold of 1.0 at the portfolio level,
8 meaning the benefits from DSM to the avoided acquisition of renewable and low-
9 carbon gases exceed the Utility's incentive and administration cost for the
10 proposed DSM portfolio of programs." (**Application, page 33**)

11
12 13.1 Please calculate, for the 2023 DSM Plan, the 2024-2027 DSM as part of the 2022
13 LTGRP, and the proposed 2024-2027 DSM Plan, DSM spending as a percentage
14 of current forecast annual FEI revenues.

15
16 **Response:**

17 Please refer to the table below which shows FEI's DSM spendings in dollars and as a percentage
18 of FEI's current forecast of annual revenues (i.e., \$1,877 million as part of FEI's 2024 Annual
19 Review¹¹) from 2023 to 2027 (based on the accepted 2023 DSM Plan), the estimated DSM
20 expenditures in FEI's 2022 LTGRP,¹² and the proposed 2024-2027 DSM Plan.

21 **Table 1: Total Estimated DSM Expenditures as a Percentage of FEI's 2024 Forecast Revenues**

	2023	2024	2025	2026	2027
2023 DSM Plan (\$ millions)	141.08				
2023 DSM Plan (% to FEI 2024 Proposed Revenue)	7.5%				
2022 LTGRP - 2024-2027 DSM Expenditure Estimate (\$ millions)		228.00	216.00	221.00	222.00
2022 LTGRP - 2024-2027 DSM Expenditure Estimate (% to FEI 2024 Proposed Revenue)		12.1%	11.5%	11.8%	11.8%
Proposed 2024-2027 DSM Plan (\$ millions)		166.87	146.59	148.40	164.84
Proposed 2024-2027 DSM Plan (% to FEI 2024 Proposed Revenue)		8.9%	7.8%	7.9%	8.8%

13.2 Please provide, in percentage and dollar values, the annual rate and revenue impacts associated with the 2024-2027 DSM plan and provide the underlying assumptions and comparators.

Response:

Please refer to Lines 25 and 28 of the table below for the annual incremental revenue in dollars and rate impacts in percentage, respectively, associated with the 2024-2027 DSM Plan.

As 2024 DSM expenditures will begin amortization in 2025, the incremental rate impact in 2024 is related to the half-year base return and the associated income tax expenses for the DSM rate base deferral account. Furthermore, consistent with the approved 2023 DSM Plan, FEI is proposing to continue the amount it includes in its rate base DSM deferral account on a forecast basis at the previously approved \$60 million, effective for 2024-2027. The difference between actual DSM expenditures in each year and the \$60 million will be recorded in the non-rate base deferral account, which will be transferred to rate base in the following year and begin amortization. As such, the 2024-2027 DSM Plan will have an incremental impact to FEI's revenue requirement and rates from 2024 through 2028.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 57

3

4

5

6 13.3 Please provide, in percentage and dollar values, the annual rate and revenue

7 impacts by customer class for the 2024-2027 DSM plan and provide the underlying

8 assumptions and comparators.

9

10 **Response:**

11 Please refer to Table 1 below for the annual effective rate impacts by customer class and Table

12 2 below for the revenue impacts by customer class for the 2024-2027 DSM Plan in dollar values

13 and percentage. FEI has excluded transportation customers as FEI does not have insight into the

14 commodity charge portion of their total bills.

15 FEI assumes the revenue impact stated in this information request is referring to the total impact

16 to FEI's revenue requirement, which is shown in the response to BCOAPO IR1 13.2, broken down

17 by customer class. Please note that the breakdown of the total impact to FEI's revenue

18 requirement in 2024-2027, as shown in Table 2 below (except for the transportation customer

1 classes), is compared to FEI's 2024 proposed revenue requirement from FEI's 2024 Annual
 2 Review.¹³

11
 12 13.4 Please explain FEI's views and plans for implementing conservation rates
 13 (inverted block) or Time of Use rates. As part of the response, please identify the
 14 advantages and disadvantages to the use of such rate structure.

15
 16 **Response:**

17 FEI currently does not have any plans to implement conservation rates (i.e., inverted block rates)
 18 or Time of Use rates.

¹³ Filed for BCUC review on July 28, 2023.

FortisBC Energy Inc. (FEI or the Company) 2024-2027 Demand-Side Management (DSM) Expenditures Plan Application (Application)	Submission Date: September 7, 2023
Response to British Columbia Public Interest Advocacy Centre representing the British Columbia Old Age Pensioners' Organization, Council of Senior Citizens' Organizations of BC, Active Support Against Poverty, Disability Alliance BC, Tenant Resource and Advisory Centre, and Together Against Poverty Society <i>et al.</i> (BCOAPO) Information Request (IR) No. 1	Page 59

1 FEI does not believe an inverted block rate structure is appropriate for conventional gas
2 consumption since it will create regional inequities as customers in colder regions will be impacted
3 the most with higher rates for heating purposes. Further, as discussed in FEI's 2016 Rate Design
4 Application, research in other jurisdictions suggests that inclining block rates are rarely used in
5 the natural gas distribution utility industry, and to the best of FEI's knowledge, are not used by
6 any Canadian natural gas distribution utility. Unlike the case for some electric utilities, there is
7 little cost justification for inverted rates as more consumption does not necessarily lead to higher
8 cost. FEI's expert evidence in the 2016 Rate Design Application explained this as follows:¹⁴

9 It is important to note the distinctions between the gas and electric industries. On
10 the electric side, the LRMC is currently used as a tool in setting the Residential
11 Inclining Block (RIB) rates for BC Hydro and FortisBC. In this case, the LRMC
12 primarily includes the cost of building new generating resources to provide power
13 to meet the load growth of the utility. This is appropriate because the electric rates
14 include the cost of both the generation and delivery of power. A reduction in power
15 consumption can contribute to the avoidance or delay of new generating
16 resources. In the case of BC Hydro and FortisBC, the marginal cost of power is
17 well above the embedded cost of power. For the gas utility, load growth will not
18 lead to the addition of new gas production facilities for FEI directly as it does not
19 produce its own gas supplies. Therefore the results will differ considerably from
20 the electric utility because the cost of energy supply is not included in the marginal
21 cost. In our estimates, the marginal cost of delivery service for gas is currently
22 below the embedded cost of delivery service.

23 Time of use rate structures can potentially be used to encourage more efficient use of the system
24 by incentivizing customers to shift their consumption from peak hours to off peak hours. However,
25 Time of Use rates are generally more difficult to understand for customers. Further, as discussed
26 in the recently approved FEI Advanced Metering Infrastructure (AMI) CPCN proceeding,¹⁵ FEI
27 does not expect to implement Time of Use rates because:¹⁶

- 28 • FEI is a seasonal peaking utility, with peaks in the winter and on very cold days, which
29 means the peaks are not on the same day, not at the same time, and not in the same
30 place. Therefore, the time of day does not align well with peak use, especially in warmer
31 months when there are very few capacity constraints regardless of the time of day; and
- 32 • Unlike the electric system where demand is instantaneous and the system needs to be
33 actively balanced from generation to consumption, FEI has gas inventory in the form of
34 line pack, and on and off system storage, allowing FEI to respond to immediate changes
35 in demand on its system by using these inventory sources.

Attention: Sara Hardgrave, Acting Commission Secretary

Dear Sara Hardgrave:

Re: FortisBC Energy Inc. (FEI)
Natural Gas Demand-Side Management (DSM) – 2022 Annual Report

Attached please find the Natural Gas DSM Program 2022 Annual Report for FEI.

If further information is required, please contact Sarah Commander, Regulatory Projects Manager at (250) 469-6081.

Sincerely,

FORTISBC ENERGY INC.

1. REPORT OVERVIEW

FortisBC Energy Inc. (FEI or the Company) is committed to delivering a broad portfolio of cost-effective natural gas Demand-side Management¹ (DSM) measures that address the expectations of customers while meeting the requirements for public utilities to pursue cost-effective DSM. In 2022, the Company achieved a combined portfolio Modified Total Resource Cost (MTRC)² of 1.5 on expenditures of \$108 million, meeting FEI's goal of cost-effective program delivery.

The 2022 DSM Annual Report (the Report) outlines the Company's actual results and expenditures for 2022 as compared to FEI's 2019-2022 DSM Plan approved by the BCUC in its Decision and Order G-10-19 (the Decision) and subsequent amendments approved by BCUC Orders G-135-21, G-301-21, and G-345-21. The Report compares 2022 actual activity and results to these approved DSM Plan values for 2022. Where the details of individual programs vary substantially from the 2019-2022 DSM Plan, explanations are provided in the applicable Program Area sections of the Report.

1.1 PURPOSE OF REPORT: TRANSPARENCY, ACCOUNTABILITY AND UPDATE ON PROGRESS

The Report details FEI's activities for the overall DSM Portfolio and in each Program Area. Incentive and non-incentive expenditures are reported at the level of each program or measure, as well as at the Program Area and Portfolio levels. Results for the following cost effectiveness tests are provided for the overall Portfolio and each Program Area in Section 2, and for each program as appropriate in the respective Program Area sections:

- Total Resource Cost (TRC);
- Ratepayer Impact Measure (RIM);
- Participant Cost Test (PCT);
- Utility Cost Test (UCT); and
- Modified Total Resource Cost (MTRC). In accordance with British Columbia's Demand-Side Measures Regulation (DSM Regulation), results of the MTRC calculations are also provided where appropriate (see Section 2.1).

The Report also demonstrates that FEI is meeting the accountability mechanisms directed by the BCUC in Order G-10-19, which carries over a number of requirements from prior orders regarding

¹ Throughout this Report the use of the term Demand-Side Management or "DSM" is intended to refer to demand-side measures in BC as defined in the BC Demand-Side Measures Regulation (DSM Regulation).

² Pursuant to the BC Demand-side Measures Regulation, the Portfolio level MTRC is calculated based on costs and benefits of all programs in the Portfolio as well as any Program Area and Portfolio level administration costs, and including the benefit adders for those programs for which the MTRC is relied upon to determine cost effectiveness on an individual program basis (i.e. those programs that have been designated as being under the MTRC Cap as presented in Section 2.1 of this report).

1 DSM expenditures. One such mechanism contained in Order G-36-09 was the requirement to
2 file DSM Annual Reports, which states:

3 A requirement that Terasen [now FEI] submit annually to the BCUC, by the end of
4 the first quarter following year-end, for each year of the funding period, a report on
5 all [DSM] initiatives and activities, expenditures, and results...

6 This report shows that FEI's DSM portfolio meets the cost-effectiveness calculations and
7 adequacy requirements set out in the DSM Regulation, as amended in March 2017.

8 **1.2 ORGANIZATION OF THE DSM ANNUAL REPORT**

9 The following describes how each section of the Report presents the results of 2022 DSM
10 activities:

11 **Section 1: Report Overview**

- 12 • Provides a high-level background for the Report.

13 **Section 2: Portfolio Overview**

- 14 • Provides detail regarding the overall actual 2022 expenditures and cost-effectiveness
15 results for DSM activities.
- 16 • Provides how the actual expenditures met adequacy provisions of the DSM regulations.

17 **Section 3: Funding Transfers and Carryover**

- 18 • Provides a discussion on funding transfers between Program Areas in 2022.

19 **Section 4: Advisory Group Activities**

- 20 • Provides information regarding Energy Efficiency and Conservation Advisory Group
21 (EECAG) activities in 2022.

22 **Sections 5 - 9 provide information on:**

- 23 • Residential, Low Income, Commercial, Innovative Technologies, and Industrial Energy
24 Efficiency Program Areas, respectively;
- 25 • Each Program Area section contains a table summarizing the planned and actual
26 expenditures, including incentive and non-incentive expenditures, annual gas savings, as
27 well as TRC and other cost-effectiveness test results. Additional tables outline the
28 individual 2022 programs, including program and measure descriptions, program
29 assumptions and sources for these assumptions, and a breakdown of incentive and non-
30 incentive expenditures.

31 **Section 10: Conservation Education and Outreach Initiatives**

- 32 • Provides both summary and detail regarding actual 2022 expenditures for the
33 Conservation Education and Outreach (CEO) Program Area.

1 **Section 11: Enabling Activities**

- 2 • Provides both summary and detail regarding actual 2022 expenditures for the Enabling
3 Activities that support the work of the DSM Portfolio as a whole.

4 **Section 12: Evaluation**

- 5 • Provides detail regarding pending and actual expenditures for 2022 program evaluation
6 activities, as well as summary results from evaluations and studies completed in 2022.

7 **Section 13: Data Gathering, Reporting and Internal Control Processes**

- 8 • Provides a summary of FEI's data tracking, process control, and reporting for 2022 DSM
9 activities, and a high-level description of FEI's internal approval process for programs.

10 **Section 14: 2022 DSM Annual Report Summary**

- 11 • Provides a summary conclusion for the Report and FEI's 2022 DSM activity.

2. PORTFOLIO OVERVIEW

In this Section, FEI provides its DSM energy savings, expenditures and cost-effectiveness test results at an overall Portfolio and Program Area level for 2022. A summary of the overall Portfolio results is provided in Table 2-1, demonstrating that the Company achieved a combined Portfolio MTRC of 1.5. FEI achieved DSM expenditures of \$108.1 million and recorded annual natural gas savings of 1.2 million GJ in 2022. These energy savings resulted in carbon emission reductions of almost 70,000 tonnes of CO₂e in 2022 and total reductions of 646,480³ tonnes of CO₂e over the life of all measures installed or undertaken in 2022. Expenditures and savings have increased over 2021 results by approximately \$1.2 million and approximately 27,000 GJ, respectively.

Table 2-1: Overall DSM Portfolio Results for 2022

Indicator - 2022 Results	Total	
Utility Expenditures, Incentives (\$000s)	81,641	
Utility Expenditures, Non-Incentives (\$000s)	26,429	
Utility Expenditures, Total (\$000s)	108,071	
Net Incremental Annual Gas Savings (GJ/yr.)	1,169,837	
Annual GHG Emission Reductions* (tonnes CO ₂ e/yr)	69,956	
NPV of Annual Gas Savings (GJ/yr.)	10,810,708	
Measure Lifetime GHG Emission Reductions* (tonnes CO ₂ e)	646,480	
Benefit/Cost Ratios	TRC	0.9
	MTRC	1.5
	UCT	0.9
	PCT	2.4
	RIM	0.5

Tables 2-2 and 2-3 below provide the expenditures and cost-effectiveness test results by Program Area for the overall DSM Portfolio.

³ Emission reduction value based on life cycle (well to burner tip) emission factor of 0.0598 tonnes CO₂e/GJ for natural gas. Annual emission reductions are just those attributed to the first year following measure implementation. Lifetime reductions are the total reductions that occur over the life of all measures implemented (based on NPV of gas savings).

1 **Table 2-2: Overall DSM Portfolio Level Results by Program Area 2022 – Expenditures⁴**

Program Area	Utility Expenditures (\$000s)					Total Expenditures	
	Incentives		Non-Incentives		Plan Carryover from 2021	2022 Plan	2022 Actual
	2022 Plan	2022 Actual	2022 Plan	2022 Actual		2022 Plan	2022 Actual

ALL PROGRAMS	68,573	81,641	37,693	26,429	5,554	111,820	108,070

2
3
4 **Table 2-3: Overall DSM Portfolio Level Results by Program Area 2022 – Savings**

Program Area	Incremental Annual Gas Savings, Net (GJ)		Benefit/Cost Ratios				
	2022 Plan	2022 Actual	TRC	MTRC	UCT	PCT	RIM
Residential	238,323	262,336	0.5	1.7	0.7	1.9	0.4
Commercial	381,421	328,904	1.4	1.5	1.3	3.0	0.2
Industrial	466,317	442,205	2.2	2.2	4.2	3.9	0.8
Low Income	64,128	62,814	2.9	2.9	0.6	2.4	0.3
Conservation Education and Outreach	0	71,875	0.5	2.0	0.5	1.8	0.3
Innovative Technologies	Savings Not Estimated		Savings Not Estimated				
Enabling Activities	0	1,704	Calculated at Portfolio Level				
Portfolio Level Activities	Savings Not Estimated		Savings Not Estimated				
ALL PROGRAMS	1,150,189	1,169,837	0.9	1.5	0.9	2.4	0.5

5
6 Portfolio Level Activities, shown in the tables above, are those activities for which the costs cannot
7 be assigned to individual DSM programs. These activities are distinct from the Enabling Activities
8 specifically listed in Section 11 of the 2019-2022 DSM Plan. These distinct Portfolio Level
9 Activities include expenditures such as stakeholder engagement activities, portfolio level staff
10 labour, staff training and conferences, research and association memberships, portfolio level
11 research studies, and regulatory work including consulting fees.

