

Notice: Imbalance Return

December 20, 2017

Due to cooler weather, effective December 22, 2017 until further notice, Imbalance Return will be eliminated in the Lower Mainland and the Interior.

This means that marketers managing daily balanced groups must bring on sufficient direct supply to meet their group demand. If under-deliveries occur, daily balancing gas may be charged, and if under-deliveries exceed the 20% threshold, surcharges of \$1.10 per GJ may also be charged.

Please factor this in as we head into a five-day trading period. As you are aware, on Friday December 22, trading will occur for December 23-27.

To note, updated tariff tips are available on our web site. The Operating requirements document reviews the balancing requirements, inventory levels and possible restrictions on FEI's system, and the nomination cycle deadlines are posted with the timing of scheduled quantity updates by cycle (in WINS).

All information postings are located in the news flash section of our web site:
