

Notice: Imbalance Return to Zero

December 2, 2013

Imbalance return will be reduced to zero in the Lower Mainland and Interior regions effective December 3, 2013 until further notice.

Imbalance return is available to daily balanced groups only. When imbalance return is eliminated, marketers with daily balanced groups are not able to use their inventory as a source of supply. This means you must bring on enough direct physical supply to meet or exceed your group's consumption or you may incur a balancing premium surcharge.

Balancing surcharges in winter are \$1.10 per GJ and will apply to gas exceeding 20% of the authorized quantity or over 100 GJs. These surcharges are applicable to daily balanced groups only.

Please monitor your email for further notices or restrictions.

If you have any questions or concerns, please email us at TransportationServices@fortisbc.com or call the Hotline at 604-592-7788.

Thanks,

Christine Braun