12 Throughout the Report, the following general notes also apply to all the Program Areas:

- 13 • In the above table, and in tables throughout the Report, any difference in the totals
14 between the Portfolio Overview, Program Area, and individual program tables is due to
15 rounding. Where “zero” values occur, expenditures were either zero or rounded to the
16 nearest \$000 expenditure level when expenditures were under \$500.

⁴ Carryover from the prior year is added to the current year plan. Information in Table 2-2 is net of such adjustments. Since FEI experienced a small over-spend in 2020, a negative carryover resulted as approved by Commission Order G-345-21. That negative carryover was allocated to the Enabling Activities and Portfolio Level Activities Areas in order that Program Areas with energy saving incentives not be impacted.

- A “Non-Program Specific Expense” line item has been included for each Program Area in Sections 5 through 11. These expenditures support multiple programs within that Program Area and therefore, are not specific to only one program. Generally, these expenditures represent items such as training, travel, marketing collateral, and consulting services that support the overall Program Area.

The expenditures, energy savings and cost-effectiveness results presented in the Report are exclusive of third-party funding such as CleanBC funding from the British Columbia Ministry of Energy, Mines and Low Carbon Innovation (EMLI). For measures that also receive third party incentive funding, attribution of energy savings among the parties has been accounted for in both the FEI claimed savings and cost test results.

2.1 PORTFOLIO LEVEL MTRC CALCULATION AND RESULTS

The DSM Regulation specifies that utilities can implement DSM with TRC values less than 1.0 but that meet an MTRC threshold of 1.0 provided expenditures on these activities do not exceed 40 percent of the total Portfolio expenditure. FEI refers to this 40 percent as the “MTRC Cap”. Table 2-3 above shows that in 2022, FEI met the conditions of the DSM Regulation, achieving a Portfolio MTRC value of 1.5. Table 2.4 below shows that 31 percent of the Portfolio was enabled by the MTRC cost-effectiveness test.

Table 2-4: Programs Subject to MTRC and the Relative Proportion of 2022 Portfolio Expenditures

Program	Program TRC	Program MTRC	Expenditure (\$000s) subject to cap	% of Portfolio Spending
Residential				
Home Renovation Rebate Program	0.6	1.8	\$21,180	19.6%
New Home Program	0.4	1.4	\$12,223	11.3%
Commercial				
Prescriptive Program	1.8	1.8	\$105	0.1%
Rental Apartment Efficiency Program	0.7	1.2	\$217	0.2%
Total			\$33,724	31.2%

While FEI strives for TRC test results that approach or exceed 1.0 within each program and across all programs, there are benefits to implementing programs that do not meet this threshold. Some of these benefits include making programs available to those customers that would otherwise be underserved (such as Low Income and Residential customers), water savings, increased human health and comfort, and economic benefits such as job creation. These benefits are recognized in the DSM Regulation, which enables use of an MTRC in determining program and Portfolio cost effectiveness. The MTRC uses the long-run marginal cost of acquiring electricity generated from clean or renewable resources in British Columbia (referred to as the Zero Emission Energy

1 Alternative, or ZEEA) as a proxy for the avoided cost of natural gas and allows for the inclusion
2 of non-energy benefits (NEBs).⁵

3 **2.2 MEETING APPROVED EXPENDITURE LEVELS**

4 FEI's 2022 DSM expenditure budget of \$111.8 million includes the original expenditure approval
5 of \$96.8 million, accepted on January 17, 2019 pursuant to Decision and Order G-10-19, as well
6 as an increase of \$9.4 million pursuant to Decision and Order G-301-21, and a carryover amount
7 from 2021 of \$5.5 million pursuant to Decision and Order G-345-21. The Report also includes a
8 reallocation of 2022 funding amounts for Residential and Low Income Program Areas as
9 approved by BCUC Order G-135-21. 2022 DSM Plan amounts for Program Areas and the
10 Portfolio shown in tables throughout the Report reflect these approved amendments to the DSM
11 Plan. FEI's actual 2022 expenditures of \$108.1 million for the total DSM portfolio shows that FEI's
12 efforts to achieve the overall approved expenditure plan were successful. Incentive expenditures
13 exceeded non-incentive expenditures by greater than a 3 to 1 margin in 2022.

14 Section 3 discusses funding transfers between Program Areas in 2022 within the overall DSM
15 funding envelope and within the transfer rules as set out in the 2019-22 DSM Plan and approved
16 pursuant to Order G-10-19. Section 3 also reports 2022 carryover amounts for each Program
17 Area.

18 **2.3 MEETING ADEQUACY REQUIREMENTS OF THE DSM REGULATION**

19 The adequacy requirements set out in the DSM Regulation are as follows:

20 A public utility's plan portfolio is adequate for the purposes of Section 44.1 (8) c
21 of the Act only if the plan portfolio includes all the following:

22 a) A demand-side measure intended specifically to assist:

23 i. residents of low-income households to reduce their energy
24 consumption; or

25 ii. to reduce energy consumption in housing owned or operated by

26 (A) a housing provider that is a local government, a society as
27 defined in section 1 of the *Societies Act*, other than a member-
28 funded society as defined in section 190 of that Act, or an
29 association as defined in section 1 (1) of the *Cooperative*
30 *Association Act*, or

31 (B) the governing body of a first nation,

⁵ As the DSM Regulation stipulates, the updated value that FEI has used for the ZEEA in 2020 in the MTRC calculation is \$106/MWh, or \$29.45/GJ.

- 1 if the benefits of the reduction primarily accrue to
- 2 (C) the low-income households occupying the housing,
- 3 (D) a housing provider referred to in clause (A), or
- 4 (E) a governing body referred to in clause (B) if the households in
- 5 the governing body's housing are primarily low-income
- 6 households;
- 7 b) If the plan portfolio is introduced on or after June 1, 2009, a demand-side
- 8 measure intended specifically to improve the energy efficiency of rental
- 9 accommodations;
- 10 c) An education program for students enrolled in schools in the public utility's
- 11 service area;
- 12 d) If the plan portfolio is submitted on or after June 1, 2009, an education
- 13 program for students enrolled in post-secondary institutions in the public
- 14 utility's service area.
- 15 e) one or more demand-side measures to provide resources as set out in
- 16 paragraph (e) of the definition of "specified demand-side measure",
- 17 representing no less than
- 18 (i) an average of 1% of the public utility's plan portfolio's expenditures
- 19 per year over the portfolio's period of expenditures, or
- 20 (ii) an average of \$2 million per year over the portfolio's period of
- 21 expenditures;
- 22 f) one or more demand-side measures intended to result in the adoption by
- 23 local governments and first nations of a step code or more stringent
- 24 requirements within a step code.

25 Section 6 provides details regarding FEI's DSM programs for Low Income customers. FEI also

26 continues to deliver the Rental Apartment Efficiency Program (RAP) through its Residential and

27 Commercial programs as discussed in each of the respective Program Area sections (Sections 5

28 and 7). Sections 6 and 7 of the Report also provide details on a number of other Low Income and

29 Commercial energy efficiency programs that are available for use by owners of rental buildings,

30 including the Energy Specialist Program. In terms of education programs, FEI's School Education

31 Program, Commercial and Residential customer education programs, and other energy

32 conservation and education outreach initiatives are presented in Section 10.

33 FEI's DSM activities related to the codes and standards specified demand-side measure that are

34 the subject of paragraph e) above are considered enabling activities by FEI and are discussed in

35 Section 11. Finally, FEI's portfolio has supported the adoption of step codes in the Province in a

1 number of ways, particularly through the Residential and Commercial Program Areas as
2 discussed in Sections 5 and 7 respectively.

3 **2.4 COLLABORATION & INTEGRATION**

4 FEI continues to collaborate and integrate DSM programming among BC's largest energy utilities,
5 as well as with other entities such as governments and industry associations. The Company
6 recognizes that doing so will maximize program efficiency and effectiveness. Discussion of
7 collaborative activity is captured in the individual Program Area sections and program descriptions
8 found in Sections 5 through 11.

9 FEI, FortisBC Inc. (FBC) and British Columbia Hydro and Power Authority (BC Hydro)
10 (collectively, the BC Utilities) continued to collaborate on various programs and projects through
11 their voluntary Memorandum of Understanding (MOU), the purpose of which is to develop
12 enhanced utility integration in support of government legislation, policy, and direction. The BC
13 Utilities also continue to experience cost efficiencies from their collaboration efforts, including
14 streamlined application processes for customers, extended program reach and consistent and
15 unified messaging intended to improve energy literacy.

16 FEI, FBC, and EMLI continued to collaborate in 2022. FEI's collaboration with EMLI on CleanBC
17 programs includes administering incentives and enabling applications for EMLI's CleanBC
18 rebates through FEI's application processes to provide a streamlined customer experience. The
19 tables contained throughout the Report include only expenditure and savings information for FEI's
20 expenditure portfolio. They do not include EMLI's CleanBC expenditures nor the savings
21 attributed to EMLI's CleanBC incentives. In 2022, EMLI's CleanBC incentives were administered
22 alongside FEI incentives in the Residential Home Renovation Rebate Program, the Low Income
23 Prescriptive and Support Programs, and the Commercial Existing Building Performance Program
24 as noted in Sections 5, 6 and 7 respectively.

25 **2.5 SUMMARY**

26 FEI's DSM Portfolio met the goal of cost effectiveness with a Portfolio MTRC value of 1.5 in 2022.
27 The Company is of the view that both energy savings accounted for in the Portfolio and the
28 resulting TRC remain conservative. Benefits from non-incentive expenditures such as those
29 activities in the CEO and Enabling Program Areas play a particularly significant role in supporting
30 the development and delivery of programs, while creating a culture of conservation in British
31 Columbia. FEI continues to develop and maintain strong, collaborative relationships with other
32 BC utilities and government partners, as well as key market players in providing its portfolio of
33 DSM programs.

34

3. FUNDING TRANSFERS

The practice of transferring expenditure amounts within FEI’s DSM portfolio applies to the tracking of actual versus approved spending amounts for each of the Program Areas. It acknowledges that the approved expenditure amount is a forecast and that actual spending in each Program Area will inevitably vary from the forecast to some degree. A Program Area in which annual expenditures are somewhat less than plan has availability within its approved program expenditure envelope to balance against a Program Area that might spend somewhat more than its approved amount. This balancing or ‘transfer’ allows FEI to maximize the use of its total approved portfolio expenditure amount while managing the uncertainties and external factors that can impact program development and delivery. Decision and Order G-10-19 approved the continuation of FEI’s existing transfer rules that allow FEI to transfer amounts equal to or less than 25 percent of the approved Program Area funding limit without further approval from the BCUC. Throughout this report, expenditure tables that show 2022 Plan values report such values prior to consideration of the 2022 transfers discussed in this Section.

Carryover refers to any approved Program Area expenditure amount that was not spent in a given year (after accounting for funding transfers) and can therefore be spent in the following year within the approved DSM Plan timeframe. These amounts are ‘rolled over’ to the next years’ annual approved spending limit. The ability to roll funds over from one year to the next also provides flexibility for FEI to manage uncertainties and external factors that can impact program development and delivery – in this case by making unspent expenditure amounts in one year available to benefit customers in the next year. Decision and Order G-10-19 approved FEI’s request to carryover unspent amounts from one Program Area into the same Program Area in the next year without BCUC approval for the duration of the 2019-2022 DSM Plan. Since 2022 concludes the DSM Plan period, no funds were carried over into 2023.

Table 3-1 below shows that all Program Area transfers were within the 25 percent of the approved Program Area funding limit detailed in Decision and Order G-10-19 and did not exceed the approved 2022 Plan Expenditures (including 2021 carryover).

Table 3-1: Funding Transfers for 2022

Program Area	2022 Plan Expenditures (incl. 2021 Carryover*) (\$000)	2022 Actual Expenditures (\$000)	2022 Actuals less Plan Expenditures (incl. 2021 Carryover) (\$000)	2022 Funding Transfer Amount In (Out) (\$000)	Transfer as a percent of Approved (%)
Residential	34,815	43,264	8,449	8,449	24%
Commercial	19,800	16,675	-3,125	-3,125	-16%

1 **4. ADVISORY GROUP ACTIVITIES**

2 The Energy Efficiency and Conservation Advisory Group (EECAG) provides insight and feedback
3 on FEI's Portfolio of DSM activities and related issues. While EECAG provides input on both the
4 electric and natural gas portfolios for FBC and FEI (together, FortisBC), this section describes
5 those 2022 activities that mainly pertain to the FEI portfolio.

6 EECAG members may be invited based on their relevant subject matter expertise, representation
7 of a common interest shared by stakeholders, or representation of a particular organization/group
8 and/or interest. Examples include governments, regions, Indigenous communities, customers,
9 suppliers, industries, non-governmental organizations, research institutes and other groups that
10 have historically intervened in FEI's regulatory proceedings. Since the formation of the EECAG in
11 2009, FEI has gained valuable insight on DSM program design and implementation and
12 developed positive working relationships with stakeholders. EECAG input continues to be
13 instrumental as FEI moves forward with DSM activities, helping to ensure that efforts are aligned
14 with the interests and suggestions of stakeholders.

15 In 2022, FEI sought EECAG input over two partial day engagement sessions in May. These
16 sessions were hosted virtually and reduced to a few hours in length from the typical full-day
17 workshops hosted in previous years. The topic of the session was a presentation and discussion
18 on the proposed draft 2023-2027 FBC and 2023 FEI DSM expenditure plans. EECAG members
19 provided feedback on new concepts and generally supported the areas being considered for the
20 upcoming expenditure plans.

5. RESIDENTIAL PROGRAM AREA

5.1 OVERVIEW

The Residential Program Area reduced annual natural gas consumption by 262,336 GJ, achieving an overall MTRC of 1.7. \$43.3 million was invested in Residential energy efficiency programs in 2022, and 96 percent of this investment was incentive spending. Tables 5-1 and 5-2 summarize the expenditures for the Residential Program Area, including incentive and non-incentive expenditures and annual gas savings, as well as TRC/MTRC and other cost-effectiveness test results.

Residential programs serve over 954 thousand customers⁶ in the FEI service territories. For DSM purposes, these customers predominantly include those living in single-family homes, row houses, townhomes, or mobile homes⁷. Some in-suite measures, such as low flow fixtures and a small number of fireplaces and water heaters in multi-unit residential buildings are also included in this funding envelope.

For the 2019-2022 DSM Plan, the customer offerings for the Residential Program Area consist of consolidating measures within three overarching programs: Home Renovation, New Home, and Rental Apartment Efficiency. These programs enable FEI customers to reduce their energy consumption and support industry in improving overall home performance. The combination of rebates, policy support, customer and industry engagement is instrumental in driving a culture of conservation and fostering market transformation in the residential sector.

Table 5-1: Residential Energy Efficiency Program Area Results Summary - Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures	
	2022 Plan	2022 Actual	2022 Plan	2022 Actual	2022 Plan	2022 Actual
Home Renovation Program	24,345	26,937	1,425	956	25,770	27,893
New Home Program	7,502	14,293	750	623	8,252	14,916
Rental Apartment Efficiency Program	250	172	193	80	443	251
Non-Program Specific Expenses	0	0	350	203	350	204
ALL PROGRAMS	32,098	41,403	2,718	1,861	34,816	43,264

⁶ FEI Annual Review for 2020 and 2021 Rates, BCUC Order G-319-20 Compliance Filing.

⁷ Programs for Multifamily Dwellings served under Rate Schedule 2 or 3 are included in the Commercial Energy Efficiency Program Area (please refer to Section 7) with a few exceptions as noted.

