

2017 Natural Gas Mine Power Generation Incentive Program

Email the completed application form to nqt@fortisbc.com.

Applicant information

Company name		Phone number		
Address	City/town	Province	Postal code	
Contact name	Title	Email		

Company Information

Brief description of your company and the mine site (provide operating details, including location of the site, planned life of the mine, history of the mine site, and any other relevant information to the application)

Is your operating service secured by firm, long term contracts? (please include contract terms including timelines and final product destination)

Total power generation required (installed capacity in MW) at the mine site and what portion of that generation is expected to be from natural gas?

What is the expected peak load required for the power generators?

What is the average monthly load? Is the demand for the power generation seasonal? Please provide an average monthly or annual consumption profile by fuel type or energy source.

Price differential calculation

- Price Differential = Price of natural gas power generator (generator + shipping) "minus" Price of diesel equivalent (generator + shipping).
- Please express in pre-tax CAD dollar amounts.
- If you are applying for an incentive for more than one type of generator, enter the generator information in separate rows.
- Attach scanned copy(s) of detailed generator specifications and quotes from the supplier

Power generator brand and model	Expected service life (Yrs)	Quantity	Price differential (\$)	Subtotal
Total	-		-	\$
