

Nomination Practice and Backstopping

May 4, 2017

Similar to the advisory FEI issued last January, we request that all Marketers make best efforts to nominate in WINS no more than approximately 20% above expected group demand at the Interior, Lower Mainland and Columbia locations. Given Spectra is fully contracted, over-inflated nominations have been causing operational issues for FEI.

In addition, if a Marketer is unable to bring on sufficient supply to meet group demand, back-stopping will be turned on for those groups.

FEI will be monitoring all nominations to ensure compliance. Be aware that under the tariff, FEI has the right to amend nominations if deemed necessary, but we prefer not to take this approach and leave the responsibility to the Marketers to manage their business appropriately.

Thank you and please do your best to comply.