Table 5-2: Residential Energy Efficiency Program Area Results Summary – Savings

Program Area	Incremental Annual Gas Savings, Net (GJ)		Benefit/Cost Ratios				
	2022 Plan	2022 Actual	TRC	MTRC	UCT	PCT	RIM
Home Renovation Program	186,682	194,011	0.6	1.8	0.8	1.4	0.2
New Home Program	27,706	54,270	0.4	1.4	0.5	1.5	0.2
Rental Apartment Efficiency Program	23,935	14,056	3.9	--	3.5	12.9	0.6
Non-Program Specific Expenses	Savings Not Estimated		Savings Not Estimated				
ALL PROGRAMS	238,323	262,336	0.5	1.7	0.7	1.9	0.4

Notes:

- Non-incentive expenditures consist of rebate administration, communications, evaluation, and labour expenditures.
- The 2019-2022 DSM Plan figures were adjusted in 2021. The 2022 Plan figures shown in Table 5-2 are the figures approved pursuant to Order G-301-21.

5.2 2022 RESIDENTIAL ENERGY EFFICIENCY PROGRAMS

This section outlines the specific Residential energy efficiency initiatives undertaken in 2022, including program and measure descriptions and a breakdown of non-incentive expenditures for each of the Home Renovations Rebate Program, the New Home Program, and the Rental Apartment Efficiency Program.

Home Renovation Rebate Program

Program Description	The program promotes energy-efficiency home retrofits in collaboration with BC Utilities, EMLI, as well as federal and municipal governments. In addition to rebates, initiatives include capacity building for trades, ensuring high quality installations and providing opportunities to promote home labeling through EnerGuide home evaluations.
Target Sub-Market	Residential
New vs. Retrofit	Retrofit
Partners	BC Hydro, FortisBC Inc., EMLI, Municipal and Federal Governments

Expenditures (\$000s)						
Home Renovation Rebate Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	24,345	200	100	125	1,000	25,770
2022 Actual	26,937	273	9	35	639	27,893

Participation		
Measure	2022 Plan	2022 Actual
Space Heating		
Furnace	8,682	16,290
Boiler	330	310
Combination System	990	1,097
Secondary Heating		
EnerChoice Fireplace	6,121	3,858
Water Heating		
0.67 EF Storage Tank Water Heater	2,000	927
Condensing Tankless Water Heater	7,000	5,451
Condensing Storage Tank Water Heater	100	29
Building Envelope		
Attic Insulation	1,500	1,880
Wall Insulation	250	219
Crawlspace and Basement Insulation	250	288
Other Insulation	100	86
Bonus Offers	2,720	4,529
Water Conservation and Retail measures		
Aerators & Showerheads	3,500	864
Draftproofing	20,000	9,001
ENERGY STAR Washer	2,000	495
ENERGY STAR Dryer	100	18
Other		
Drain Water Heat Recovery	100	0
Communicating Thermostat	5,473	4,505
Appliance Maintenance services	35,000	0
Total	96,216	49,847

1
2
3
4
5
6
7
8
9
10
11
12

Notes:

- The Home Renovation Rebate program encourages customers to take a whole home approach to their energy efficiency upgrades by consolidating space heating, water heating and building envelope measures into an overarching program. In 2022, this program was a collaboration between the BC Utilities and the EMLI CleanBC Better Homes Program.
- Despite the Double Rebate offer ending in 2021, the strong momentum for early replacement of existing furnaces did not decline and 187% of the participation target was achieved in 2022. However, as a result of the furnace rebate significantly exceeding participation targets, FEI decided to not offer incentives for Appliance Maintenance services in 2022.

- 1 • Emphasis continued to be placed on Furnace Quality Installation. Rebate eligibility
2 requirements include the installation of a two-pipe direct vent system and the completion
3 of a commissioning sheet. An ENERGY STAR Verified Installation pilot (ESVI), launched
4 in late 2019, which provides homeowners with a label that informs them that their
5 installation conformed to best practices⁸. Due to COVID-19 implications and the desire to
6 limit additional contractor time in the customers’ homes, this pilot activity slowed. This
7 provided the opportunity to launch the application software based on the commissioning
8 information used for ESVI and work with contractors to gain feedback and improve the
9 software further. A pilot for a commissioning sheet application was conducted with
10 contractors in 2022 with a planned launch for Trade Ally Network contractors in 2023. FEI
11 is continuing to evaluate energy savings associated with Quality Installation. Virtual and
12 onsite furnace inspections were conducted through the program to continue to support
13 quality installation and contractor education.
- 14 • Working with program partners, the Home Performance Stakeholder Council, and FEI’s
15 Trade Ally Network, FEI continues to promote the Home Performance industry through
16 trades outreach, training, development of accredited contractor directories, and site visits
17 for program compliance and quality installation. These activities provide value to
18 customers through increased performance and longevity of installed equipment and
19 improved comfort of their homes. Funding for these activities is outlined in Enabling
20 Activities Section 11.2.

21 **New Home Program**

Program Description	The New Home Program provides financial incentives in support of energy-efficient building practices for the Residential sector. The program supports the BC Energy Step Code and educates builders and consumers about the benefits of high performance new homes.
Target Sub-Market	Residential
New vs. Retrofit	New
Partners	BC Hydro, FortisBC Inc., Municipal, Provincial and Federal Governments

22

Expenditures (\$000s)						
New Home Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	7,502	130	45	25	550	8,252
2022 Actual	14,293	61	17	0	544	14,916

23

⁸ Please refer to Section 11, Enabling Activities for more information.

Participation		
Measure	2022 Plan	2022 Actual
BC Energy Step Code – Whole Home		
STEP 2 (Single Family Dwelling)	150	419
STEP 2 (Townhome/Rowhome)	20	295
STEP 3 (Single Family Dwelling)	500	1,251
STEP 3 (Townhome/Rowhome)	225	572
STEP 4 (Single Family Dwelling)	150	269
STEP 4 (Townhome/Rowhome)	185	102
Space and Water Heating Systems		
0.67 EF Storage Tank Water Heater	25	44
Tankless Water Heater	810	1,110
Condensing Storage Tank Water Heater	150	5

Drain Water Heat Recovery	150	3
Communicating Thermostat	500	711
HVAC Zone Controls	75	0
ENERGY STAR Dryer	0	37
TOTAL	4,340	6,649

1
 2 Notes:

- 3 • FEI, in collaboration with FBC, provides whole home incentives to align with the five tiers
 4 of the BC Energy Step Code for Part 9 buildings, as directed in the 2017 Amendment to
 5 the DSM Regulation. The amendment supports utilities' ability to provide incentives for
 6 builders who adopt the Energy Step Code in municipalities across BC.
- 7 • In fall 2020, the New Home Program provided enhanced incentives of \$2,000 per Step
 8 Code level. The improved incentives drove additional participation and will remain in
 9 market into 2023, allowing builders to plan for the incorporation of energy efficient
 10 measures and execute plans over the life of the project.
- 11 • BC Energy Step Code – Whole Home incentives supported 2,908 new homes for a total
 12 of \$11.6 million.
- 13 • Natural gas high efficiency equipment incentives supported 3,741 high-efficiency
 14 equipment installations totalling \$2.6 million in incentives.
- 15 • FEI's Design Offer is available to builders pursuing Step 3, 4 or 5 and is intended to
 16 educate and encourage higher performance construction and reduce builder time and risk.
 17 The Design Offer helps to offset the costs of engaging mechanical and building envelope

designers and for pursuing an integrated design process (IDP). This offer assists in building the capacity and education of these service providers. This offer is funded through the Codes and Standards budget (Table 11.1).

- FEI collaborates with FBC, BC Hydro, EMLI and BC Housing to provide education to builders and energy advisors, and support policy regarding high performance homes in BC. These funds are discussed further in Section 11 and shown in Table 11.1 in the Codes and Standards budget.

Rental Apartment Efficiency Program

Program Description	There are three components to this program. To start, participants are provided with direct install of in-suite energy efficiency upgrades completed by an agent of FortisBC. Next, participants are provided with energy assessments, which may recommend building-level energy efficiency upgrades such as condensing boilers, high efficiency water heaters and control upgrades. Lastly, participants are provided with support in implementing the energy efficiency recommendations and applying for rebates. In-suite related expenses are included in the Residential Program Area, while the common area related expenses, including the energy assessment, implementation support, and common area upgrades, are included in the Commercial Program Area.
Target Sub-Market	Rental Apartment Buildings
New vs. Retrofit	Retrofit
Partners	FBC

Expenditures (\$000s)						
Rental Apartment Efficiency Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	250	107	46	24	17	445
2022 Actual	171	47	0	30	3	251

Participation		
Measure	2022 Plan	2022 Actual
Aerators & Showerheads	19,303	12,579

Notes:

- Participation in 2022 was lower than anticipated due to several factors including heightened customer sensitivity to in-person interactions for the purpose of conducting the assessments and direct installs even after lifting many COVID-19 restrictions as well as a decreasing number of qualifying buildings.
- To address lower than anticipated participation in the RAP, FEI and FBC plan to complete a program redesign in 2023.

1 **5.3 SUMMARY**

2 Residential Program Area activity in 2022 resulted in over 262,336 GJ/yr of natural gas savings.
3 These programs enabled customers to increase their home's performance while reducing their
4 energy consumption. The program area continues to expand relationships with the trades and
5 builders for education on energy efficiency and quality installation. The combination of financial
6 incentives, policy support, contractor outreach, and customer education is instrumental to the
7 ongoing success of these programs in generating natural gas savings and fostering market
8 transformation in the residential sector.

6. LOW INCOME PROGRAM AREA

6.1 OVERVIEW

The Low Income Program Area serves low income customers, Indigenous housing, co-operative housing, non-profit housing, and charities that aid low income customers. In 2022, DSM investments in the Low Income Program Area were \$9.5 million and annual gas savings were 62,814 GJ/yr. Tables 6-1 and 6-2 summarize the planned and actual expenditures for the Low Income Program Area in 2022, including incentive and non-incentive expenditures and annual gas savings, as well as the cost-effectiveness test results. The TRC for Low Income programs uses the same inputs as the MTRC without impacting the MTRC Cap in accordance with the DSM Regulation.

The Program Area experienced higher than expected investments in the Direct Install Program and the Prescriptive Program which led to the filing and subsequent BCUC approval⁹ to increase the Program Area budget for 2021 and 2022. The planned figures in the tables below reflect the updated approved expenditures and savings.

Key highlights include:

- The Low Income Program Area performed well, exceeding 2021 expenditures of \$9 million while meeting 2022 Plan forecast savings targets.
- Participation in the Direct Install Program increased after declining during the COVID-19 pandemic. Further, FEI completed more comprehensive energy efficiency retrofits for participants, including manufactured homes.
- The Prescriptive Program, including offers for Indigenous communities, achieved lower than anticipated participation. While the program gained momentum in 2020 and 2021 with the Double Rebates offer, participation in 2022 declined and was similar to prior years.

Table 6-1: 2022 Low Income Program Results Summary – Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures	
	2022 Plan	2022 Actual	2022 Plan	2022 Actual	2022 Plan	2022 Actual
Direct Install Program	3,450	5,404	1,855	891	5,305	6,295
Self Install Program	585	334	76	59	661	393
Prescriptive Program	4,067	1,987	363	293	4,430	2,279

ALL PROGRAMS	8,363	7,835	3,901	1,719	12,264	9,554

⁹ BCUC Order G-301-21

Table 6-2: 2022 Low Income Program Area Results Summary – Savings

Program Area	Incremental Annual Gas Savings, Net (GJ)		Benefit/Cost Ratios				
	2022 Plan	2022 Actual	TRC	MTRC	UCT	PCT	RIM
Direct Install Program	10,971	16,136	1.1	1.1	0.2	1.6	0.2
Self Install Program	28,080	22,888	20.0	20.0	4.0	9.9	0.6
Prescriptive Program	25,077	23,790	4.6	4.6	1.2	3.0	0.4
Support Program	Savings Not Estimated		Savings Not Estimated				
Non-Program Specific Expenses	Savings Not Estimated		Savings Not Estimated				
ALL PROGRAMS	64,128	62,814	2.9	2.9	0.6	2.4	0.3

Notes:

- EMLI also contributed funds through their CleanBC programs towards some Low Income programs as noted in the partnership details in Section 6.2. EMLI funding is excluded from the above financials and energy savings.

More details for each of the programs within the Low Income Program Area follow.

6.2 2022 LOW INCOME PROGRAMS

This section outlines the specific Low Income programs undertaken in 2022, including program and measure descriptions and a breakdown of non-incentive expenditures for each of the Direct Install Program, Self Install Program, Prescriptive Program and Support Program.

Direct Install Program

Program Description	Recognizing that some low income customers do not have the expertise and/or physical capabilities to install energy efficient measures, this program aims to remove that barrier by having a program delivery agent/contractor perform the installation.
Target Sub-Market	Low income single family dwellings, row homes, manufactured homes and apartments
New vs. Retrofit	Retrofit
Partners	BC Hydro, FBC, EMLI

Expenditures (\$000s)						
Direct Install Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	3,450	583	729	174	369	5,305
2022 Actual	5,404	175	236	198	282	6,295

Participation		
Measure	2022 Plan	2022 Actual
Energy Conservation Assistance	2,300	3,319

1 Notes:

- 2 • The Direct Install Program achieved 119 percent of the expenditure target. Expenditures
 3 were driven by high participation, the installation of more comprehensive measures, such
 4 as insulation and furnaces, as well as the work completed in manufactured homes. This
 5 also resulted in achieving 147 percent of planned energy savings in 2022. Participation
 6 increased from 1,544 in 2021.

7
 8 **Self Install Program**

Program Description	Participants that have the capability to perform basic installations on their own can receive a bundle of basic energy efficiency measures to install by themselves.
Target Sub-Market	Low income home owners and renters
New vs. Retrofit	Retrofit
Partners	BC Hydro, FBC

9

Expenditures (\$000s)						
Self Install Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	585	8	51	5	13	661
2022 Actual	334	5	25	0	30	393

10

Participation		
Measure	2022 Plan	2022 Actual
Energy Savings Kit	13,000	14,924

11

12 Notes:

- 13 • The Self Install Program achieved 115 percent of the participation target. This is primarily
 14 due to re-engagement campaigns whereby previous participants receive additional energy
 15 saving measures such as window film, patio door film and caulking.

16 **Prescriptive Program**

Program Description	The program enables a straight-forward path towards a rebate for specific residential or commercial energy efficiency measure.
Target Sub-Market	Residential low income customers, Indigenous housing providers, non-profit housing providers, charities
New vs. Retrofit	New construction and retrofit
Partners	EMLI

17

Expenditures (\$000s)						
Prescriptive Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	4,067	12	18	0	333	4,429
2022 Actual	1,987	20	4	0	269	2,279

Participation		
Measure	2022 Plan	2022 Actual
Residential Retrofit		
Boiler	66	40
Furnace	628	403
Health and Safety	53	22
Insulation (Attic, Wall, and Other)	74	46
Thermostat	300	89
Ventilation	3	11
Water Heater	318	162
Windows and Doors	89	13
Residential New Construction		
STEP 2	15	0
STEP 3	15	5
STEP 4	13	3
Commercial		
Boiler	14	13
Bundled Measures	48	40
Furnace	41	50
Water Heater	22	46
TOTAL	1,700	943

1
 2 Notes:

- 3 • The Prescriptive Program achieved 51 percent of planned expenditures. Participation
 4 declined compared to 2020 and 2021 after the time-limited Double Rebates offer on select
 5 measures ended in 2021. Resource and capacity constraints that began during COVID-
 6 19 continue to be a barrier in the social housing sector.

