

Operational Notice: Capacity Curtailment Lifted for Customers under Rate Schedules 7, 22 and 27

December 21, 2022

Capacity Curtailment Lifted for Interruptible Customers across Lower Mainland and Vancouver Island:

Effective Friday, December 23 at 7:00AM PST until further notice, the curtailment for all Interruptible customers under Rate Schedules 7, 22, and 27 located in the Lower Mainland and Vancouver Island will be lifted. Industrial Account Managers will be contacting Interruptible customers directly to communicate the termination of this curtailment.

Operational Restrictions Remain in affect across all British Columbia:

As indicated in the FortisBC notice issued on December 15, customers across all service areas in the province remain in a Hold to Authorize restriction with Imbalance Return at zero until further notice.

With the above restrictions in place, Marketers must bring in enough direct supply to cover their entire customer group demand in order to avoid Unauthorized Over-Run charges.

If a Shipper or Group takes gas in excess of the authorized quantity, Unauthorized Over-Run charges will apply. The first 5% of gas taken over the authorized quantity will be charged to the Shipper or Group at the Sumas Daily Price. Gas taken in excess of 5% of the authorized quantity will be charged the greater of CAD \$20.00 per gigajoule or the Sumas Daily Price times 1.5.

FEI will continue to monitor the weather and temperature forecast and will provide an update with respect to further operational changes at the earliest possible time.

FortisBC reserves the right to limit the use of imbalance return or otherwise curtail service. FortisBC continues to monitor the weather and operational conditions across its service regions and will provide as much advanced notice as possible in the event of changes.

Note this posting will be appended to the news flash section of our web site for your future reference:
