Pursuant to BCUC Order G-141-25, the Storage and Transport (S&T) RNG Rider is set on an interim basis for consumption on and after July 1, 2025, until such time as a final decision is issued by the BCUC. The interim rates are subject to refund/recovery with interest at the average prime rate of FortisBC Energy's principal bank for its most recent year.

#### Notes:

 The Cost of Gas is based on the calculation of 100% of a Customer's consumption in Gigajoules, minus the percentage of the RNG Blend Service measured in Gigajoules, multiplied by the Cost of Gas (Commodity Cost Recovery Charge) per Gigajoule. For example, if the RNG Blend Service is set at 1%, the Cost of Gas will be calculated based on 99% (100% - 1%) of a Customer's consumption.