7
 8 **Support Program**

Program Description	The program seeks to enhance energy efficiency retrofit skills, provide direction to non-profit housing providers looking at enhancing the energy efficiency of their housing stock and motivate behavioural change through education and engagement.
Target Sub-Market	Low income customers and non-profit housing providers
New vs. Retrofit	New construction and retrofit
Partners	BC Hydro, FBC, EMLI

9

Expenditures (\$000s)						
Support Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	261	0	0	0	25	286
2022 Actual	110	186	0	0	54	349

10

Participation		
Measure	2022 Plan	2022 Actuals
Residential Energy Efficiency Works	25	12
Non-Profit Custom Studies and Implementation Support	77	29
TOTAL	102	41

1 Notes:

- 2 • The Residential Energy Efficiency Works, an energy retrofit training offer for people facing
3 barriers to employment, was deployed in partnership with Wildsight and Kootenay Skills
4 Development Society in 2022. Participants contributed to making a group home, managed
5 by the Kootenay Society for Community Living, more comfortable and energy efficient.
- 6 • In 2022, housing providers faced challenges with post COVID-19 pandemic staffing, cost
7 pressures due to inflation, and supply chain disruptions. These factors contributed to
8 delayed projects and resulted in less funding provided for energy studies and
9 implementation support.

10 **6.3 SUMMARY**

11 In spite of some programs having lower than anticipated participation, the Low Income Program
12 Area achieved the highest ever investment to date with \$9.5 million in expenditures and 62,814
13 GJ/yr gas savings. This was primarily due to the robust performance of the Direct Install Program
14 and supported by the continued investment in the Prescriptive Program, which encompasses
15 offers for income qualified residential customers, charities, and non-profit housing providers,
16 including Indigenous communities.

7. COMMERCIAL PROGRAM AREA

7.1 OVERVIEW

In 2022, Commercial energy efficiency programs continued to encourage commercial customers to reduce their overall consumption of natural gas and associated energy costs. The Commercial Program Area reduced annual natural gas consumption by approximately 328,904 GJ annually and achieved an overall TRC of 1.4. \$16.7 million was invested in Commercial energy efficiency programs, of which 80 percent was incentive spending.

Key highlights include:

- The Gas Absorption Heat Pump offer in the Prescriptive Program was launched in June 2022.
- In 2022, FEI continued to administer EMLI's CleanBC incentives supporting non-cost effective commercial natural gas energy efficiency projects that were not eligible for existing FEI programs. In March 2022, EMLI advised FEI that it will disconnect from FEI's Commercial Programs and would no longer incent natural gas-related measures that are not cost effective. EMLI and FEI agreed to set the deadline of September 2023 for payment of any implementation incentives for projects that had been issued commitment letters and were already being implemented by the customers.

Table 7-1: 2022 Commercial Energy Efficiency Program Results Summary – Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures

2

3 **7.2 2022 COMMERCIAL ENERGY EFFICIENCY PROGRAMS**

4 This section outlines the specific Commercial Energy Efficiency programs undertaken in 2022,
5 including program and measure descriptions and a breakdown of non-incentive expenditures for
6 each of the Prescriptive Program, Performance Programs (Existing and New Buildings) and
7 Rental Apartment Efficiency Program.

8 **Prescriptive Program**

Program Description	This program provides rebates for the installation of high efficiency natural gas equipment, heat-loss reduction items and controls. Simple rebates are provided for equipment and products that meet specific performance standards. The program makes use of midstream and downstream rebate delivery approaches, as warranted by the particularities of each appliance type and the market it is intended to serve.
Target Sub-Market	All commercial sub-sectors
New vs. Retrofit	New construction and retrofit
Partners	FBC

9

Expenditures (\$000s)						
Prescriptive Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	6,500	314	130	38	218	7,200
2022 Actual	4,844	188	240	0	1,047	6,320

10

Measure	2022 Plan	2022 Actual
Condensing Boiler	280	200
Mid Efficiency Boiler	6	13
Water Heater	200	169
Deep Fryer	73	30
Large Vat Deep Fryer	8	8
Griddle	31	1
Combination Oven	10	32
Convection Oven	54	9

Measure	2022 Plan	2022 Actual
Rack Oven	4	3
Conveyor Oven	8	0
Steam Cooker	6	1
Hydronic additives	0	22
Condensing Make Up Air Unit	109	13
Furnace Replacement (Baseline: Std.)	100	40
Furnace Replacement (Baseline: Mid)	100	49
HVAC Controls	24	6
Condensing Unit Heaters	101	0
Vortex Deaerators	19	0
Gas Infrared heater	0	30
Air curtains	10	6
Pipe and Tank Insulation	10	26
Steam Boilers	10	2
Steam Traps	10	2
Steam Trap Survey	10	0
Contractor SPIFF	100	98
TOTAL	1,195	760

- 1
 2 Notes:
- 3 The measures with the most significant deviation from the 2019-2022 DSM Plan are the following:
- 4 • Condensing Boiler, Water Heater and Condensing Unit Heater offers saw participation
 5 lower than Plan forecast.
 - 6 • Hydronic Additives, Gas Infrared Heater, Pipe and Tank Insulation, Condensing Make Up
 7 Air Units, Steam Boilers, Vortex Deaerators, HVAC Controls and Steam Trap offers saw
 8 participation lower than Plan forecast. FEI has identified opportunities for promotion and
 9 marketing of these measures in 2023 to increase awareness of the offers.
 - 10 • Commercial kitchen/restaurant measures continued to have mixed performance
 11 compared to Plan forecast. While measures such as Combination Ovens had Participation
 12 higher than Plan forecast, Convection Ovens and Griddle measures had Participation
 13 lower than Plan forecast.

1 Performance Program – Existing Buildings

Program Description	<p>The program provides incentives to encourage participants to pursue a performance based approach to achieving natural gas savings in existing buildings. The program encourages detailed analysis of integrated energy saving measures to help identify all technically feasible and cost effective energy savings, and then follows up by providing support for the implementation of those measures.</p> <p>The program also includes FEI's recommissioning offer jointly administered with BC Hydro and FortisBC to identify and implement low- and no-cost measures to optimize existing heating, ventilation, and cooling systems.</p>
Target Sub-Market	Medium to large commercial, institutional and multifamily residential
New vs. Retrofit	Retrofit
Partners	FBC, BC Hydro

2

Expenditures (\$000s)						
Performance - Existing Buildings	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	5,700	359	12	31	198	6,300
2022 Actual	4,776	170	5	97	331	5,378

3

Participation		
Measure	2022 Plan	2022 Actual
Studies - Retrofit	76	75
Capital Upgrades - Retrofit	39	24
Recommissioning - Studies	82	56
Recommissioning - O&M	39	43
Commercial Energy Assessments	76	151
TOTAL	311	349

4

5 Notes:

- 6
- 7
- 8
- 9
- 10
- 11
- 12
- 13
- 14
- FEI administered EMLI's CleanBC incentives supporting non-cost effective commercial natural gas energy efficiency projects that were not eligible for existing FEI programs. EMLI discontinued support for those measures in 2022. The cost for administering additional EMLI CleanBC offers are accounted for separately and are not included in the program reporting herein.
 - Towards year-end, some "Capital Upgrades – Retrofit" participants informed FEI that the completion of their projects was delayed due to supply chain issues triggered by the COVID-19 pandemic and inflationary pressures. Thus, several projects forecast to complete in 2022 are now planned for 2023.

1 **Performance Program – New Buildings**

Program Description	The program provides incentives to encourage participants in pursuing a performance based approach to achieving natural gas savings in new buildings. The program encourages detailed analysis of integrated energy saving measures to help identify technically feasible and cost effective energy savings, and then follows up by providing support for the implementation of those measures. The program provides pathways for both buildings subject and not subject to the BC Energy Step Code.
Target Sub-Market	Medium to large commercial, institutional, and multifamily residential
New vs. Retrofit	New construction
Partners	FBC

2

Expenditures (\$000s)						
Performance - New Buildings*	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	4,000	298	10	27	165	4,499
2022 Actual	3,190	189	1	213	144	3,737

3

Participation		
Measure	2022 Plan	2022 Actual
BC Energy Step Code - Whole Building	6	12
Non-BC Energy Step Code - Whole Building	3	24
Early Engagement	12	0
Non-BC Energy Step Code - Engineered	29	0
BC Energy Step Code Capacity Building - Charrettes	1	0
TOTAL	51	36

4

5 Notes:

- 6
- 7
- 8
- 9
- 10
- 11
- 12
- The Performance Program – New Buildings was below plan in 2022 for incentives and savings. However, beginning in mid-2022, the program experienced an increased intake of projects for which agreements have been issued for the customers to proceed with energy modelling. FEI expects increased participation beginning in 2023.
 - FEI continued outreach activities to architects, engineers, developers, and energy modellers in 2022 and the increased intake of projects in the second half of the year is a result of these outreach activities.

Rental Apartment Efficiency Program (RAP)

Program Description	There are three components to this program. To start, participants are provided with direct install of in-suite energy efficiency upgrades completed by an agent of FortisBC. Next, participants are provided with energy assessments, which may recommend building-level energy efficiency upgrades such as condensing boilers, high efficiency water heaters and control upgrades. Lastly, participants are provided with support in implementing the energy efficiency recommendations and applying for rebates. All in-suite related expenses are included in the Residential Program Area, while the common area related expenses, including the energy assessment, implementation support, and common area upgrades, are included in the Commercial Program Area.
Target Sub-Market	Rental Apartment Buildings
New vs. Retrofit	Retrofit

Expenditures (\$000s)						
Rental Apartment Efficiency Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	650	210	77	32	31	1,000
2022 Actual	472	143	4	28	20	667

Participation		
Measure	2022 Plan	2022 Actual
Energy Assessments	70	76
Implementation Support Partial	3	2
Implementation Support Full	15	33
Condensing Boilers	15	6
Water Heaters	3	0
Recirculation Controls	58	1
TOTAL	162	118

Notes:

- 2022 was another challenging year for the Rental Apartment Efficiency Program due to COVID-19 and a decreasing number of qualifying buildings. As a result, this program achieved incentives and savings lower than Plan forecasts. However, FEI achieved higher than planned participation for Energy Assessment and Full Implementation Support components of this program.
- To address lower than anticipated participation in the RAP, FEI and FBC intend to conduct a program redesign in 2023.

7.3 SUMMARY

Commercial Program Area activity in 2022 resulted in approximately 328,904 GJ/yr of natural gas savings. These programs enabled commercial and institutional customers to conduct both simple and comprehensive energy efficiency upgrades at their buildings. The combination of financial

- 1 incentives, consultant and contractor outreach, and effective marketing in these programs is
- 2 instrumental to the ongoing success of these programs in generating natural gas savings and
- 3 fostering market transformation in the commercial sector.

8. INNOVATIVE TECHNOLOGIES PROGRAM AREA

8.1 OVERVIEW

A primary objective of the Innovative Technologies Program Area is to identify technologies that are not yet widely adopted in British Columbia, and that are suitable for inclusion in the Portfolio of ongoing DSM programs in other Program Areas. This is accomplished through pilot and demonstration projects, pre-feasibility studies and the use of Industry Standard Evaluation, Measurement and Verification (EM&V) protocols to validate manufacturers' claims related to equipment and system performance. Results from Innovative Technologies activities are used in making future DSM programming and technology inclusion decisions.

All 2022 activities undertaken in this Program Area meet the definition of technology innovation programs as set out in the DSM Regulation. It should be noted that Innovative Technologies are considered a "specified demand-side measure", meaning that the Program Area or the measures therein are not subject individually to a cost-effectiveness test. Instead, the cost effectiveness of these expenditures is evaluated as part of the DSM Portfolio as a whole. Innovative Technologies expenditures are also not subject to the MTRC cap set out in subsection 4(4) of the DSM Regulation according to Request for Clarification of Order G-44.

Table 8-1 summarizes expenditures for the Innovative Technologies Program Area in 2022, including incentive and non-incentive expenditures.

Table 8-1: 2022 Innovative Technologies Program Area Results Summary – Expenditures¹⁰

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures	
	2022 Plan	2022 Actual	2022 Plan	2022 Actual	2022 Plan	2022 Actual
Technology Screening	0	0	851	321	851	321

ALL PROGRAMS	0	5,720	13,214	4,153	13,214	9,873

8.2 2022 INNOVATIVE TECHNOLOGIES ACTIVITIES

This section outlines the specific Innovative Technologies Screening, Pilot Projects and Deep Energy Retrofit activities undertaken in 2022, including program and measure descriptions and a breakdown of non-incentive expenditures for each area.

¹⁰ In 2022, the Innovative Technologies Program Area received approval from the BCUC to increase the total budget to \$11.871 million to explore deep energy retrofits and gas heat pump technologies.

1 Technology Screening

Program Description	Technology screening activities include conducting prefeasibility studies, small field demonstrations or lab tests in order to understand the availability of the technology, applicable codes and testing standards, current adoption rate, technical barriers, measure assumption data and to determine the market opportunity. The data is used to determine whether the technology meets the requirements of a technology innovation program as defined in the DSM Regulation and is also used to determine the feasibility of launching a pilot or to make future Program Area inclusion decisions.
Target Market	Variable
New vs. Retrofit	Variable
Gas AMI (Advanced Metering Infrastructure)	The objective of this prefeasibility study was to assess the energy and non-energy benefits of implementing advanced metering infrastructure for residential application. The study recommended different pathways to utilizing gas AMI data for energy efficiency behaviour changes. In addition, the study also looked at the benefits of gas AMI for potential demand response programs. The study results will be handed off in Q1 2023 to the portfolio and communications managers. A pilot is being considered for 2023 to look further in to demand response.
Engine Driven Heat Pumps & Supplemental Cooling	The objective of this prefeasibility study was to identify the energy savings and non-energy benefits of engine driven heat pumps and supplemental cooling for commercial buildings. Study results were handed off in Q4 2022. A pilot is planned in 2023 to validate energy savings, customer acceptance and the installation process of this technology.
Hybrid Systems	The hybrid systems prefeasibility study was initiated to build off the 2021 prefeasibility study on hybrid system controls. It was determined in the original study that further research into the different hybrid system configurations was needed. In the study FEI looked at the energy savings and non-energy benefits of the different hybrid systems and which was more beneficial for implementation. Study results will be handed off in Q1 2023. A pilot is planned for 2023 to validate the energy savings, customer acceptance and installation process.
Thermal Imaging	The objective of this prefeasibility study was to identify the energy savings and non-energy benefits of a residential thermal imaging program and the different methodologies available for implementation. The results of the study identified program opportunities to educate customers on their homes heat lose while directing them to improvement measures they could implement. Study results were handed off in Q4 2022 with next steps to investigate thermal imaging companies to learn more about their services.
Gas Appliance Power Source Backup	The gas appliance power source backup prefeasibility study looked at the potential resiliency technologies that would support a gas appliance during the loss of grid power. The intention was to consider the potential energy savings of being able to run your gas appliances during a black/brown out in order to eliminate or reduce a snap back in gas appliance consumption. Study results were handed off in Q4 2022 acknowledging this technology would not meet DSM requirements as currently installed as a separate measure but showed promise for resiliency and future consideration if built directly into energy efficient gas appliances.
Warm Mix Asphalt	FEI conducted a revised market study of warm mix asphalt additives to validate opportunities to pilot, verify, and support broader education and awareness activities. Results were handed in off in Q4 2022. A demonstration project is planned for 2023 to verify energy savings and customer acceptance.
Gas Heat Pump Lab Testing: Thermal Compression Heat Pump Technology	FEI provided funding for a European gas heat pump manufacturer in partnership with the Natural Gas Innovation Fund to conduct efficiency and performance lab testing for a residential gas heat pump to support the business case for expansion into the North American market.

Gas Heat Pump Lab Testing: Residential Gas Absorption Heat Pump	FEI is providing funding to the Gas Technology Institute to test and verify system performance for both a residential and commercial gas absorption heat pump manufacturer to support the business case for expansion into the North American market. Results expected Q3 2023.
North American Gas Heat Pump Collaborative	FEI is a founding member of the North American Gas Heat Pump Collaborative. In 2022, FEI provided funding to support manufacturer engagement opportunities to advance gas heat pumps in the residential sector. Funding activities will span across 2022-2023 and will be utilized to inform strategic communication and education strategies for contractors and customers to support the adoption of gas heat pump technologies.

1

Expenditures (\$000s)						
Technology Screening	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	300	501	0	0	50	851
2022 Actual	0	273	0	0	48	321

2

3 Pilot Project Expenditures

Program Description	Pilot project activities focused on conducting field demonstrations to gather data and validate manufacturer's claims about measure system performance and energy savings. The data from pilots can also be used to help improve the quality and installation of future systems, and to understand and reduce market barriers. Technologies that successfully emerge from Innovative Technologies pilot projects are considered for inclusion in the various Program Areas within the larger C&EM portfolio.
Target Market	Variable
New vs. Retrofit	Variable
Carbon Capture Pilot	FEI partnered with CleanO2 to test and demonstrate energy efficiency and GHG reduction for 10 carbon capture and conversion technology installations in the Lower Mainland and Vancouver Island. The pilot will test if the CleanO2 Carbon Capture Technology can meet the energy conservation and greenhouse gas (GHG) reduction objectives of commercial and small business clients. In 2022, FEI collected measurement and verification data for one site. In 2023, FEI plans to install three additional systems. Pilot results are expected Q1 2025.
	2022 Participants Total 0
Commercial Gas Absorption Heat Pump Pilot	FEI further investigated an existing participant site to identify system performance enhancements for both domestic hot water and space heating applications. Pilot results are summarized in Table 12.2: Summary of Key Findings and Methodology for 2022 Completed C&EM Program Evaluation Studies.
	2022 Participants Total 1
Gas Technology Institute: Residential Gas Absorption Heat Pump Water Heater Pilot	FEI is funding Gas Technology Institute's North American Residential Gas Heat Pump Water Heat Pilot ("GHPWH") evaluating a GHPWH prototype for residential applications. The GHPWH will be an 80-gallon tank with efficiencies greater than 100%. Collectively, the pilot project intends to install 61 GHPWH across North America with 10 units being installed in FEI's service territory. The overall end goal is to provide evaluation results to support DSM program development and commercialization of gas heat pump water heaters. Due to manufacturing delays this pilot was put on hold for 2022 and will be reassessed in Q1 2023.
	2022 Participants Total 0

Residential Gas Absorption Heat Pump Pilot (“RGHP”)	FEI is evaluating the energy savings, installation, and customer acceptance of a pre-production residential gas absorption heat pump unit for residential space and water heating applications. In 2022, FEI provided incentives to procure ten pre-production gas heat pumps and completed nine installations with the final site targeting completion in Q1 2023. Measurement and verification will occur from Q1 2023 to Q1 2024. Pilot results are expected Q1 2024. Post evaluation of the pre-production unit, the Manufacturer will be responsible to replace the unit with a certified market ready product.	
	2022	Participants
	Total	10
Step 5 Homes Pilot	The objective of the pilot is to evaluate incremental costs and customer acceptance of achieving Step 5 of the BC Energy Step Code utilizing natural gas energy efficiency measures to support the Residential New Construction program development. In 2022, there were twelve Single-family Dwelling and two Multi-family Dwelling applicants.	
	2022	Participants
	Total	14
Thermal Compression Heat Pump Pilot (“TCHP”)	FEI is evaluating the energy savings, installation and customer acceptance of a thermal compression heat pump (TCHP) prototype for residential space and water heating applications. The objective of the pilot is to install up to ten units in residential homes and to evaluate the system performance over a one-year period. In 2022, three TCHP prototypes were successfully installed, however, challenges identified in the commissioning and operation stage inhibited the gathering of measurement and verification data and continuation of the installs for the remaining seven sites. The manufacturer is establishing a plan to address those learnings that will be reviewed and assessed prior to recommencement of the pilot.	
	2022	Participants
	Total	3
Commercial Gas Heat Pump Pilot: Heritage Gas	FEI is funding a commercial gas absorption heat pump pilot with Heritage Gas to identify the energy savings, installation and customer acceptance of a pre-commercial gas absorption heat pump technology. Results are expected in Q2 2023.	
	2022	Participants
	Total	0
Gas Technology Demonstration Pilot (“GTD”)	The Gas Technology Demonstration (“GTD”) pilot provides funding to FEI Energy Specialists and Climate Action Partners to explore innovative technologies through three main offerings: Technology Feasibility Study, Technology Demonstration, and Technology Measurement and Verification. In 2022, GTD provided funding for LUX laundry, solar wall and solar thermal systems, integrated fault detection and diagnostic systems, and innovative retrofit window replacements.	
	2022	Participants
	Total	5

1

Expenditures (\$000s)						
Pilot Project Expenditures	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	1,097	800	0	500	50	2,447
2022 Actual	877	724	0	454	49	2,104

2

1 Deep Energy Retrofits

Deep Retrofit Demonstration – Commercial	FEI in partnership with the City of Vancouver, BC Housing and BC Non-profit Housing Association are identifying the feasibility of reducing up to 80 per cent of greenhouse gas emissions in an existing multi-unit residential building by undergoing a comprehensive deep energy retrofit utilizing natural gas energy efficiency. In 2022, FEI completed several project milestones including the selection of both a pilot participant and a prime consultant to initiate detailed design. A building condition assessment was completed to identify the building's current state and highlight the greatest opportunities for energy and non-energy upgrades. In addition, FEI conducted measurement and verification analysis to establish baseline energy consumption, occupant comfort and indoor air quality metrics. Furthermore, FEI supported the development of a tenant communications strategy including funding support of a tenant liaison position to lead building logistics and tenant communications efforts during the project. In 2022, the project completed detailed and schematic design. In 2023, activities will involve procurement of a general contractor to support construction activities throughout 2023-2025. Completion of the retrofit construction and evaluation results is expected by Q4 2025.						
Drone Assisted Thermographic Study	The objective of this study is to identify the efficiency opportunities of utilizing innovative thermal imaging drone technologies compared to standard thermal imaging equipment. Study results provided insights into the advantages and limitations for thermal drones and were handed off in Q4 2022 to inform future deep energy retrofit assessments.						
Deep Retrofit Implementation Approaches Study	The objective of this study is to understand the various design and construction methods of which a retrofit building project could be delivered and how these methods could impact a project to optimize the customer experience through a pilot program. Study results expected Q1 2022.						
Deep Energy Retrofit Energy and Cost Modelling Study	The two objectives of this study were to identify and evaluate all industry accepted energy modelling platforms as well as understand the potential cost of a deep energy retrofit for both Single Family Dwelling (SFD) and Multi-Unit Residential Buildings (MURB). The result of this study was used in developing the business case for the deep energy retrofit pilot.						
Deep Energy Retrofit Pilot- Part 3 Commercial and Part 9 Residential buildings	<p>FEI is evaluating the potential energy savings, GHG emission reduction, customer and industry acceptance and implementation challenges of deep energy retrofits for FEI's residential and commercial natural gas customers. This pilot focuses on two streams. The first stream is Part 3 Multi-Unit Residential Buildings (MURB) and the second stream is Part 9 Single Family Dwellings (SFD), all located in BC Climate Zones 4, 5 and 6. The business case for this pilot program was developed and approved and the contract with two individual implementation contractors was awarded in 2022. In addition, recruitment activities were completed to drive participation as highlighted below. The balance of activities in the pilot program are planned for 2022 through the end of 2025.</p> <table border="1" data-bbox="479 1297 803 1402"> <tr> <td>2022</td> <td>Participants</td> </tr> <tr> <td>Total</td> <td>Residential 20</td> </tr> <tr> <td>Total</td> <td>Commercial 4</td> </tr> </table>	2022	Participants	Total	Residential 20	Total	Commercial 4
2022	Participants						
Total	Residential 20						
Total	Commercial 4						
Reframed Initiative Partnerships	FEI has entered into a partnership with Pembina Institute to promote a natural gas based deep energy retrofit pathway with Pembina Institute's Reframed Initiative. The Reframed Initiative is a partnership between Pembina Institute, City of Vancouver, BC Housing and BC Non-profit Housing Association with the main objective to bring together the construction industry, building owners, policy makers, and the financial sector to scale up deep retrofits.						

2

Deep Retrofit	Expenditures (\$000s)					TOTAL
	Incentives	Administration	Communication	Evaluation	Labour	
2022 Plan	6,863	1,200	125	30	230	8,448
2022 Actual	4,843	1,158	114	21	215	6,351

3

4

1 Notes:

- 2 • In 2021, the Innovative Technologies program area received BCUC approval for additional
3 expenditures to expand technology research and evaluation for deep energy retrofits.
4 However, some planned expenditures were delayed into 2023 due to procurement
5 challenges, participant approval requirements, and construction document redesign.

6 **8.3 SUMMARY**

7 Innovative Technologies represent a key component of FEI's overall commitment to DSM
8 activities by identifying viable technologies and projects that have the potential to support the
9 development of new programs within the larger DSM Portfolio. Overall, the Innovative
10 Technologies initiatives achieved results in evaluating the feasibility of new technologies and
11 providing insights used towards the design of future DSM programs. The Innovative Technologies
12 Program Area continues to use consistent criteria to screen technologies for further development
13 as full programs in other areas of the DSM Portfolio.

14 The Innovative Technologies Program Area conducted several technology screenings, pilot
15 projects, and deep energy retrofit activities as noted in Section 8.2 above, to investigate innovative
16 solutions to reduce emissions in existing buildings by over 50 percent and to support the
17 commercialization of natural gas heat pumps whereby the technologies can achieve system
18 efficiencies greater than 100 percent.

19 The completed research from the Innovative Technologies Program Area helped transition
20 commercial gas absorption heat pumps into FEI's first commercial gas heat pump rebate
21 program. Furthermore, the team was recognized for their leadership in the evaluation and
22 advancement of gas heat pumps across the Pacific Northwest and was the recipient of the
23 Northwest Energy Efficiency Alliance's 2022 Leadership in Energy Efficiency Award for
24 Innovation.

9. INDUSTRIAL PROGRAM AREA

9.1 OVERVIEW

In 2022, the Industrial Program Area continued to encourage industrial customers to use natural gas more efficiently, achieving an overall TRC of 2.2. As a result, net natural gas savings of approximately 442,205 GJ/yr were achieved. Table 9-1 summarizes expenditures for the Industrial Energy Efficiency Program Area in 2022, including incentive and non-incentive spending, annual and NPV gas savings, as well as all cost-effectiveness test results.

The Industrial Program Area experienced a stronger performance in 2022, compared to 2021, in terms of program expenditure and savings, however year-end results were below 2022 Plan forecast. This was due to some projects not completing as planned in 2022 which only became evident near year-end. The most common reasons for delay were supply chain issues, inflationary cost pressures, and events that were outside of the participants' control. As a result, total expenditure and savings in the Industrial Program Area were below plan in 2022.

Table 9-1: 2022 Industrial Energy Efficiency Program Results Summary – Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures

Prescriptive Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	3,000	4	4	50	53	3,110
2022 Actual	2,258	25	0	0	88	2,371

Participation		
Measure	2022 Plan	2022 Actual
Process Boiler (Hot Water)	12	5
Thermal Curtains	14	8
Condensing and Infrared Heaters	49	81
Steam Traps Survey	3	0
Steam Traps Replacement	13	2
Insulation (Pipe and Tank)	30	5
Steam Boiler Measures	13	8
Air Curtains	0	4
Direct Contact Water Heater	0	2
Domestic Hot Water Recirculation Controls	0	1
Hydronic Additives	0	3
Combination Oven	0	1
Contractor SPIFF	0	67
TOTAL	134	187

Notes:

- The total 2022 participation for the prescriptive rebate offer was above Plan forecast. Towards year-end, a number of customers informed FEI that the completion of their projects was delayed due to supply chain issues and inflationary pressures, thus prescriptive rebate offer expenditures for 2022 were below target.

Strategic Energy Management Program

Program Description	A comprehensive approach to energy management to achieve sustainable energy and cost savings over the long term for larger FEI natural gas industrial customers. Components include operation energy analytics, energy expert expertise and support, assistance with applications for other program offers, industry collaboration and support for conservation initiatives. Includes pay-for-performance aspect for verified energy savings at the end of the program period or for achieving identified milestones.
Target Sub-Market	Large and medium industrial facilities
New vs. Retrofit	Retrofit
Partners	BC Hydro, FBC

Expenditures (\$000s)						
Strategic Energy Management Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	355	13	13	53	74	507
2022 Actual	509	2	0	0	29	540

Participation		
Measure	2022 Plan	2022 Actual
Individual, Large Customer	5	5
Cohort, Medium Customers	10	34
TOTAL	15	39

1
 2 Notes:

- 3 • FEI offers Strategic Energy Management (SEM) as a supplementary offer to the SEM
 4 program offered by BC Hydro and FBC. FEI’s SEM support is focused on natural gas
 5 efficiency for participants who are already enrolled in BC Hydro’s SEM program and FBC’s
 6 pilot program who consume significant volumes of natural gas.
- 7 • FEI offered natural gas efficiency support to five BC Hydro SEM cohorts (BC Hydro Cohort
 8 1, 2, 3, 5 and the Industrial Energy Manager cohort), as well as one cohort joint with FBC
 9 in the FortisBC Shared Service Territory (SST).
- 10 • The SEM program experienced higher than anticipated energy savings due to strong
 11 customer participation in SEM activities all cohorts.

12 **9.3 SUMMARY**

13 Industrial Energy Efficiency Program Area activity in 2022 resulted in approximately 442,205
 14 GJ/yr of natural gas savings. These programs enabled industrial customers to conduct both
 15 simple and comprehensive energy efficiency upgrades at their facilities. The combination of
 16 financial incentives, increased Point-of-Sale trade ally partners, the SEM program, and effective
 17 marketing in these programs is instrumental to the ongoing success of these programs in
 18 generating natural gas savings and fostering market transformation in the industrial sector.

10. CONSERVATION EDUCATION AND OUTREACH INITIATIVES

10.1 OVERVIEW

The CEO Program Area continues to support the DSM Portfolio goals of energy conservation in a variety of ways. Several initiatives and campaigns were undertaken or continued in 2022, which provided behaviour change nudges to positively influence customer attitudes on energy efficiency. Educating and informing all types of customers and students (who are future customers) remains a strong priority. FEI is continuing to ensure steps are taken to ensure the information provided is relevant and timely. Table 10-1 presents the CEO expenditures for 2022.

Table 10-1: 2022 CEO Initiative Results Summary – Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures	
	2022 Plan	2022 Actual	2022 Plan	2022 Actual	2022 Plan	2022 Actual
General Residential Education Program	0	0	3,213	4,985	3,213	4,985
Residential Customer Engagement Tool	0	0	3,952	1,191	3,952	1,191

1 **10.2 2022 CEO PROGRAMS**

2 **Residential General Education Program**

Program Description	<p>This program provides information to Residential customers and the general public on natural gas conservation and energy literacy by seeking opportunities to engage with customers directly (either face-to-face or through online tools). This audience includes Low Income and multilingual customers.</p> <p>Promotional activities include a multimedia general rebates awareness campaign, engagement campaigns, and participation in home shows and community events. This Program also includes the production of energy efficiency education materials and prizeing for events, which are used to start conversations and further engage audiences.</p> <p>FEI's partnership with Empower Me focused on reaching non-English speaking customers to drive participation to FortisBC's rebate programs. Collaborations between internal departments and FortisBC Inc. continue to be sought to achieve cost efficiencies in the budget, particularly for advertising and outreach events.</p> <p>FEI will continue to focus on behavioural change opportunities that may result in energy savings.</p>
Target Sub-Market	Residential, local governments and general public
New vs. Retrofit	New construction and retrofit
Partners	BC Hydro, FBC, local governments

3

Expenditures (\$000s)						
General Residential Education Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	555	2,218	116	325	3,213
2022 Actual	0	428	3,798	0	759	4,985

4

5 Notes:

- 6
- 7
- 8
- 9
- 10
- 11
- 12
- 13
- 14
- Higher than anticipated expenditures are attributed to an increase in communications resources and pre-purchasing paid media for Q1 2023 to ensure a sustained presence in market for the “We’ve got rebates” campaign.
 - FEI, in partnership with BC Hydro, continued to partner with Empower Me, focusing on income-qualified non-English speaking customers driving participation in the utility’s income qualified programs. Participants also learned about their utility bills, safety, and behaviour change initiatives to help them save energy and money.
 - FortisBC continued with its “We’ve got rebates” general marketing campaign which continued to increase awareness of its rebate programs.

15

1 Residential Customer Engagement Tool Program

Program Description	<p>This program provides customers with an online portal and home energy reports where customers can access targeted energy conservation content. Other engagement measures may be included in future years to foster behavior change.</p> <p>FortisBC's Customer Engagement Tool, My Energy Use, is an enhancement to Account Online providing customers with a better understanding of their home's energy use. Through the My Energy Use portal, customers can receive personalized insights into their individual home energy use, rebates, and earn reward points for participating in energy-savings activities. Through the portal, FortisBC is able to use the data collected to enhance program recruitment and participation in its programs. In addition to the portal, FEI sent six home energy reports during the year to approximately 80,000 customers. The reports help customers understand their energy usage in comparison to energy used by comparable homes and encourages customers to reduce their energy use through actionable advice.</p>
Target Sub-Market	Residential
New vs. Retrofit	Retrofit
Partners	FBC

2

Expenditures (\$000s)						
Residential Customer Engagement Tool	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	2,861	715	51	325	3,952
2022 Actual	0	997	0	100	94	1,191

3

4 Notes:

- 5 • Lower than anticipated expenditures are a result of the program launch being delayed into
 6 late 2020 and cascading impacts year-after-year. As a result, the program expenditures
 7 are lower than Plan forecasts.

8

9 Commercial Education Program

Program Description	<p>This program provides ongoing communication and education about energy conservation initiatives, as well as encourages behavioural changes to help Commercial customers reduce their organization's energy consumption. The Commercial sector is made up of small and larger businesses in a variety of sub sectors such as retail, offices, multi-family residences, schools, hospitals, hospitality services and municipal/institutions.</p> <p>Promotional activities included virtual, face-to-face, print and online communications, and industry association meetings.</p> <p>FEI continued to support behavior education campaigns delivered by energy specialists in their respective organizations. Collaborations between internal departments, FBC and other utilities continued to achieve cost efficiencies for initiatives such as the Energy Wise Network offered in partnership with BC Hydro.</p> <p>CEO continued to provide information to customers and the public on natural gas conservation and efficiency and energy literacy. In collaboration with FBC, FEI supported and funded 746 small to medium size business energy assessments. Customers received advice on saving energy and learned about rebates on high-efficiency upgrades. The virtual assessments focused on low cost, no cost measures to reduce business's energy consumption. In addition to outbound calling by the vendor, customers were referred to the program through the FortisBC contact centre and Energy Solutions Managers.</p>
----------------------------	---

Target Sub-Market	Commercial customers, energy specialists, energy management staff, municipalities, chambers of commerce and other business organizations
New vs. Retrofit	New construction and retrofit
Partners	BC Hydro, Municipalities, FortisBC Inc.

1

Expenditures (\$000s)						
Commercial Education Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	507	127	60	217	911
2022 Actual	0	340	340	0	251	931

2

3 Notes:

- FEI's partnership with BC Hydro continued in 2022. This included collaboration on the Energy Wise Network Program for commercial customers that led to 31 natural gas behaviour change projects being submitted in 2022 (with a completion date of March 31, 2023).

8 **School Education Program**

Program Description	This program responds to meeting the “adequacy” component of the Demand-Side Measures Regulation whereby a utility’s DSM portfolio is considered adequate if it includes an education program for students enrolled in [K-12] schools and post-secondary schools in the Company’s service area. Activities included supporting FEI’s corporate school initiatives, including but not limited to Energy is Awesome and the kindergarten to grade 12 curriculum-connected resource Energy Leaders. Additionally, the assembly style Energy Champions presentation which continued in partnership with the BC Lions. Partnerships and funding support for post-secondary initiatives included in-class presentations, as well as supporting education campaigns delivered by energy specialists (or an energy manager).
Target Sub-Market	Students and teachers
New vs. Retrofit	Energy conservation behaviour
Partners	BC Lions, FortisBC Inc.

9

Expenditures (\$000s)						
School Education Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	764	191	57	238	1,251
2022 Actual	0	461	311	0	177	948

10

11 Notes:

- FEI’s Energy Leaders offers curriculum-connected lesson plans and presentations for grades K-12 that focus on energy literacy, conservation and efficiency. Energy is Awesome delivered conservation messaging for students in the K-5 grades. After six years in market, the educational programs are being redeveloped. Lower than anticipated expenditures were due to the redevelopment process being postponed to 2023.

16

- 1 • For students enrolled in post-secondary institutions, FEI delivered virtual presentations
2 about demand side management policies and programs in British Columbia, as well as
3 employment opportunities within the energy management sector. It also provided funding
4 support for the BCIT high performance building lab to provide hands-on training on zero
5 energy buildings using an envelope-first approach and its SEMAC (Sustainable Energy
6 Management) program. It co-sponsored a UBC Okanagan Smart Energy research chair
7 to study optimal energy use and resilient and green infrastructure, which included
8 sponsorship of the Wilden Living Lab 2 project.

9 **10.3 SUMMARY**

10 The CEO Program Area continues to support the DSM Portfolio goals of energy conservation in
11 a variety of ways. Several initiatives and campaigns were undertaken in 2022, providing behaviour
12 change nudges to positively influence customer attitudes about efficiency. Educating all types of
13 customers and students remains a strong priority. FEI is continuing to ensure that information
14 provided is relevant and timely.

15 FEI continued its collaboration with FBC in 2022 to maximize efficiencies across both utilities.
16 Costs continue to be shared on school, residential and commercial outreach as applicable.

17 FEI continues to focus on behavioural change opportunities to foster a culture of conservation in
18 British Columbia while driving program awareness and participation. CEO costs are included at
19 the Portfolio level and incorporated into the overall DSM Portfolio cost-effectiveness results.

11. ENABLING ACTIVITIES

11.1 OVERVIEW

Enabling Activities are initiatives that support and supplement FEI's C&EM program development and delivery. These programs, activities and projects provide resources common to the support and delivery of all program area activities.

Table 11-1: 2022 Enabling Activities Results – Expenditures

Program Area	Utility Expenditures (\$000s)					
	Incentives		Non-Incentives		Total Expenditures	
	2022 Plan	2022 Actual	2022 Plan	2022 Actual	2022 Plan	2022 Actual
Trade Ally Network	0	0	2,396	1,406	2,396	1,406
Codes and Standards	462	3,461	1,845	933	2,307	4,394
Reporting Tool & Customer Application Portal	0	0	576	1,538	576	1,538

1 **11.2 2022 ENABLING ACTIVITIES BY PROGRAM**

2 **Trade Ally Network**

Activity Description	<p>The Trade Ally Network (TAN) is FEI's contractor network whose main objective is to advance energy efficiency messaging and to promote the company's DSM programs. The TAN includes contractors, equipment manufacturers, distributors and Point of Sale partners who offer rebates at the point of sale to commercial customers. FEI recognizes the critical role these industry groups play when it comes to influencing the end-use Residential and Commercial customers who make energy efficiency decisions.</p> <p>TAN is an important initiative under Enabling Activities that supports and supplements DSM program development and delivery, by providing FEI with a direct communication channel with industry stakeholders. TAN also supports FEI by:</p> <ul style="list-style-type: none"> • providing trade allies with co-op funding for advertising, delivering targeted messaging about energy efficiency, and to promote C&EM rebate programs. • funding eligible training that relates to the promotion and sales of high efficiency appliances, appliance safety, installation, best practices, or similar courses related to energy efficient measures that support FEI's current rebate programs. <p>In 2022, Trade Ally Network contractors were responsible for 68% percent of the 2022 Residential Furnace and Boiler Replacement Program rebates. In 2022, FEI hosted several virtual and in-person training sessions for the trade allies that focused on the best practices for installing high-efficiency natural gas appliances and new technologies, that were designed to assist TAN contractors in maintaining competitiveness and continuing to address energy efficiency needs of FEI's residential and commercial customers in the changing marketplace.</p>
-----------------------------	---

3

Trade Ally Network	Expenditures (\$000s)					TOTAL
	Incentives	Administration	Communication	Evaluation	Labour	
2022 Plan	0	1,061	265	637	433	2,396
2022 Actual	0	307	415	373	311	1,406

4
5 **Notes:**

- 6
- 7 • The Quality Assurance process was changed in 2020 to virtually conducting site visits and
8 this has remained the same for 2022. Through the FEI site visit process, approximately
8 829 site visits were conducted, a 14% increase from 2021.
 - 9 • An ENERGY STAR Verified Installation pilot (ESVI), launched in late 2019, due to COVID-
10 19 implications and the desire to limit additional contractor time in the customers' homes,
11 this pilot activity slowed. This provided the opportunity to launch the application software
12 based on the commissioning information used for ESVI and work with contractors to gain
13 feedback and improve the software further. A pilot for a commissioning sheet application
14 was conducted with contractors in 2022 with a launch planned for TAN contractors in 2023.
 - 15 • FEI continues to support the industry, including FEI's contribution to the Home
16 Performance Stakeholder Council (HPSC). The HPSC is an industry led group comprised
17 of key industry players tasked with addressing the fragmented interests, opportunities and
18 challenges that exist in BC's continuously evolving home performance industry. Funding
19 for the HPSC is supported by FEI, FBC, BC Hydro, and EMLI. Only the FEI contribution
20 is reported here.

1 **Codes and Standards**

Activity Description	<p>Utilities have a unique understanding of energy supply and customer demand cycles, which can be of assistance in the development of codes and standards. The content and timing of code implementation directly affects market transformation in all Program Areas. The Codes and Standards area “supports the development of or compliance with specified standard or a measure respecting energy conservation or the efficient use of energy”, as referred to in the definition of “specified demand-side measures” in the DSM Regulation and supports implementation and adoption of such measures and aims to educate and provide training to the industry.</p> <p>With respect to codes and standards development, FEI continued to evaluate, analyze, and review the municipal, provincial and national codes and standards initiatives for energy efficiency and participated in various code amendment processes by way of providing comments.</p> <p>In terms of adoption of new codes and standards, FEI collaborated with various municipalities to help them assess their building portfolio. These provide options they could undertake when considering the upcoming provincial Greenhouse Gas Reduction Standard, BC Energy Step Code amendments, and striving towards Net Zero GHG emissions. FEI is supporting the development of energy performance standards such as a CSA standard on Combination Space and Water Heating standard for radiant heating systems, and Hybrid Heating Systems.</p> <p>In the residential sector, FEI continued to provide support for energy compliance and testing of new homes through the provision of incentives for energy advisor services as required by the BC Energy Step Code. Incentives encourage builders to work with an energy advisor to validate the energy performance of their home through energy modelling, on-site airtightness testing, completion of the Step Code compliance reports and receipt of an EnerGuide label. Additional support was provided to encourage early design activities such as mechanical design, building envelope design and integrated design process (IDP). These activities minimize time and risk when building to the upper tiers of the BC Energy Step Code.</p> <p>With respect to codes and standards education and training, FEI continued to sponsor BC Energy Step Code educational and training sessions throughout the year and delivered initiatives to provide the industry with education and training on a variety of building techniques and products that contribute to high-performance construction with improved energy efficiency. Throughout 2022, the impact of the COVID-19 pandemic continued to influence the delivery of educational and training sessions. As a result, some sessions were cancelled and others moved to an online / virtual format, while some were able to continue in-person.</p>
-----------------------------	---

2

	Expenditures (\$000s)					
Codes and Standards	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	462	1,189	297	196	163	2,307
2022 Actual	3,461	513	312	2	106	4,394

3
 4 Notes:

- The Codes and Standards expenditures were higher than planned, primarily due to an increase in activity in energy modelling and blower door testing. Financial measures to assist in compliance with building codes via energy modelling and blower door tests for new residential homes were higher in 2022. This activity advances the market to build high performance homes with improved building envelope and promotes compliance with the Air Change per Hour (ACH) metric that was introduced in BC Energy Step Code.

11

1 Reporting Tool & Customer Application Portal

Activity Description	The Demand-side Management Tracking System (DSMS) Project is transitioning FBC and FEI from their legacy DSM tracking systems onto a new, joint system. These tracking systems are used to manage DSM rebates from the application stage through to payment, including application review, reporting, and customer communications. The primary reasons for transitioning both utilities to a new system are: an improved ability to operate joint programs by sharing a platform, the introduction of online application forms for gas customers, improved reporting via integrated dashboards, and a powerful communications management system. In addition, FEI's legacy system vendor has ceased any further development of that system.
-----------------------------	---

2

Expenditures (\$000s)						
Reporting Tool & Customer Application Portal	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	340	85	0	152	576
2022 Actual	0	1,220	0	0	318	1,538

3

4 Notes:

- 5 • The reporting tool and customer application portal launched in 2020 and, as of 2022, all
6 current DSM programs are now being tracked in the portal.
- 7 • The need to support a streamlined customer experience, as well as the ongoing evolution
8 of C&EM programs, have both extended the project timeline and increased the
9 expenditures associated with completing the project and migrating to the Microsoft
10 PowerApps licensing model.

11

12 Customer Research

Activity Description	Research activities undertaken under this budget in 2022 included a refresh of our residential segmentation, as well as ongoing research to track the impact of general C&EM communications, and communications testing.
-----------------------------	--

13

Expenditures (\$000s)						
Customer Research	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	0	102	25	21	1	149
2022 Actual	0	21	0	69	11	101

14

15 Notes:

- 16 • Lower than Plan forecast expenditures in Customer Research is primarily driven by a
17 delay in implementation of a data analytics tool. FEI expects that the tool will be
18 implemented in 2023 or 2024.

20

1 Commercial Energy Specialist Program

Activity Description	This program funded Energy Specialist, Energy Analyst and Thermal Energy Manager positions in large commercial organizations. Funding ranged from \$50,000 up to \$80,000 per year based on position and an annual contract. A funded position's key priority is to identify and implement opportunities for their organization to participate in FEI's C&EM programs, while also identifying and implementing non-program specific opportunities to use natural gas more efficiently. There were 45 participants in 2022. This program is funded as an enabling activity but claims natural gas savings for those projects completed by energy specialists, energy analysts and thermal energy managers that are not claimed by another FEI DSM program. Total 2022 verified (non-C&EM program) annual savings were 1966 GJ. FEI considers this to be an energy management program, and hence a specified demand-side measure, as defined in the DSM Regulation.
-----------------------------	---

2

Expenditures (\$000s)						
Commercial Energy Specialist Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	2,400	85	21	27	146	2,679
2022 Actual	2,039	86	0	38	189	2,351

3

4 Notes:

- 5 • The Energy Specialist Program continues to experience success as an enabling program.
 6 In 2022, organizations with Energy Specialists were responsible for 37 percent of natural
 7 gas savings and 33 percent of the incentives paid out in the Commercial Program Area.
 8 This is an addition to the Conservation Education and Outreach, Innovative Technologies,
 9 Low Income and Residential programs and incentives that the funded positions promoted
 10 and used in 2022. Note many participants were unable to complete retrofit projects due to
 11 supply chain issues triggered by the COVID-19 pandemic.
- 12 • Some organizations had funded positions for part of the year only as they were new and
 13 added to the program later in the year or their funding agreements concluded and were
 14 not renewed.
- 15 • The energy savings listed only apply to third party verified natural gas projects completed
 16 by funded positions in 2022 which did not receive incentive funding from another C&EM
 17 program. These energy savings are only reported and have not been included in the
 18 calculations for the benefit/cost tests as the required inputs are not available.

19

1 **Community Energy Specialist Program**

Activity Description	This program funded Senior Energy Specialist positions in municipalities, regional districts and Indigenous communities and organizations, up to \$100,000 per year based on bi-annual contracts. In the FEI service territory, C&EM contributes 60% of this funding amount with the other 40% coming from FEI’s External Relations department. In the FEI/FBC shared service territory, C&EM contributes 75% of this funding (split 50/50 between C&EM FEI and FBC) with the other 25% coming from FEI’s External Relations department. Several Indigenous community positions are cost-shared with BC Hydro. Senior Energy Specialists lead policy development and implementation as communities develop or refresh their sustainability and energy plans including BC Energy Step Code support where applicable and raise awareness of and participate in FEI’s C&EM programs. There were 14 participants in 2022. FEI considers this to be an energy management program, and hence a specified demand-side measure, as defined in the DSM Regulation.
-----------------------------	---

2

Expenditures (\$000s)						
Community Energy Specialist Program	Incentives	Administration	Communication	Evaluation	Labour	TOTAL
2022 Plan	750	8	2	27	27	814
2022 Actual	510	1	0	3	204	718

3

4 Notes:

- 5 • Actual participation was below Plan forecast as some communities only had a Community
- 6 Energy Specialist for part of the year, which was related to staffing challenges and hiring
- 7 delays.

8 **11.3 SUMMARY**

9 Enabling Activities are critical initiatives that support and supplement DSM program development
 10 and delivery. The Trade Ally Network provides FEI the opportunity to quickly and effectively
 11 communicate new programs or revisions to existing programs. FEI continued to work with industry
 12 partners, including FBC, BC Hydro, and EMLI to support the industry and the Home Performance
 13 Stakeholder Council - an industry led group tasked with addressing the fragmented interests,
 14 opportunities and challenges that exist in BC’s home performance industry.

15 FEI’s involvement in codes and standards work in 2022 continued to encompass various activities
 16 including monitoring, reviewing and responding to existing and proposed regulatory changes and
 17 direct participation in working groups, committees and sub-committees that explore the
 18 development of future targets, codes and standards. In collaboration with the provincial Building
 19 Safety and Standards Branch, FEI and FBC provided support to educate builders and energy
 20 advisors and encourage the building of high performance homes in BC.

21 The continued development work in 2022 to implement the new DSM management system has
 22 further improved customer experience and service delivery for DSM programs. Finally, customer
 23 research initiatives and the Energy Specialist programs continue to help improve the delivery of
 24 programs and energy efficiency awareness and behaviour in BC.

12. EVALUATION

In alignment with FEI’s Evaluation, Measurement and Verification (EM&V) Framework and industry standard practice, program evaluation activities are assessed at different stages of each program’s lifecycle.¹¹ Based on this ongoing assessment, all programs are evaluated when appropriate. The 2022 evaluation activities presented here reflect the number of programs in market, and the type of evaluation activities required to provide program feedback.

12.1 2022 PROGRAM EVALUATION AND EVALUATION RESEARCH ACTIVITIES

In 2022, FEI’s various evaluation activities included quantifying energy savings, assessing participant awareness and satisfaction, identifying barriers to participation, assessing customer usability, engaging with various FEI DSM outreach activities, conducting industry research, and conducting quality assurance site visits. Measurement and Verification (M&V) activities focused on identifying and verifying project and measure level savings assumptions and understanding any issues associated with equipment installation in the field.

Table 12-1 provides a summary of all program evaluation and evaluation research related activities undertaken in 2022. Expenditures for these activities have been accounted for within the applicable program or Program Area non-incentive costs included in previous sections but are also reported here to provide a concise, easy-to-view summary of evaluation activities. Included in the table are: a list of all the 2022 evaluation activities; the Program Area each activity occurred in; the general type of evaluation activity undertaken; the Company’s actual 2022 evaluation expenditures; and a status update on each activity. The total expenditure for program evaluation and research activities in 2022 was approximately \$1.85 million or 1.71% of the total expenditure which is consistent with previous DSM Plan years.

¹¹ Types of evaluation activities include: Communications evaluations, which focus on advertising and media outreach, and focus groups; Evaluation studies, where quality assurance is conducted to gain more insight on the incented measure, and literature reviews conducted to better understand the incented measure; Market studies, research and interviews with industry stakeholder to assess market penetration; Process evaluations, where surveys and interviews are used to assess customer satisfaction and program success; Impact evaluations, to measure the achieved energy savings attributable from the program; Market Analysis, to characterized the industry and the program’s effect on market penetration and, Measurement & Verification, to monitor real time energy savings associated with energy conservation measures and validation of energy savings through energy study and energy model reviews.

1 **Table 12-1: Inventory of DSM Program Evaluation and Evaluation Research Activities Conducted in 2022¹²**

Evaluation Name	Program Area	Type of Evaluation	Evaluation Partners	Actual Evaluation Expenditure (000's)	Evaluation Status
CUSTOMER RESEARCH					
FortisBC Communication Tracking: Energy Efficiency Conservation	Enabling Activities	Communications	none	\$14	Customer engagement and awareness of C&EM activities. Ongoing weekly ad tracking of C&EM advertisements. Completed from May to July, September and October 2022 by Majid Khoury.
MyVoice Panel Software	Enabling Activities	Communications	none	\$55	Home Renovation Rebate & Free Ridership Online Research Ongoing by FortisBC Energy Inc
COMMERCIAL ENERGY SPECIALIST PROGRAM					
Energy Specialist Program Evaluation 2021	Enabling Activities	Process & Impact	FortisBC Energy Inc. & FortisBC Inc.	\$7	The evaluation study includes program and industry stakeholder surveys and an energy savings audit on projects completed in 2021. Completed May 2022 by Prism Engineering Preliminary results reported in the 2021 Annual Report
Energy Audit 2022 Update	Enabling Activities	Impact	FortisBC Energy Inc. & FortisBC Inc.	\$31	The study is an update to an energy savings audit to verify energy savings from projects completed in 2022. To be completed Q2 2023
COMMUNITY ENERGY SPECIALIST PROGRAM					
Community Energy Specialist Program Evaluation 2021	Enabling Activities	Process	FortisBC Energy Inc. & FortisBC Inc.	\$3	Program evaluation consisting of a process evaluation and interviews with internal and external stakeholders in order to gather feedback for future program design. Completed June 2022 by Prism Engineering
TRADE ALLIED NETWORK QUALITY ASSURANCE					
Insulation & Program Compliance Site Visits	Enabling Activities	Evaluation Study	none	\$62	Ongoing site visit of homes with insulation and draft proofing measures with a focus on quality assurance and program compliance in order to provide contractor feedback and promote future contractor education and training.
Furnace Quality Assurance & Program Compliance Site Visits	Enabling Activities	Evaluation Study	none	\$226	Ongoing site visit of homes with furnace or boiler upgrades with a focus of quality assurance and program compliance in order to provide contractor feedback and promote future contractor education and training.
Furnace Quality Installation Field Study	Enabling Activities	Evaluation Study	none	\$17	In-person site assessments for furnace upgrades with a focus on capturing the pre-change out data to assess the baseline for the furnaces replaced. Completed August 2022 by Ecolighten
Furnace Performance Testing	Enabling Activities	Evaluation Study	none	\$68	Field study to evaluate the effect of quality installation on the overall performance of residential furnaces with a focus on determining the furnace AFUE and steady-state efficiency at a high input rate. Completed November 2022 by NGTC

2

¹² Table 12-1 does not include Prefeasibility Studies. Please refer to the Innovative Technologies section (Section 8) for details.

1 **Table 12-1: Inventory of DSM Program Evaluation and Evaluation Research Activities Conducted in 2022 (continued)**

Evaluation Name	Program Area	Type of Evaluation	Evaluation Partners	Actual Evaluation Expenditure (000's)	Evaluation Status
CODES & STANDARDS					
Energy Code Compliance Studies	Enabling Activities	Process	none	\$2	Online survey of industry professionals and building officials regarding compliance with the BC Energy Step Code energy performance requirements for new buildings including residential and commercial. Completed December 2021 by RDH Building Science Results reported in the 2021 Annual Report
HOME RENOVATION PROGRAM					
Insulation Measures Characterization Analysis	Residential	Market Study	FortisBC Energy Inc., FortisBC Inc. & BC Hydro	\$1	Characterization analysis of insulation measures incented as part of the Home Renovation Rebate Program. Completed December 2021 by Dunsky Results reported in the 2021 Annual Report
Furnace Quality Installation Field Analysis	Residential	Evaluation Study	none	\$16	Data analysis component of the Furnace Quality Installation Field Study. To be completed Q2 2023
Space Heating Incremental Cost Research	Residential	Market Study	none	\$18	Industry research on incremental costs associated with furnaces and boilers that are installed as part of the FortisBC Residential and Low Income incentive programs. Completed May 2022 by ICF
RENTAL APARTMENT EFFICIENCY PROGRAM					
Participant and Building Owner Surveys	Residential / Commercial	Process	FortisBC Energy Inc. & FortisBC Inc.	\$55	Surveys conducted with building owners and tenants to assess customer satisfaction, program awareness, and gather feedback for future program design. 2021 results: Completed July 2022 by Cohesium Research 2022 results: To be completed Q2 2023
Performance Testing	Residential / Commercial	Process	FortisBC Energy Inc. & FortisBC Inc.	\$2	Ongoing performance testing for RAP participants.
DIRECT INSTALL PROGRAM					
Direct Install Quality Assurance	Low Income	Evaluation Study	FortisBC Energy Inc., FortisBC Inc. & BC Hydro	\$169	Ongoing quality assurance to ensure direct install measures are installed according to program policies and procedures.
Ongoing Customer Feedback Surveys	Low Income	Process	FortisBC Energy Inc., FortisBC Inc. & BC Hydro	\$29	Ongoing surveys with Direct Install program participants to gather feedback on their customer experience, satisfaction with the program and the program representatives. Completed February 2023 by Sentis Market Research

2

1 **Table 12-1: Inventory of DSM Program Evaluation and Evaluation Research Activities Conducted in 2022 (continued)¹³**

Evaluation Name	Program Area	Type of Evaluation	Evaluation Partners	Actual Evaluation Expenditure (000's)	Evaluation Status
COMMERCIAL PERFORMANCE PROGRAM					
Third Party Energy Study Reviews	Commercial	Measurement & Verification	none	\$97	Ongoing reviews conducted by third party consultants to review and verify the savings as noted in the project energy study reports. Energy study reviews may include engineering calculations for specific energy conservation measures, document reviews, and feasibility study reviews.
COMMERCIAL NEW CONSTRUCTION PROGRAM					
Third Party Energy Model Reviews	Commercial	Measurement & Verification	none	\$173	Ongoing BC Energy Step Code and Non-BC Energy Step Code energy model validations conducted by a third party consultant as part of the program administration and evaluation.
Commercial New Construction Program Evaluation	Commercial	Process & Impact	FortisBC Energy Inc. & FortisBC Inc.	\$82	Evaluation of the program from design to delivery, including assessment of incentive levels and free-ridership, and understanding the impact of program changes, and identifying opportunities and areas for improvement. Completed December 2022 by Econoler
INNOVATIVE TECHNOLOGIES					
Carbon Capture Pilot	Innovative Technologies	Measurement & Verification	none	\$10	Measurement of energy savings, installation and technology performance associated with the carbon capture system. To be completed Q3 2024
Commercial Gas Absorption Heat Pump Pilot	Innovative Technologies	Measurement & Verification	none	\$56	Measurement of energy savings, installation and customer acceptance of the gas-fired absorption heat pump technology for commercial DHW applications. Phase 1 & 2: Completed October 2020 by Building Energy Solutions Ltd. Results reported in the 2020 Annual Report Phase 3 & 4: Completed September 2021 by Building Energy Solutions Ltd. Results reported in the 2021 Annual Report Phase 5: Focusing on pre-heat for ventilation heating. To be completed Q2 2023
Thermal Compression Heat Pump Pilot	Innovative Technologies	Measurement & Verification	none	\$22	Measurement of energy savings, installation and customer acceptance of the thermal compression heat pump technology for residential space heat and DHW applications. To be completed Q1 2023
Residential Gas Absorption Heat Pump Pilot	Innovative Technologies	Measurement & Verification	none	\$74	Measurement of energy savings, installation and customer acceptance of the gas-fired absorption heat pump technology for residential space and water heating applications. To be completed Q1 2024

2

¹³ Measurement & Verification studies require time to conduct activities which include, but are not limited to, project commissioning, installing and removal of monitoring equipment, data collection, and data analysis and reporting. M&V activities align with the International Performance Measurement and Verification Protocol (IPMVP) Concepts and Options for Determining Energy and Water Savings. Prepared by the Efficiency Valuation Organization: www.evo-world.org. January 2012.

1 **Table 12-1: Inventory of DSM Program Evaluation and Evaluation Research Activities Conducted in 2022 (continued)**

Evaluation Name	Program Area	Type of Evaluation	Evaluation Partners	Actual Evaluation Expenditure (000's)	Evaluation Status
INNOVATIVE TECHNOLOGIES					
Deep Energy Retrofit Pilot	Innovative Technologies	Measurement & Verification	none	\$21	Measurement of energy savings, installation and customer acceptance of building envelope and energy system upgrades for residential and commercial buildings. Residential pilot to be completed Q4 2024 Commercial pilot to be completed Q4 2025
Residential Hybrid Heating Program	Innovative Technologies	Measurement & Verification	none	\$291	Measurement of energy savings, identification of switch over temperature, preferred control system and customer acceptance of the system in residential settings. To be completed Q2 2024
INDUSTRIAL PERFORMANCE PROGRAM					
Third Party Energy Study Reviews	Industrial	Measurement & Verification	none	\$33	Ongoing reviews conducted by third party consultants to review and verify the savings as noted in the project energy study reports. Energy study reviews may include engineering calculations for specific energy conservation measures, plant wide audits, document reviews, and feasibility study reviews.
Third Party Measurement & Verification	Industrial	Measurement & Verification	none	\$43	Ongoing third party M&V conducted as part of the program evaluation. The M&V activities include the completion of an M&V plan, commissioning validation site visits, and M&V reports. M&V activities align with the International Performance Measurement and Verification Protocol (IPMVP).
CONSERVATION EDUCATION AND OUTREACH					
Customer Engagement Tool Service Quality Research	CEO	Process	FortisBC Energy Inc. & FortisBC Inc.	\$37	Customer experience and satisfaction with the Home Energy Report. Q1 through Q3 reports were completed in 2022 Q4 report to be completed Q1 2023
Customer Engagement Tool Evaluation - Year 1	CEO	Impact	FortisBC Energy Inc. & FortisBC Inc.	\$5	Evaluation of the overall program, validation of the treatment and control group selection, and net savings attributed to the distribution of the Home Energy Reports. Completed March 2022 by Econoler Preliminary results provided in 2021 Annual Report
Customer Engagement Tool Evaluation - Year 2	CEO	Process & Impact	FortisBC Energy Inc. & FortisBC Inc.	\$57	Evaluation of the overall program, validation of the treatment and control group selection, and net savings attributed to the distribution of the Home Energy Reports. To be completed Q2 2023
PORTFOLIO					
Comprehensive Energy Savings Project	Portfolio	Market Study	none	\$60	A comprehensive review to better understand the tracking of total energy savings and emission reductions that are being employed by other utilities and organizations. Completed August 2022 by Posterity Group
FortisBC EM&V Framework Review	Portfolio	Process	FortisBC Energy Inc. & FortisBC Inc.	\$11	A comprehensive research study including literature review and interviews with key stakeholders to identify key findings and prioritize recommendations to update the EM&V Framework. To be completed Q3 2023

2

2

Table 12-2: Summary of Key Findings and Methodology for 2022 Completed DSM Program Evaluation Studies and Pilot Program Reports

Evaluation Name	Program Area	Type of Evaluation	Methodology	Outcome from Key Findings
CUSTOMER RESEARCH				
FortisBC Communication Tracking: Energy Efficiency Conservation	Enabling Activities	Communications	Online interviews were conducted weekly with approximately 125 per week with BC adults living within the FortisBC service territory. The research was conducted when the C&EM advertisements were in market (May to July, September and October 2022).	<p>Results: Awareness of the advertisements remained strong throughout the year with over 50% of participants recalling at least one advertisement. Two-thirds of survey participants agreed that the advertisements made them want to visit the organization's website to learn more.</p> <p>Among those who recalled the advertisements there was a high degree of knowledge about FortisBC's C&EM activities, with 8 in 10 aware of our rebate programs.</p> <p>Outcome of Key Findings: Awareness of the advertisements remain strong and the creative is still effective. Consider ways to make the offers more memorable.</p>
MyVoice Panel Software	Enabling Activities	Communications	FortisBC MyVoice online community panel.	<p>Results: Sixty-eight percent of program participants who completed the rebate application form online found it easy or very easy to complete.</p> <p>Outcome of Key Findings: Continue to explore ways to make the application form less onerous and easy to complete.</p>
COMMERCIAL ENERGY SPECIALIST PROGRAM				
Energy Audit 2022 Update	Enabling Activities	Impact	The methodology remains consistent with the Energy Savings Audit completed in previous years. The Audit reviewed and verified energy savings from gas and electric projects implemented and completed by Commercial Energy Specialists in 2022 without the assistance of a FortisBC incentive program. Energy savings were verified on a project-by-project basis either through a utility analysis or an analytical savings analysis approach.	<p>Results: Based on the preliminary findings, 10 gas projects completed in 2022 were reviewed and verified to have resulted in 1,704 GJ energy savings. The remaining projects still in the process of review have an estimated 80% claimed to verified savings ratio.</p> <p>Outcome of Key Findings: Results were taken under consideration for future program design.</p>
COMMUNITY ENERGY SPECIALIST PROGRAM				
Community Energy Specialist Program Evaluation 2021	Enabling Activities	Process	The evaluation assessed the success of the Community Energy Specialist Program considering its connection to the Climate Actions Partner Program and opportunities moving forward. The evaluation included 48 documentation reviews, and interviews with 13 program participants, and stakeholders to gather feedback on the effectiveness of the program and identify opportunities for program improvement.	<p>Results: Results from the documentation reviews and stakeholder interviews provided feedback on what's working well (supporting the local community, training and networking opportunities, and adding resources to support local governments), and identified some program challenges (complexity of the Specialist role & local government landscapes, and competing priorities). Recommendation options were proposed to address the key findings.</p> <p>Outcome of Key Findings: Results were reviewed and recommendations taken under consideration for future program design.</p>

3

1
 2
Table 12-2: Summary of Key Findings and Methodology for 2022 Completed DSM Program Evaluation Studies and Pilot Program Reports (continued)

Evaluation Name	Program Area	Type of Evaluation	Methodology	Outcome from Key Findings
TRADE ALLIED NETWORK QUALITY ASSURANCE				
Furnace Quality Installation Field Study	Enabling Activities	Evaluation Study	90 furnace participants from the FortisBC ENERGY STAR Verified Installation (ESVI) Pilot and Income Qualified Energy Conservation Assistance Program (ECAP) were selected for performance assessments including pre-changeout testing, installation & commission, and data analysis from July 2021 to May 2022.	<p>Results: The testing results from 62 full participants and 28 partial participants were evaluated for reporting on furnace sizing, external static pressure implication and technical comparison of in-situ performance between the old standard/mid efficiency furnaces and the new high-efficiency furnace. The results support the theory that furnace in-situ performance can be improved upon. Improvements suggested include; incorporating a full suite of quality installs practices including proper furnace sizing, equipment selection, installation, and commissioning of the equipment.</p> <p>Outcome of Key Findings: FortisBC will consider implementing additional training and make educational resources available to contractor installers. FortisBC will also consider launching a commissioning sheet mobile application to reduce admin work and promote commissioning at the time of installation.</p>
Furnace Performance Testing	Enabling Activities	Evaluation Study	15 old furnaces removed from the homes of FortisBC Rebate Program participants were shipped to an independent lab in Quebec for testing between July 5 and August 17, 2022. The test methodology created by NGTC is used for measuring the annual fuel utilization efficiency (AFUE) of residential gas-fired or oil-fired furnaces and boilers to determine AFUE and steady-state efficiency at a high input rate	<p>Results: 15 furnaces were tested (with one-stage combustion and indoor air combustion). Many units don't provide the expected capacity on their nameplates, even if their orifice size is generally the same size as indicated. However, in most cases, this capacity difference should not have been an issue on site due to equipment oversizing. The annual fuel utilization efficiency (AFUE), which includes start-up and cool-down heat losses, is inferior to the steady-state efficiency (SSE): No correlation between AFUE and SSE has been established.</p> <p>Outcome of Key Findings: Results and recommendations were reviewed and further analysis will be conducted. NGTC recommends another batch of testing with additional parameters at the time of the on-site testing as well as the in-lab testing.</p>
HOME RENOVATION REBATE PROGRAM				
Space Heating Incremental Cost Research	Residential	Market Study	From December 2021 through April 2022, 42 HVAC contractors based in BC were contacted via phone and email. A template to collect incremental cost data from HVAC contractors was used to gather information on equipment type, input rating ranges, and efficiency levels. Costs were also broken down by equipment and labor.	<p>Results: The research produced an updated set of residential boiler and furnace (i) total cost data (equipment and labor) and (ii) incremental cost data from upgrades with efficiency ratings ranging from 94% to 96%+ for boilers, and 95% to 98%+ for furnaces. The information was based on responses from eight HVAC contractors surveyed.</p> <p>Outcome of Key Findings: Results were reviewed and taken under consideration for future program design.</p>
NEW HOME PROGRAM				
New Home Program Evaluation	Residential	Process & Impact	The purpose of this evaluation was to conduct a process and impact evaluation of the New Homes Rebate program. The main study methods include a program logic model, cross tabulation of survey data, interview summaries, engineering modeling and free rider algorithms.	<p>Results: The Program's incentives are appropriate to achieve significant levels of participation. While the Program is well known to builders, there is room for enhanced marketing and communication to residential construction industry. Suggestions include creating a Program specific modelling guideline and to capture loads from all natural gas appliances.</p> <p>Outcome of key findings: The Program team is currently evaluating the preliminary results of the evaluation and processing how FortisBC can use the key findings to improve the program. FortisBC is exploring ways to gather more data from future program participants that could assist with the evaluations.</p>

3

1
2

Table 12-2: Summary of Key Findings and Methodology for 2022 Completed DSM Program Evaluation Studies and Pilot Program Reports (continued)

RENTAL APARTMENT EFFICIENCY PROGRAM				
Participant and Building Owner Surveys	Residential/Commercial	Process	This study is an ongoing evaluation conducted annually for the program. It includes in-person installations of efficiency measures, a telephone or online survey with building owners/managers, and an online survey with tenants.	<p>Results: The survey results indicate that 71% of the tenants surveyed indicating "very" or "somewhat satisfied" with the overall program (80% in 2020). Participants remain pleased with the program with mean scores of 4.2 and higher for virtually all of the areas examined. Tenants also continue to view the various aspects of the program positively. In particular the installation is once again viewed as extremely favourable.</p> <p>Outcome of Key Findings: Continue to conduct ongoing tenant and building owner surveys to provide feedback to program design.</p>
DIRECT INSTALL PROGRAM				
Ongoing Customer Feedback Surveys	Low Income	Process	Two separate surveys were conducted to evaluate the Direct Install Program. The first survey is a paper survey with an option to be completed online. A total of 712 program participants completed the survey between January 2022 to January 2023. The survey assessed customer satisfaction with the program application process, the measures installed, and the experience with the installation contractors. A subgroup of participants from the first survey who were eligible for additional draft-proofing, insulation, bathroom fans, programmable thermostats, and/or a natural gas furnace were contacted to participate in a second survey (online and telephone) to assess customer satisfaction with the program and gather feedback to improve the program design. A total of 213 participants completed the survey between January and December 2022.	<p>Results: The first survey showed that overall satisfaction of participants remained high (77% in Q1 to 83% in Q4) and consistent with previous years. The most common products installed were energy-saving light bulbs and exterior door weather stripping, similar to last year although the percentage of participants reporting these has declined.</p> <p>Similar to the first survey, the second survey showed that 77% of participants were very satisfied with the program, and nine out of ten would likely recommend it to others. Positive feedback stems from appreciation of the products and good qualities of the staff who conducted the evaluation and contractors who completed the work. On average, participants had 3.2 products installed; most had bathroom fan installed (84%) followed by insulation (68%), and 90% were very satisfied with the quality of the natural gas furnace installed. Majority (85%) of the participants agreed that the comfort of their homes has increased as a result of the program.</p> <p>Outcome of Key Findings: Continue to conduct the participant surveys to assess the program's development and contractor experience.</p>
COMMERCIAL NEW CONSTRUCTION PROGRAM				
Commercial New Construction Program Evaluation	Commercial	Process & Impact	The evaluation conducted interviews with stakeholders and CNC participants and supported these with the review and analysis of information from tracking sheets, program guidelines, project files, and jurisdictional requirements on commercial new construction.	<p>Results: The participants' overall program satisfaction was found to be very high, and participation has improved since 2020 as a result of program changes made at the time. Based on program tracking, project savings per square feet has decreased since 2019 indicating that savings per project are now harder and more expensive to achieve. The overall evaluation also found that corporate policy and jurisdictional requirements are key motivators in deciding to build better-than-code buildings.</p> <p>Outcome of Key Findings: Results and recommendations were reviewed and taken under consideration for future program design.</p>

3
4

1
2

Table 12-2: Summary of Key Findings and Methodology for 2022 Completed DSM Program Evaluation Studies and Pilot Program Reports (continued)

CONSERVATION EDUCATION AND OUTREACH				
Customer Engagement Tool Service Quality Research	CEO	Process	Email-to-online methodology to gather feedback on customer experience and satisfaction with the Home Energy Report.	<p>Results: In Q1, both gas and electric report recipients rated the ease of understanding the home energy use and energy savings tips at 88%, and the usefulness of the reports at 56% and 54% respectively. In Q2, the results for gas and electric report recipients were slightly lower at 87% and 86% for ease of understanding the home energy use and energy savings tips. Similarly, the usefulness of the reports was lower in Q2 at 52% for gas report recipients and 40% for electric recipients.</p> <p>The main points of criticism for the home energy use classification section continue to be that the comparison to other homes is inaccurate or not helpful. The top positive comment is that the report is in line with their expectations.</p> <p>Outcome of Key Findings: Results and recommendations were reviewed and taken under consideration for future program design.</p>
Customer Engagement Tool Evaluation - Year 2	CEO	Process & Impact	The study consisted of an impact evaluation and a process evaluation. The impact evaluation determined the natural gas and electricity energy savings using staff interviews and monthly and cumulative savings calculation using natural gas and electricity billing data. The process evaluation assessed the program's effectiveness through in-depth interviews with key stakeholders, and an online survey with program participants.	<p>Results: In 2022, the natural gas savings increased to 1.05 GJ per participant, which represents approximately 1.36% reduction in annual gas consumption exceeding the 1% program target. The evaluation brought to light some areas for improvement such as the need for more personalized tips in the Home Energy Reports and the impact of reward points in driving customer behaviour.</p> <p>Outcome of Key Findings: Results and recommendations were reviewed and taken under consideration for future program design.</p>
Portfolio				
Comprehensive Energy Savings Project	Portfolio	Market Study	The study estimated the historical comprehensive energy savings and GHG emissions reduction from 2010 to 2021 using data from FortisBC's annual report documentation, and the future comprehensive energy savings and GHG emissions reduction for 2022 to 2030 using forecast data from the 2021 FortisBC Conservation Potential Review.	<p>Results: Total lifetime comprehensive energy savings for 2010 to 2021 was 110.4 million GJ, and the future comprehensive energy savings was estimated to be 1.32 billion GJ. The effect of early replacement savings is reduced drastically in future estimates from 12.2% increase for 2010 to 2021, to 1.5% for 2022 to 2030. The results suggest that in-situ equipment performances will increase over time towards the code baseline performance requirements.</p> <p>Outcome of Key Findings: Results and recommendations were taken under consideration for future guidance.</p>

1 **12.2 EVALUATION COLLABORATION**

2 In 2022, FEI continued to seek opportunities to increase collaboration activities with FBC, BC
3 Hydro, and other entities to conduct program evaluation for DSM programs. The number of
4 collaboration activities depends on the timing of the activity, program participants, legal and
5 privacy concerns, and available budget to conduct the study. Tables 12-1 and 12-2 provide
6 information on program evaluation activities conducted in partnership with other organizations.
7 FEI, FBC and BC Hydro continue to collaborate in the evaluation projects for the Low Income
8 Direct Install Program – Ongoing Customer Feedback Survey, and Direct Install Quality
9 Assurance study. Additionally, in 2022, the BC Utilities and EMLI started initial conversations to
10 launch a new joint evaluation study to assess hybrid dual fuel heat pump, all electric heat pump,
11 and window/doors measures.

12 In keeping with the MOU on collaboration discussed in Section 2.4, the BC Utilities continue to
13 hold update project meetings and explore opportunities for future collaboration on program
14 evaluations.

13. DATA GATHERING, REPORTING AND INTERNAL CONTROLS PROCESSES

13.1 OVERVIEW

The following section outlines FEI's business practices to ensure DSM activities and associated expenditures are in compliance with the Company's internal control processes and with BCUC Decision and Order G-36-09, which directed the Company to include a discussion in the DSM Annual Report of the Company's internal data gathering, monitoring and reporting control practices.

13.2 ROBUST BUSINESS CASE PROCESS APPLIED TO ALL PROGRAMS

Before a new DSM pilot or program can be implemented, a business case must first be developed. FEI is committed to putting each pilot or program through the appropriate level of internal scrutiny before moving ahead and believes doing so ensures an increased chance of pilot or program effectiveness.

Business cases include information about program rationale and purpose, as well as a description of the target audience, assumptions, cost-benefit tests, and proposed evaluation methods. Cost effectiveness analysis is performed using the California Standard Tests as outlined in the California Standard Practice Manual. FEI uses an in-house cost-benefit modeling tool developed in partnership with expert industry consultants to apply the program costs and benefits in each of the four standard cost-effectiveness tests based on the California Standard Practice Manual (Rate Impact Measure [RIM], Utility, Participant, and TRC) and the MTRC in accordance with the DSM Regulation. The results from this modelling are used as inputs for the business cases, which are approved in accordance with FEI's policy on financial authorization levels.

In addition to the internal business case process, FEI is required to submit new programs to the BCUC for approval prior to the expenditure of any funds. No new programs, beyond those approved as part of the 2019-2022 DSM Plan and the Application for Updated DSM Expenditures for 2021 and 2022¹⁴, were submitted to the BCUC for approval in 2021.

13.3 INCENTIVE APPLICATIONS VETTED FOR COMPLIANCE WITH PROGRAM REQUIREMENTS

Ensuring that all customer applications are compliant with program eligibility requirements as laid out in program terms and conditions is also part of the internal control process. The Company has a number of mechanisms in place to ensure DSM incentive funding applications are in compliance with program requirements. The verification process is specific to each program and is dependent on the type of program, its complexity, the financial value of the incentive and other parameters. The general principles applied are as follows:

¹⁴ Filed on March 19, 2021 and approved by BCUC Order G-135-21.

- 1 • Each application is reviewed for completeness and accuracy;
- 2 • Applications must meet the criteria outlined in the terms and conditions of the program put
- 3 forward through the approval process;
- 4 • Once approved, incentives are distributed to participants; and
- 5 • Copies of applications and supporting documents are filed and retained.

6 **13.4 INTERNAL AUDIT SERVICES**

7 On an approximately biannual basis, FEI engages its own Internal Audit Services (IAS) group to
8 review the internal controls associated with the DSM activities. Such an audit was performed in
9 2021 assessing the effectiveness of controls that were in place the prior year. That audit noted
10 that key controls are in place and operating effectively to mitigate risk around program
11 development, program administration (including rebate payments), evaluation, and program
12 reporting. The next internal audit is scheduled for 2023.

13 **13.5 SUMMARY**

14 FEI is committed to strong internal controls in all aspects of its DSM activity. As demonstrated in
15 this section, the Company's business practices related to program development, application
16 processing and ongoing monitoring are all sound and subject to continuous improvement.

1 **14. 2022 DSM ANNUAL REPORT SUMMARY**

2 In 2022, FEI achieved 97 percent of its total approved DSM expenditures and estimated annual
3 energy savings for the year, based on its 2019-2022 DSM Plan, including approved amendments.
4 Annual energy savings were approximately 1.2 million GJ, slightly increasing over savings
5 achieved in 2021. Incentive expenditures at year-end were more than four times that of non-
6 incentive expenditures, making up 80 percent of the overall portfolio expenditures. The resulting
7 total lifetime energy savings for 2022 DSM activity is estimated at 10.8 million GJ and
8 corresponding lifetime GHG emissions reductions of 646,480 tonnes CO₂e.

9 The Report details how FEI cost-effectively delivered these programs as set out in the 2019-2022
10 DSM Plan. FEI continues to offer a robust portfolio of DSM programming accessible to all
11 customer groups and locations, meeting the adequacy requirements of the DSM Regulation and
12 operating according to the Company's DSM Guiding Principles.
